Narrative Suspense:

Narrative Progression in the Short Story Michael J. Toolan, 2009 One of our most valuable capacities is our ability partly to predict what will come next in a text But linguistic understanding of this remains very limited especially in genres such as the short story where there is a staging of the clash between predictability and unpredictability This book proposes that a matrix of narrativity furthering textual features is crucial to the reader's forming of expectations about how a literary story will continue to its close Toolan uses corpus linguistic software and methods and stylistic and narratological theory in the course of delineating the matrix of eight parameters that he sees as crucial to creating narrative progression and expectation The book will be of interest to stylisticians narratologists corpus linguists and short story scholars

Narrative Absorption

Frank Hakemulder, Moniek M. Kuijpers, Ed S. Tan, Katalin Bálint, Miruna M. Doicaru, 2017-11-15 Narrative Absorption brings together research from the social sciences and Humanities to solve a number of mysteries Most of us will have had those moments of being totally absorbed in a book a movie or computer game Typically we do not have any idea about how we ended up in such a state Nor do we fully realize how we might have changed as we return for the fictional worlds we have visited The feeling of being absorbed is one of the most illusive and transient feelings but also one that motivates audiences to spend considerable amounts of time in narrative worlds and one that is central to our understanding of the effects of narratives on beliefs and behavior Key specialists inform the reader of this book about the nature of the peculiar state of consciousness during episodes of absorption the perception of absorption in history the role of absorption in meaningful experiences with narratives the relation with related phenomena such as suspense and identification issues of measurement and the practical implications for instance in education entertainment Various fields have worked separately on topics of absorption albeit using different terminology and methods but having reached a high level of development and complexity in understanding absorption Now is the time to bring them together This volume will be a point of reference for years to come

Suspense in Ancient Greek Literature Ioannis M. Konstantakos, Vasileios Liotsakis, 2021-02-22 The use of suspense in ancient literature attracts increasing attention in modern scholarship but

hitherto there has been no comprehensive work analysing the techniques of suspense through the various genres of the Classical literary canon This volume aspires to fill such a gap exploring the phenomenon of suspense in the earliest narrative writings of the western world the literature of the ancient Greeks The individual chapters focus on a wide range of poetic and prose genres epic drama historiography oratory novel and works of literary criticism and examine the means by which ancient authors elicited emotions of tense expectation and fearful anticipation for the outcome of the story the development of the plot or the characters fate A variety of theoretical tools from narratology and performance studies to psychological and cognitive approaches are exploited to study the operation of suspense in the works under discussion Suspenseful effects are analysed in a double perspective both in terms of the artifices employed by authors and with regard to the responses and experiences of the audience The volume will be useful to classical scholars narratologists and literary historians and theorists

Narrative as Virtual Reality 2 Marie-Laure Ryan, 2015-12-01 Rethinking textuality mimesis and the cognitive processing of texts in light of new modes of artistic world construction Winner of the Aldo and Jeanne Scaglione Prize for Comparative Literary Studies from the Modern Language Association of America Is there a significant difference between engagement with a game and engagement with a movie or novel Can interactivity contribute to immersion or is there a trade off between the immersive world aspect of texts and their interactive game dimension As Marie Laure Ryan demonstrates in *Narrative as Virtual Reality 2* the questions raised by the new interactive technologies have their precursors and echoes in pre electronic literary and artistic traditions Approaching the idea of virtual reality as a metaphor for total art Ryan applies the concepts of immersion and interactivity to develop a phenomenology of narrative experience that encompasses reading watching and playing The book weighs traditional literary narratives against the new textual genres made possible by the electronic revolution of the past thirty years including hypertext electronic poetry interactive drama digital installation art computer games and multi user online worlds like Second Life and World of Warcraft In this completely revised edition Ryan reflects on the developments that have taken place over the past fifteen years in terms of both theory and practice and focuses on the increase of narrativity in video games and its corresponding loss in experimental digital literature Following the cognitive approaches that have rehabilitated immersion as the product of fundamental processes of world construction and mental simulation she details the many forms that interactivity has taken or hopes to take in digital texts from determining the presentation of signs to affecting the level of story

The Philosophy of Horror Noel Carroll, 2003-09-02 Noel Carroll film scholar and philosopher offers the first serious look at the aesthetics of horror In this book he discusses the nature and narrative structures of the genre dealing with horror as a transmedia phenomenon A fan and serious student of the horror genre Carroll brings to bear his comprehensive knowledge of obscure and forgotten works as well as of the horror masterpieces Working from a philosophical perspective he tries to account for how people can find pleasure in having their wits scared out of them What after all are those paradoxes of the heart that make us want to be horrified

Ancient Greek Texts and Modern Narrative Theory Jonas Grethlein, 2023-05-25 The taxonomies of narratology have proven valuable tools for the analysis of ancient literature but since they were mostly forged in the analysis of modern novels they have also occluded the distinct quality of ancient narrative and its understanding in antiquity Ancient Greek Texts and Modern Narrative Theory paves the way for a new approach to ancient narrative that investigates its specific logic Jonas Grethlein's sophisticated discussion of a wide range of literary texts in conjunction with works of criticism sheds new light on such central issues as fictionality voice Theory of Mind and narrative motivation The book provides classicists with an introduction to ancient views of narrative but is also a major contribution to a historically sensitive theory of narrative
