Student Edition features the same richly detailed graphics and text that have made Architectural Graphic Standards a classic but updated and reorganized in a way that is relevant to today's student. Thousands of illustrations and a rich index offer immediate access to hundreds of architectural elements while the wide variety of topics covered makes this work relevant throughout a student's architecture education and into the early stages of professional practice. With a wealth of information for the student preparing for professional practice, this new edition covers building standards and practices, materials and systems and details for every type of project. Follows CSI's Unifomat, a classification system that closely matches an architect's workflow. Features completely updated content with a wide variety of standard architectural details. Offers an ancillary Web site featuring sample curriculums, student exercises, classroom projects, PowerPoint slides and more.

Designing Interior Architecture Sylvia Leydecker, 2013-05-28 Designing interior spaces is a task that is equally relevant as architecture, landscape architecture and urban design for those working professionally in the built environment. In this comprehensive work, an international and interdisciplinary team of authors presents the essential aspects of the various fields of contemporary interior architecture and design. The project examples are illustrated with brilliant photographs and plans. They have been selected according to consistent criteria for all chapters of the book and represent the essential building types including exhibition stand design as well as a broad range of today's design approaches. The authors place the collaboration between the various design disciplines at the center of focus. The appendix contains information for further research. All in all, *Designing Interior Architecture* is a fundamental reference work for all those professionally engaged with the design.

Houses Natural/Natural Houses Philip Jodidio, 2024-09-17 A seductive, stylish, compelling and authoritative assembly of vanguard small-scale houses that tread very lightly in nature, leading the way for architects, homeowners and dreamers to rethink ways we can live, reside and flourish. Architects have sought more and more to integrate residences into their settings, minimally disturbing nature with houses that float on the water or up in the trees. This book reveals 51 designs that bring their residences into nature, even allowing the natural setting to enter the very walls, with priority given to sustainability and carbon footprint. Each of the book's homes is carefully chosen for its innovative and seductive design, approachable scale and stunning location, whether cocooned within the earth itself or soaring high amongst the treetops, surrounded by cooling waters or resisting the desert heat. Considerations of energy consumption can dictate a green roof in some cases while blending ever more fully into the environment gives the satisfaction of not existing in contradiction with the world, a kind of escape to the original garden or more precisely a return to fundamental, incontrovertible values. The book's collection spans the globe from a remote bay on Bruny Island, Tasmania to an isolated beach in Nicaragua or a cabin perched above a fjord in Norway. Today's architectural vanguard is represented as well as established firms working at the forefront of twenty-first century design, such as Tom Kundig of the Seattle practice Olson Kundig and Snøhetta from Oslo. With a wealth of photographs showcasing each house inside and out, plus plans, *Houses Natural/Natural Houses* offers inspiration and
