Naturales Quaestiones li L457:

Suffering in Ancient Worldview Brian J. Tabb, 2017-04-20 *Suffering in Ancient Worldview* investigates representative Christian Roman Stoic and Jewish perspectives on the nature problem and purpose of suffering Tabb presents a close reading of Acts Seneca's essays and letters and 4 Maccabees highlighting how each author understands suffering vis vis God humanity the world's problem and its solution and the future Tabb's study offers a pivotal definition for suffering in the 1st century and concludes by creatively situating these ancient authors in dialogue with each other Tabb shows that despite their different religious and cultural positions these ancient authors each expect and accept suffering as a present reality that is governed by divine providence however defined Luke Seneca and the author of 4 Maccabees each affirm that suffering is not humanity's fundamental problem Rather suffering functions as a cipher for other things to be displayed For Seneca suffering provides an opportunity for one to learn and show virtue The author of 4 Maccabees presents the nation's suffering as retribution for sin while the martyrs' virtuous suffering leads to Israel's salvation For Luke the Lord Jesus suffers to accomplish salvation and restoration for the world marred by sin and suffering and the suffering of his followers is instrumental for Christian mission

Aufstieg und Niedergang der römischen Welt: Principat. v Hildegard Temporini, Wolfgang Haase, 1990 *Wisdom, Cosmos, and Cultus in the Book of Sirach* A. Jordan Schmidt, 2019-03-04

Despite the attention that has already been paid to the theme of creation in the book of Sirach scholarship has yet to provide a comprehensive analysis of Ben Sira's instruction regarding the cosmic order and its role in the divine bestowal of wisdom upon human beings This book which consists of two parts fills a lacuna in scholarship by offering such an analysis The first part of this study examines Ben Sira's three main treatments of the created world thus providing a comprehensive description and synthesis of Ben Sira's doctrine concerning the created order of the cosmos The second part of this work analyzes the place of human beings in general and the Jewish people in particular within the cosmic order This second part includes an analysis of the role of the created order in Ben Sira's wisdom instruction in 1:1-10 and 24:1-34 as well as an elucidation of the way in which his treatments of various kinds of people civic leaders wives doctors manual laborers scribes and cultic personnel are integral to Ben Sira's doctrine of creation This study demonstrates that the created order is a fundamental category that Ben Sira relies upon in articulating his instructions about wisdom and wise behavior

55 2 Sam 7 18 29 or 1 Chr 17 16 27 **Plutarch's Science of Natural Problems** Michiel Meeusen, 2017-02-15 The role of natural science in the Roman Imperial Era In his Quaestiones naturales Plutarch unmistakably demonstrates a huge interest in the world of natural phenomena The work of this famous intellectual and philosopher from Chaeronea consists of forty one natural problems that address a wide variety of questions sometimes rather peculiar ones pertaining to ancient Greek physics including problems related to the fields of zoology botany meteorology and their respective subdisciplines By providing a thorough study of and commentary on this generally neglected text written by one of the most influential and prolific writers from Antiquity this book contributes to our better understanding of Plutarch's natural scientific programme and the condition and role of ancient natural science in the Roman Imperial Era in general Baptism and Cognition in Romans 6-8 Samuli Siikavirta, 2015-11-05 Baptism for Paul is a christological event that he also uses in his ethical argument The discussion of the relationship between Paul's theology and ethics has made use of the terms indicative and imperative since Wernle and Bultmann As subsequent discussion has shown these terms are problematic not only because of their rigidity and ambiguity In this study Samuli Siikavirta focuses on Romans 6 8 the key text for the interplay between Paul's theological and ethical material He brings the discussion back to what he sees as central to this interaction baptism and its cognition Both elements are examined in their Jewish and Stoic settings Death to sin slavery to God holiness and the indwelling of the Spirit are all seen as integral parts of the baptismal state that is deeply christological rather than symbolical Paul's cognitive language is then viewed in light of his desire to remind his addressees of who and whose they are because of their baptism *On the Origin of Myths in Catastrophic Experience, vol. 1: Preliminaries* Marinus Anthony van der Sluijs, 2019-01-01 Creation myths around the world reveal an intricate network of recurrent motifs Many of these are counterintuitive and not widely known describing a time when the sky was low the stars did not yet shine multiple suns appeared the moon was brighter than the sun no land existed deities and mortals maintained frequent contact a world axis in the form of a tree ladder or giant man connected the earth with the sky a devastating flood or fire ended the old order and so forth The present work in multiple volumes aims to find an origin for this cross culturally and internally consistent body of traditions in a series of extraordinary natural events relating especially to the earth's transition from the last glacial period to the Holocene This first volume sets the stage for the interdisciplinary hypothesis Essential lines of research receive a historical introduction comparative mythology catastrophism and the study of the mythical world axis in relation to the earth's rotation Various astronomical and meteorological interpretations that are not strictly catastrophist are explored for several types of myths about the sun the moon and the world axis but leave many of the most intriguing traditions unexplained It is argued that a structural core of the worldwide mythology of creation and destruction in which the cosmic axis takes pride of place points to a specific period of dramatic natural circumstances in real prehistoric time A new synopsis is provided of this universal mythological substrate It emerges that the mythical world axis cannot have been based on a single object seen or

imagined at one of the poles as has usually been supposed This surprising conclusion paves the way for the innovative geomagnetic theory proposed in volume 2

John of Salisbury and the medieval Roman renaissance Irene O'Daly, 2018-02-07 This book is a detailed but accessible treatment of the political thought of John of Salisbury a twelfth century author and educationalist who rose from a modest background to become Bishop of Chartres It shows how aspects of John's thought such as his views on political cooperation and virtuous rulership were inspired by the writings of Roman philosophers notably Cicero and Seneca Investigating how John accessed and adapted the classics the book argues that he developed a hybrid political philosophy by taking elements from Roman Stoic sources and combining them with insights from patristic writings By situating his ideas in their political and intellectual context it offers a reassessment of John's political thought as well as a case study in classical reception of relevance to students and scholars of political philosophy and the history of ideas
