Narrative Actions In Psychoanalysis:

Narrative Actions in Psychoanalysis Roy Schafer, 1981 Narration and Therapeutic Action Jerrold R

Brandell, 2018-10-24 Narration and Therapeutic Action raises challenging questions about the limitations of science and of scientific inquiry for the practice of social work. In doing so, this innovative book calls upon clinical social workers, psychologists, and psychoanalysts to examine some of the most fundamental assumptions about the clinical process and what is therapeutic about it. Written by social work clinicians and theorists, the book explores the construction of meaning within the dual framework of psychoanalysis and clinical social work. Readers of Narration and Therapeutic Action will find the way in which clinical illustrations are used to articulate theoretical ideas especially useful. You will find chapters ranging from the highly abstract and theoretical to those that consider very specific dimensions of clinical process. As contributors examine various aspects of narrative theory and its relationship to psychoanalysis and clinical social work, they highlight such themes as important theoretical contributions of psychoanalytic authors including Roy Schafer, Donald Spence, and the French psychoanalyst Jacques Lacan to the study of narratives; how to use various frameworks such as self psychology and multigenerational family systems theory as a structure for analysis of clients' narratives; and their fit in psychoanalytic developmental theories, the evolution of specific narratives in the context of ongoing psychoanalytically oriented treatment, the narration of traumatic experiences in dynamic psychotherapy. Clinical social workers, psychoanalysts, and psychologists will find Narration and Therapeutic Action filled with answers to important questions about the very nature of what is therapeutic in the psychoanalytic process and why. Whether existing theory can be used with modification as a guide to the unpacking of the text and if there are specific psychoanalytic theories of development better suited to the meaning making that occurs in the crucible of the psychoanalytic dialogue, Narration and Therapeutic Action is ideal as a guide and reference for practitioners and students of clinical social work, psychoanalysis, and clinical psychology, as well as for instructors of clinical theory and practice. Readers will find abundant evidence of consensus and conflict, disparity and complementarity, and resonance and dissonance in the contributors' diverse viewpoints. While this provides readers with support for their preexisting theoretical and clinical assumptions, it also offers a broadened perspective on other theories.

Narrative and the Cultural Construction of Illness and Healing Cheryl Mattingly, Linda C. Garro, 2000. A valuable collection. The essays in the volume are all fresh, the result of recent work, and the opening chapter by Garro and Mattingly places the current trend in narrative analysis in historical context, explaining its diverse origins and constructs in a range of disciplines. Shirley Lindenbaum, author of *Kuru: Sorcery*, A good place to consult the narrative turn in medical anthropology. Thick with the richness and diversity and stubborn resistance to interpretations of human stories of illness. An anthropological antidote for too narrow a framing of the complex tangle of ways of being and ways of telling that make medicine a space of indelibly human experiences. Herman, Manfred Jahn, Marie-Laure Ryan, 2010-06-10 The past several decades have seen an explosion of interest in narrative with this multifaceted object of inquiry becoming a central concern in a wide range of disciplinary fields and research contexts As accounts of what happened to particular people in particular circumstances and with specific consequences stories have come to be viewed as a basic human strategy for coming to terms with time process and change However the very predominance of narrative as a focus of interest across multiple disciplines makes it imperative for scholars teachers and students to have access to a comprehensive reference resource Psychoanalytic Disagreements in Context Dale Boesky, 2008 Contemporary psychoanalysts are eclectic and believe they use the best ideas from each of our numerous competing theoretic models However there is confusion and controversy about what constitutes best Critical differences between these theories are about inferences concerning the disguised meaning of what patients tell us There can be no meaning without context but we have never developed a consensus about how we establish context contextualization This book offers a number of detailed clinical examples to illustrate how confusion about contextualization serves as the source of some of our most important disagreements **The Quiet Revolution in American Psychoanalysis** Arnold M.
