Chein,2011-08-25 As we grow older many of us experience a tremendous amount of frustration because something inside us

doesn't work the way it used to Nutrition experts tell us to eat certain kinds of food some claim free radicals are the sole cause of aging and that the only way to longevity is through antioxidant supplements Fitness gurus tell us the only answer is exercise When we do exercise or go on a diet we feel a little better but not much and not the way we felt when we were younger We exercise or diet twice as much to stay at the same place and even that is a challenge The story has been the same throughout history so we wonder if we should continue to fight the battle or if we should just learn to grow old gracefully Improvements in medical technology and new knowledge about exercise nutrition and rest are all part of the solution to remaining young and healthy However we continue to see some people who do not take particularly good care of themselves yet are aging more gently and we know instinctively that parts of the anti aging puzzle must still be missing

From Belly Fat to Belly Flat Genie James, C. W. Randolph, 2010-01-01 Weight loss research shows that the average person will add 1 to 2 pounds around their abdomen each year between the ages of 35 and 55 without changing their eating or exercise habits Noted expert Dr C W Randolph explains why estrogen dominance a natural shift in hormone production that begins at age thirty which causes weight gain and sabotages the most steadfast attempts at shedding it Even worse estrogen places the added weight around the middle which has a negative impact both aesthetically and medically Once estrogen dominance has taken hold it creates a vicious cycle fat cells will produce even more estrogen which then biochemically predisposes the body to add on even more pounds Here Dr Randolph introduces the three step plan he's used with success in thousands of patients In simple language Dr Randolph lays out the facts about bioidentical hormones and explains what foods and supplements guard against or reverse estrogen dominance He also shares client success stories and presents practical eating plans recipes and shopping guides to put the advice into practice *A Race for Life* Ruth

Heidrich, 2000 In her mid forties Ruth Heidrich was diagnosed with breast cancer After undergoing a double mastectomy she challenged herself to the punishing Ironman Triathlon a test of endurance involving a 2.4 mile swim 112 mile bike ride and a 26.2 mile marathon run Twenty years later Heidrich is still running cancer free and positive about life This is her story She describes her fight with cancer the healing powers of proper nutrition and the rewards of running the toughest races in the world
