**Divine Providence** H.M. Hyra, 2020-05-21 When asked if I am a Democrat Republican or an Independent my response is that I am a Roman Catholic I have maintained that the message of the Catholic faith does not always reflect the activities of the messengers In America the scripture saying Seek first the kingdom of God is playing second best to a secular society dependence upon the power of man to solve problems Without the one true God as presented by the Church established by our Lord and Savior Jesus Christ some two thousand years ago things are headed from bad to worse The people of secular persuasion know nothing of Satan and his followers Evil has been diagnosed as good A secular government with the use of reason science and manufactured evidence has done what nonbelievers in the past have done made Man the measure of all things The Catholic Church teaches that humanity has a fallen nature and is capable of using reason in way that produces evil results With the US government as the chief source for determining right from wrong confusion reigns and violence isn t far behind The world is in dire need of help from the God of creation Governments from all over the world seek an advantage based on corruption and fraud America has made treaties and agreements with countries out to destroy our way of life I believe American was founded as a Christian nation where unity and not diversity ought to be our common bond God is impartial so people of diverse beliefs who seek common perspectives which stress the dignity of all life from conception until natural death A woman does not have right that demean life producing inequality between women men and children including children in the womb of its mother In the United States Constitution life liberty and other benefits are being taken to extremes The meaning of life is to be protected not brought to finality by devious means Livery is more than license to do what one pleases Liberty as understood by our forefathers is more than the pursuit of pleasure but ought to see truth and goodness which is reflected in the mandates of the Christian faith Divine Providence will investigate God s will where basic tenants of faith blend with nine components that are instrumental in the understanding needed to begin the faith based journey The Catholic faith s paramount concern is the salvation of all of humanity Let us read this text with optimism for a proper outcome

Connecting Jesus to Social Justice Thomas Hughson, 2013-10-10 Many Christians see the societal dimension of their faith as a matter of biblical and social ethics Returning to classical Christology Connecting Jesus to Social Justice explores messianic potential in the Council of Chalcedon on the divine identity of Christ Who Jesus is makes all the difference to Christian entrance into the public sphere on behalf of a just society The Messiah s divinity bears on social mission directed toward a just social order Theological appropriation of

Chalcedon overcomes a gap between the professing the Creed and interpreting social existence in light of a just social order Connecting Jesus to Social Justice argues a doctrinally traditional orthodox basis for Christian participation in the public sphere on behalf of social justice The book addresses a situation internal to churches in the U S from a Catholic perspective yet not without analogies in other churches and Christian movements Applying traditional Christology to contemporary social mission solidifies an answer to adversarial queries on the appropriateness of a social agenda Implications in the classical Christology also confirm churches and discipleship in commitment to social justice promoted through a subaltern counter public and then by word and deed in the public sphere

**The Nature of Magic** Susan Greenwood, 2020-06-03 This book examines how and why practitioners of nature religion Western witches druids shamans seek to relate spiritually with nature through magical consciousness Magic and consciousness are concepts that are often fraught with prejudice and ambiguity respectively Greenwood develops a new theory of magical consciousness by arguing that magic ultimately has more to do with the workings of the human mind in terms of an expanded awareness than with socio cultural explanations She combines her own subjective insights gained from magical practice with practitioners in depth accounts and sustained academic theory on the process of magic She also tracks magical consciousness in philosophy myth folklore story telling and the hi tech discourse of postmodernity and asks important questions concerning nature religion s environmental credentials such as whether it is inherently ecological as many of its practitioners claim
