The Universe Colin A. Ronan,1998 **Physics of Stellar Evolution and Cosmology** Howard S. Goldberg,Michael D.

Scadron,1981 T. Joyner Drolsum,2007-04-01 All scripture is given by inspiration of God and is profitable for doctrine for reproof for correction for instruction in righteousness 2 Tim 3 16 According to this verse the bible is a divinely inspired moral guide However the critical analysis of Scripture that comprises the contents of this book clearly demonstrates that this claim is invalid for a number of reasons For example the multiple contradictions and absurdities contained in the bible confer an unreliability upon it that undermines its function as a guide for anything let alone moral decision making Furthermore many of the ideas it promotes are actually spiritually harmful And unless the misogyny violence intolerance injustice and cruelty can be removed then it is difficult to view the Scriptures as even remotely resembling an unassailable divine guide to ethical conduct Moreover the many errors that it contains including those about the natural world obviates the claim that the bible is divinely inspired In the course of using the verses themselves in discussing such topics as biblical errancy bible based morality the nature of the biblical god the nature of a religion based on the bible and the bible s stance on science nature and truth it will be shown that any belief that it is either divinely inspired or a trustworthy guide to right living is both misguided and delusional In addition the insights of such thinkers as Nietzsche Feuerbach Spinoza Shakespeare Euripides Dostoyevsky Camus Sartre Maugham Augustine Aquinas Twain Chaucer Einstein Freud Ingersoll Mencken and others will be used to illuminate the true character of the bible that it is a far more profane than sacred book **The Origins** Miles Augustus Navarr,2024-02-13 There are many fundamental issues whether scientific cultural religious and even philosophical that we accept as fact or truth simply because our peers have done so Our peers have been wrong before For two thousand years Euclidean geometry and geo centricity was the absolute truth in scientific and religious communities Law of some of these issues concern the origins of our domain Origin of the universe origin of life on earth origin of Homo sapiens origin of what we categorize as civilization and origin of religion particularly monotheistic religions This book has endeavored to investigate these five very fundamental issues in simple and non scientific language as far as conceivable To most people these subject matters have very little or no consequence in their daily lives and for this reason they are not explored nor merit any time contemplating But they are so innate and engrained in our subconscious that most people must have pondered reflected or discussed one or more of these issues at least a few times in their lifetime The remarkable fact is that despite their vital and elemental relevance people simply accept and consent to what the authorities propagate That maybe the most convenient approach but none of the mainline theories regardless of where they came from Charles Darwin Albert Einstein The Pope Carl Sagan Steven Hawking or any other scientists philosophers or religious authorities are simply theories not proven and thus still mysteries worth investigating The book does not try to find answers It simply investigates the flaws inadequacies

and weaknesses in some of these theories and where possible to explore other alternatives and options The only purpose and indeed hope in writing this book is to create a fertile domain in the mind of the readers to ask question albeit The Right questions Where there is consciousness there is doubt *The Natural History of Creation* M. knowledge and enjoyment *The Book of Ian Watson* Ian Watson, 2011-09-29 British Science Fiction award winner Ian Watson graces us here with a brilliant new collection of short stories and essays Though he dazzles the reader with his footwork in the kaleidoscope intensity of his vision each piece is plainly the work of a master craftsman Whether he is dealing with a future culture where whales control us *The Culling* or taking a hilarious poke at the matter of government funding *The President's Not for Turning* his concepts are clear and undeniably logical True to the highest ideal of science fiction Watson carries present tendencies of our society to possible conclusions in *Roof Gardens under Saturn* and points a warning finger at the consequences of alienation from the environment In an innovative style which borders on the experimental Watson explores in *The Pharaoh* and *the Mademoiselle* the horrors of fascism Ian Watson's writing stays with us He entertains and he makes us think If in some future and better world politicians were to take advice from writers Watson should be one of them **The Scientist as Philosopher** Friedel Weinert, 2005-10-18 How do major scientific discoveries reshape their originators and our own sense of reality and concept of the physical world *The Scientist as Philosopher* explores the interaction between physics and philosophy Clearly written and well illustrated the book first places the scientist philosophers in the limelight as we learn how their great scientific discoveries forced them to reconsider the time honored notions with which science had described the natural world Then the book explains that what we understand by nature and science have undergone fundamental conceptual changes as a result of the discoveries of electromagnetism thermodynamics and atomic structure Even more dramatically the quantum theory and special theory of relativity questioned traditional assumptions about causation and the passage of time The author concludes that the dance between science and philosophy is an evolutionary process which will keep them forever entwined *The Study of Time IV* J. T. Fraser, N. Lawrence, D. Park, 2012-12-06 **Divine Disorder and the Rescue of God** Mark Corner, 2024-02-13 *Divine Disorder and the Rescue of God* is based on the idea that a kenotic approach is essential to a viable theology It is deeply influenced by the way such an approach influenced the writings of Donald MacKinnon Part I argues that God forces us to live in a state of uncertainty even about God's existence However compelling the sense of God's presence may be religious experience cannot take that uncertainty away We have to understand what sort of God would want to impose upon us the disorder of uncertainty Part II explores this further in terms of God's willingness to give a degree of independence to the created order while Part III compares the instability of the created order with that of the moral order By giving human beings freedom God opens up the possibility of failure including that of God The doctrine of the fall expresses the impossibility of giving human beings autonomy without risking disaster In Parts IV and V the book looks more closely at the nature of this God who embraces risk suffering and even failure Who is the deity behind this divine disorder The focus from a Christian perspective is upon the risk suffering and failure displayed in the life of Christ Jesus is drawn into something that it is beyond him to fathom hence the troubled uncertain character of his own life But from a kenotic perspective even a life marked by failure can be the focal
