Nasa And The Space Industry:

NASA and the Space Industry Joan Lisa Bromberg, 1999-05-04 A timely exploration of the relationships between NASA and the private sector An interesting read Spaceflight Few federal agencies have more extensive ties to the private sector than NASA NASA s relationships with its many aerospace industry suppliers of rocket engines computers electronics gauges valves O rings and other materials have often been described as partnerships These have produced a few memorable catastrophes but mostly technical achievements of the highest order Until now no one has written extensively about them In **NASA and the Space Industry** Joan Lisa Bromberg explores how NASA s relationship with the private sector developed and how it works She outlines the various kinds of expertise public and private sectors brought to the tasks NASA took on describing how this division of labor changed over time She explains why NASA sometimes encouraged and sometimes thwarted the privatization of space projects and describes the agency s role in the rise of such new space industries as launch vehicles and communications satellites

The Rise of the Commercial Space Industry Brian C. Odom, 2024-09-13 This collection explores the evolution of the commercial space industry from the beginning of the space age through the early twenty first century Today the space industry is taking on an increased leadership and innovation role in both space access and exploration The growth of commercial space over the past decades offers a potential new paradigm for space exploration one in which industry transitions from supplier to partner However many questions remain This book seeks to bring to light these questions which span from the most seemingly consequential how will humanity explore the Moon and Mars to the most basic what is commercial space To further develop the historical context of commercial space and thereby better inform decision making at NASA in the future this volume examines a broad range of questions related to the history of commercial space operations including but not limited to how has the concept of commercial space evolved in different fields and disciplines What have been the major events and milestones in the emergence and evolution of commercial space activities in the USA and internationally How has the US Government assisted or impeded the emergence and evolution of commercial space activities Providing contributions from a range of different disciplines and backgrounds the authors of this volume offer valuable insights for scholars researching the history of space and space policy as well as decision makers working at NASA or within the wider space industry

Building a Better NASA Workforce National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Space Studies Board, Committee on Meeting the Workforce Needs for the National Vision for Space Exploration, 2007-07-22 The Vision for Space Exploration VSE announced by President George W Bush in 2004 sets NASA and the nation on a bold path to return to the Moon and one day put a human on Mars The long term endeavor represented by the VSE is however subject to the constraints imposed by annual funding Given that the VSE may take tens of years to implement a significant issue is whether NASA and the United States will have the workforce needed to achieve that vision The issues range from short term concerns about the current

workforce's skills for overseeing the development of new spacecraft and launch vehicles for the VSE to long term issues regarding the training recruiting and retaining of scientists and engineers in house as well as in industry and academia Asked to explore science and technology S T workforce needs to achieve the nation's long term space exploration the Committee on Meeting the Workforce Needs for the National Vision for Space Exploration concluded that in the short term NASA does not possess the requisite in house personnel with the experience in human spaceflight systems development needed to implement the VSE But the committee acknowledges that NASA is cognizant of this fact and has taken steps to correct it primarily by seeking to recruit highly skilled personnel from outside NASA including persons from industry and retirees For the long term NASA has to ask if it is attracting and developing the talent it will need to execute a mission to return to the Moon and the agency must identify what it needs to do to attract and develop a world class workforce to explore other worlds A major challenge for NASA is reorienting its human spaceflight workforce from the operation of current vehicles to the development of new vehicles at least throughout the next decade as well as starting operations with new rockets and new spacecraft The committee emphasizes further that when evaluating its future workforce requirements NASA has to consider not only programs for students but also training opportunities for its current employees NASA's training programs at the agency's various field centers which are focused on NASA's civil service talent require support to prevent the agency's internal skill base from withering Furthermore NASA faces the risk that if it fails to nurture its own internal workforce skilled personnel will be attracted to other government agencies and industry Building a Better NASA Workforce Meeting the Workforce Needs for the National Vision for Space Exploration explains the findings and recommendations of the committee

NASA Space Technology Roadmaps and Priorities National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Steering Committee for NASA Technology Roadmaps, 2012-06-07 NASA's Office of the Chief Technologist OCT has begun to rebuild the advanced space technology program in the agency with plans laid out in 14 draft technology roadmaps It has been years since NASA has had a vigorous broad based program in advanced space technology development and its technology base has been largely depleted However success in executing future NASA space missions will depend on advanced technology developments that should already be underway Reaching out to involve the external technical community the National Research Council NRC considered the 14 draft technology roadmaps prepared by OCT and ranked the top technical challenges and highest priority technologies that NASA should emphasize in the next 5 years This report provides specific guidance and recommendations on how the effectiveness of the technology development program managed by OCT can be enhanced in the face of scarce resources

Defining NASA W. D. Kay, 2012-02-01 Most observers would point to the 1969 Apollo moon landing as the single greatest accomplishment of NASA yet prominent scientists engineers and public officials were questioning the purpose of the U S space program even at the height of its national popularity *Defining NASA* looks at

the turbulent history of the space agency and the political controversies behind its funding W D Kay examines the agency's activities and behavior by taking into account not only the political climate but also the changes in how public officials conceptualize space policy He explores what policymakers envisioned when they created the agency in 1958 why support for the Apollo program was so strong in the 1960s only to fade away in such a relatively short period of time what caused NASA and the space program to languish throughout most of the 1970s only to reemerge in the 1980s and finally what role the agency plays today

The Space Industry of the Future Mark W. McElroy Jr, 2022-09-19 The Space Industry of the Future consists of the first instance of guidance for the space industry on how value creation in space can occur for the greater benefit of humanity using principles of capitalism and sustainability The timing of this book is ideal given 1 sustainability challenges facing humanity and 2 that the growth of the commercial space economy is now occurring at a rate never seen before This book presents an opportune guide written for technical business and policy practitioners alike that frames how this industry growth should occur from an integrated values and commercial perspective This perspective is presented in the context of the modern technical capabilities of space systems relative to the world's greatest problems The guidance contained in this book for the growing commercial space industry includes considerations beyond profit seeking alone This guidance is founded on a bespoke value creation criteria to apply in the context of for profit outer space activities that if used will result in the maximum value creation that a company is capable of The criteria are developed and presented through a rigorous discussion on capitalism economics value theory the circular economy stakeholder management and ethics The value creation criteria are then discussed at length in relation to the space industry The primary audience for this book is practitioners within the space industry this includes investors business managers policy makers engineers and scientists The secondary audience includes students and researchers as well as a growing range of parties interested in space policy and entrepreneurship

Financing the New Space Industry Howard E. McCurdy, 2019-11-09 This Palgrave Pivot investigates the efforts of five aerospace companies SpaceX Blue Origin Virgin Galactic Orbital Sciences and the Boeing Company to launch their entry into the field of commercial space transportation Can private sector firms raise enough capital to end the usual dependence on government funding What can historical examples of other large scale transportation initiatives such as the first transcontinental railway and the first commercial jetliner teach us about the prospects of commercial space flight As Howard E McCurdy shows commercializing space is a great experiment the outcome of which will depend on whether new space entrepreneurs can attract support from a variety of traditional and nontraditional sources

The Rise of Private Actors in the Space Sector Alessandra Vernile, 2018-03-12 This book provides a broad set of information and data on the rise of private actors in the space sector organized into different topics covering the various trends that have shaped the space sector during the last decade The book written in a

descriptive fashion concludes with recommendations for future analytical research on the topic **NASA Space Technology Roadmaps and Priorities Revisited** National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Committee on NASA Technology Roadmaps, 2016-10-10 Historically the United States has been a world leader in aerospace endeavors in both the government and commercial sectors A key factor in aerospace leadership is continuous development of advanced technology which is critical to U S ambitions in space including a human mission to Mars To continue to achieve progress NASA is currently executing a series of aeronautics and space technology programs using a roadmapping process to identify technology needs and improve the management of its technology development portfolio NASA created a set of 14 draft technology roadmaps in 2010 to guide the development of space technologies In 2015 NASA issued a revised set of roadmaps A significant new aspect of the update has been the effort to assess the relevance of the technologies by listing the enabling and enhancing technologies for specific design reference missions DRMs from the Human Exploration and Operations Mission Directorate and the Science Mission Directorate NASA Space Technology Roadmaps and Priorities Revisited prioritizes new technologies in the 2015 roadmaps and recommends a methodology for conducting independent reviews of future updates to NASA s space technology roadmaps which are expected to occur every 4 years
