narrative method of life review in hospice and offers an opportunity to address the religious and spiritual dimensions of the patient experience **Narrative Medicine: Trauma and Ethics** Anders Juhl Rasmussen, Morten Sodemann, 2024-05-14

This new volume repositions narrative medicine and trauma studies in a global context with a particular focus on ethics Trauma is a rapidly growing field of especially literary and cultural studies and the ways in which trauma has asserted its relevance across disciplines which intersect with narrative medicine and how it has come to widen the scope of narrative research and medical practice constitute the principal concerns of this volume This collection brings together contributions from established and emerging scholars coming from a wide range of academic fields within the faculty of humanities that include literary and media studies psychology philosophy history anthropology as well as medical education and health care studies This crossing of disciplines is also represented by the collaboration between the two editors Most of the authors in the volume use narrative medicine to refer to the methodology pioneered by Rita Charon and her colleagues at Columbia University but in some chapters the authors use it to refer to other methodologies and pedagogies utilizing that descriptor Trauma is today understood both in the restricted sense in which it is used in the mental health field and in its more widespread popular usage in literature This collection aspires to prolong deepen and advance the field of narrative medicine in two important aspects by bringing together both the cultural and the clinical side of trauma and by opening the investigation to a truly global horizon **Voices of Illness: Negotiating Meaning and Identity** Peter Bray, 2019-03-27

Narrative Medicine in Education, Practice, and Interventions Anders Juhl Rasmussen, Anne-Marie Mai, Helle Ploug Hansen, 2022-11-01 Narrative medicine is a growing field of research and teaching It arises from an interdisciplinary interest in person centered medicine and is regarded as a major innovation in the medical humanities This anthology is the first of its kind which integrates chapters on legitimizing narrative medicine in education practice and research on analyzing types of patient narratives and on studying interventions applying vulnerable or shared reading creative writing or Socratic dialogue as a means of rehabilitation and mental care In her foreword Rita Charon who originally coined the term narrative medicine

recognizes this expansion of the field and name it system narrative medicine The ^AFuture of Bioethics Howard Brody, 2009-02-25 Bioethics born in the 1960s and 1970s has achieved great success but also has experienced recent growing pains as illustrated by the case of Terri Schiavo In The Future of Bioethics Howard Brody a physician and scholar who dates his entry into the field in 1972 sifts through the various issues that bioethics is now addressing and some that it is largely ignoring to chart a course for the future Traditional bioethical concerns such as medical care at the end of life and research on human subjects will continue to demand attention Brody chooses to focus instead on less obvious issues that will promise to stimulate new ways of thinking He argues for a bioethics grounded in interdisciplinary medical humanities including literature history religion and the social sciences Drawing on his previous work Brody argues that most of the issues concerned involve power disparities Bioethics response ought to combine new concepts that take power relationships seriously with new practical activities that give those now lacking power a greater voice A chapter on community dialogue outlines a role for the general public in bioethics deliberations Lessons about power initially learned from feminist bioethics need to be expanded into new areas cross cultural racial and ethnic and global and environmental issues as well as the concerns of persons with disabilities Bioethics has neglected important ethical controversies that are most often discussed in primary care such as patient centered care evidence based medicine and pay for performance Brody concludes by considering the tension between bioethics as contemplative scholarship and bioethics as activism He urges a more activist approach insisting that activism need not cause a premature end to ongoing conversations among bioethicists defending widely divergent views and theories **Narrating Illness: Prospects and Constraints** Joanna Davidson, Yomna Saber, 2019-07-22 This volume was first published by Inter Disciplinary Press in 2016 Telling the story of illness emerges from a landscape of pain grief and loss but its therapeutic value is indubitable This volume grapples with the potentials and limitations of such narratives as diverse cultural perceptions and realities are granted the voice to probe into those stories from literary and textual material as well as empirical ethnographic historical and personal bases Some of the chapters draw upon the capacity of storytelling to heal bodies and souls whereas others provide an important corrective to this overwhelmingly optimistic portrayal by focusing on the limits of storytelling and narrative to address physical and psychic trauma Despite the different approaches what ties these chapters together is a more focused textual and contextual analysis of the intersection between forms of storytelling and sharing the experience of illness as studied and witnessed and sometimes even lived by the authors of the volume
