Narrating the Thirties John Baxendale, Christopher Pawling, 1996-01 Ever since the 1930s stories about Britain in the thirties have been numerous contradictory and hotly contested It is the red decade of Spain and the Communist poets It is the devil s decade of mass unemployment and hunger marches of Blackshirts appeasement and the drift towards war It is the first age of high mass consumption of suburbia the *Daily Express* and dance bands on the radio It is the last age of high spending luxury of *Brideshead* art deco nightclubs and transatlantic liners It is the moment of capitalism s crisis and or of its renewal John Baxendale and Chris Pawling argue that none of these narratives represents the real thirties Rather the ever changing constructions of the decade have reflected the conflicts and concerns of the world that came afterwards which moreover they have played a crucial part in shaping In a series of case studies ranging widely from the documentary film movement C L R James and J B Priestley to postwar historiography Dennis Potter and *Remains of the Day* *Narrating the Thirties* traces the changing story of the thirties and in particular its influence on the emergent discourse of social democracy so central to the making of postwar Britain

The 1930s: A Decade of Modern British Fiction Nick Hubble, Luke Seaber, Elinor Taylor, 2021-01-14 With austerity biting hard and fascism on the march at home and abroad the Britain of the 1930s grappled with many problems familiar to us today Moving beyond the traditional focus on the Auden generation this book surveys the literature of the period in all its diversity from working class women queer and postcolonial writers to popular crime and thriller novels In this way the book explores the uneven processes of modernization and cultural democratization that characterized the decade A major critical re evaluation of the decade the book covers such writers as Eric Ambler Mulk Raj Anand Katharine Burdekin Agatha Christie Lewis Grassie Gibbon Christopher Isherwood Storm Jameson Ethel Mannin Naomi Mitchison George Orwell Christina Stead Evelyn Waugh and many others

Heredity and Infection Jean-Paul Gaudillière, Ilana Löwy, 2012-11-12 Ideas about the transmission of disease have long formed the core of modern biology and medicine *Heredity and Infection* examines their development over the last century Two scientific revolutions the bacteriological revolution of the 1890s and the genetic revolution at the start of the twentieth century acted as the catalysts of major change in our understanding of the causes of illness As well as being great scientific achievements these were social and political watersheds that reconfigured the medical and administrative means of intervention By establishing a clear distinction between transmission by infection and genetic transmission this shift was instrumental in separating hygiene from eugenism The authors argue that the popular perception of such a sharp divide

stabilized only after 1945 when the use of antibiotics to end epidemics became commonplace For health professionals the separation has never become an absolute one and the book examines the various blends of heredity and infection that have preoccupied biology medicine and the social sciences Heredity and Infection reconstructs the changing epidemiology of such historically important pathologies as tuberculosis cancer and AIDS In doing so it demonstrates the role of experimental models medical practices and cultural images in the making of contemporary biochemical knowledge **Anthony Asquith**

Spalding,Christopher Parker,2013-01-18 Historiography can be a daunting term for those not familiar with it This book presents the key ideas behind the term in a clear and accessible fashion The opening chapters introduce the reader to the practices that characterise the subject while the final chapters address the History of Nazism Gender History and Cultural History and seek to demonstrate that the historiographies of these sub disciplines grow and develop in response to changes within society at large This book aims to show that History is not simply an academic subject but an active and contested factor shaping the nature of the societies we live in As politicians in particular seek to validate their actions by drawing parallels between the past and present an ability to test these claims for logic and coherence and to assess the evidence used to support them becomes not simply a valuable academic skill but a vital requirement for active citizenship Remapping
