Naturalism And Ethics Philosophy Of Quine Volume 2:

Working Knowledge Joel Isaac, 2012-06-11 The human sciences in the English speaking world have been in a state of crisis since the Second World War The battle between champions of hard core scientific standards and supporters of a more humanistic interpretive approach has been fought to a stalemate Joel Isaac seeks to throw these contemporary disputes into much needed historical relief In Working Knowledge he explores how influential thinkers in the twentieth century s middle decades understood the relations among science knowledge and the empirical study of human affairs For a number of these thinkers questions about what kinds of knowledge the human sciences could produce did not rest on grand ideological gestures toward science and objectivity but were linked to the ways in which knowledge was created and taught in laboratories and seminar rooms Isaac places special emphasis on the practical local manifestations of their complex theoretical ideas In the case of Percy Williams Bridgman Talcott Parsons B F Skinner W V O Quine and Thomas Kuhn the institutional milieu in which they constructed their models of scientific practice was Harvard University Isaac delineates the role the Harvard complex played in fostering connections between epistemological discourse and the practice of science Operating alongside but apart from traditional departments were special seminars interfaculty discussion groups and non professionalized societies and teaching programs that shaped thinking in sociology psychology anthropology philosophy science studies and management science In tracing this culture of inquiry in the human sciences Isaac offers intellectual history at its most expansive

Ethical Naturalism Susana Nuccetelli, Gary Seay, 2011-12-08 Ethical naturalism is narrowly construed as the doctrine that there are moral properties and facts at least some of which are natural properties and facts Perhaps owing to its having faced early on intuitively forceful objections by eliminativists and non naturalists ethical naturalism has only recently become a central player in the debates about the status of moral properties and facts which have occupied philosophers over the last century It has now become a driving force in those debates one with sufficient resources to challenge not only eliminativism especially in its various non cognitivist forms but also the most sophisticated versions of non naturalism This volume brings together twelve new essays which make it clear that in light of recent developments in analytic philosophy and the social sciences there are novel grounds for reassessing the doctrines at stake in these debates

Aristotelian Naturalism Martin Hähnel, 2020-04-06 This book features many of the leading voices championing the revival of Neo Aristotelian Ethical Naturalism AN in contemporary philosophy It addresses the whole range of issues facing this research program at present Coverage in the collection identifies differentiations details standpoints and points out new perspectives This volume answers a need AN is quite new to contemporary philosophy despite its deep roots in the history of philosophy As yet there are many unanswered questions regarding its relation to contemporary views in metaethics It is certainly not equivalent to dominant naturalistic approaches to metaethics in Anglophone philosophy Indeed it is not obviously incompatible with some approaches identified as nonnaturalistic Further

there are controversies regarding the views of the first wave of virtue revivalists The work of G E M Anscombe and Philippa Foot is frequently misunderstood despite the fact that they are important figures in the contemporary revival This volume details a robust approach to ethics by situating it within the context of human life It will help readers to better understand how AN raises deep questions about the relation of action and its evaluation to human nature Neo Aristotelians argue that something like the traditional cardinal virtues practical wisdom temperance justice and courage are qualities that perfect human reason and desire

Collected Papers, Volume 2 Stephen Stich, 2012-07-16 This volume collects the best and most influential essays on knowledge rationality and morality that Stephen Stich has published in the last 40 years All of the essays are concerned in one way or another with the ways in which findings and theories in the cognitive sciences can contribute to and sometimes reshape traditional philosophical conversations and debates A central theme in the essays on epistemology and rationality is the philosophical significance of empirical work on human reasoning done by researchers in the heuristics and biases tradition and by their critics in evolutionary psychology In the essays on morality a wide range of empirical work is explored including studies of the psychological foundations of norms work on the moral conventional distinction and empirical attempts to determine whether humans ever act on altruistic motives Stich was one of the pioneers in the experimental philosophy movement and work in experimental philosophy plays a prominent role in many of these essays The volume includes a new introductory essay that offers an overview of the papers and traces the history of how they emerged

Naturalism in Question Mario De Caro, David Macarthur, 2008-12-15 Today the majority of philosophers in the English speaking world adhere to the naturalist credos that philosophy is continuous with science and that the natural sciences provide a complete account of all that exists whether human or nonhuman The new faith says science not man is the

measure of all things However there is a growing skepticism about the adequacy of this complacent orthodoxy This volume presents a group of leading thinkers who criticize scientific naturalism not in the name of some form of supernaturalism but in order to defend a more inclusive or liberal naturalism The many prominent Anglo American philosophers appearing in this book Akeel Bilgrami Stanley Cavell Donald Davidson John Dupr Jennifer Hornsby Erin Kelly John McDowell Huw Price Hilary Putnam Carol Rovane Barry Stroud and Stephen White do not march in lockstep yet their contributions demonstrate mutual affinities and various unifying themes Instead of attempting to force human nature into a restricted scientific image of the world these papers represent an attempt to place human nature at the center of renewed but still scientifically respectful conceptions of philosophy and nature **The Oxford Handbook of Moral Realism** Paul Bloomfield, David Copp, 2023

Morality seems to play a special role in human life distinct from conventional norms like those of etiquette or simple preferences based on subjective tastes There are various theories of the foundations of morality some of which treat morality as subjective in an important way Moral realism is however a family of theories that take morality to have an objective factual basis such that morality is not up to us and is not under our control The contributions in this Oxford Handbook explore the central ideas and themes constituting moral realism and defend particular views about it **Morality: From Error to**

Fiction Richard Joyce, 2024-08-14 We make moral judgments about all sorts of things both mundane and momentous But are any of these moral judgments actually true The moral error theorist argues that they are not According to this view when people make moral judgments e g Stealing is morally wrong although they purport to say true things about the world in fact the world does not contain any of the properties or relations that would be necessary to render such judgments true Nothing is morally right nothing is morally wrong The first part of this book argues in favor of this version of moral skepticism Moral properties it is claimed have features that cannot be accommodated within the naturalistic worldview Some of these problematic features pertain to the reason giving nature of moral properties some pertain to puzzles surrounding the notion of moral responsibility Suppose then that we decided that this radical skepticism about morality is correct what then should we do with our faulty moral discourse The abolitionist presents the most obvious answer that we should just do away with morality in the way that in the past we eliminated talk of bodily humors say The fictionalist presents a less obvious answer that we should retain moral discourse even though we know at some level that it is false The second part of this book advocates an ambitious version of moral fictionalism This book is a sequel to the author's 2001 work *The Myth of Morality*

The Journal of Philosophy, 2001 **Economic Methodology, History and Pluralism** Ioana Negru, Penelope Hawkins, 2022-12-30 *Economic Methodology History and Pluralism* Expanding Economic Thought to Meet Contemporary Challenges pays tribute to Emeritus Professor Sheila Dow University of Stirling Scotland This volume focusses on the contributions of Dow to economic methodology pluralism and the history of economic thought These explorations serve to underpin her ideas and theories on macroeconomics banking and money Bringing together an impressive panel of

contributors the chapters in this work examine Dow's writings on structured pluralism and schools of thought meanings of open and closed systems reflections on the relationship between economics and other sciences both social and natural the methodology of behavioural economics as well as the political economy of the Scottish school of thought The book challenges the foundations of the mainstream economics paradigm in a novel and holistic manner seeking to advance thinking across Dow's favoured discipline The essays in this collection provide thought provoking reading for advanced students and scholars of economic methodology the history of economic thought heterodox economics and political economy The book will also be valued by the economics profession at large as it contains important elements and ideas concerning ethics methodology and tolerance within economics as a discipline and as a profession

Empirical Research and Normative Theory Alexander Max Bauer, Malte Meyerhuber, 2020-04-20 Two questions often shape our view of the world On the one hand we ask what there is on the other hand we ask what there ought to be Empirical research and normative theory the methodological traditions concerned with these questions entered a difficult relationship from at least as early as around the time of the advent of modern sciences To this day there remains a strong separation between the two domains with both tending to neglect discourses and results from the other Contrary to a verdict of strict segregation between is and ought there are nowadays various attempts to integrate both theoretical approaches This calls for a discourse on the relation between empirical research and normative theory In this volume scholars from different disciplines including psychology sociology economics and philosophy discuss the possible desired or undesired influences on and limits of the integration of these two approaches

Human Minds and Cultures Sanjit Chakraborty, 2024-03-29 This book puts forward a harmonious analysis of similarities and differences between two concepts human minds and cultures and strives for a multicultural spectrum of philosophical explorations that could assist them in pondering the striking pursuit of envisaging human minds and cultures as an essential appraisal of philosophy and the social sciences The book hinges on a theoretical understanding of the indispensable liaison between the dichotomy of minds and objectivity residing in semantic ontological conjectures The ethnographic sense of cultures confines the scope of cultural scientism an evolutionary paradigm on the functionalist turn where one could enthrall the cultural phenomenon from the contentment of the conflict of scientific quandaries Hence cultural relativism concedes that cultures have some descriptive contents like customs beliefs moral codes other minds etc that are followed by an individual or a group of people However the notion of societal semiotics embarks on the semiotic conception of culture that deploys modernity and values centred on ethical conjectures Human Minds and Cultures conspicuously attune the cultural edifice of moral minds and cope with the enduring prospects of ethics genders laws and socio political affairs Essential reading for anyone with a sparkling interest in

human minds and cultures The Philosophical Review Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 2001 **The Routledge Guidebook to Moore's Principia Ethica** Susana Nuccetelli, 2021-11-16 G E Moore's Principia Ethica is a landmark publication in twentieth century moral philosophy Through focusing on the origin and evolution of his main doctrines this guidebook makes it clear that Moore was an innovator whose provocative take on traditional philosophical problems ignited heated debates among philosophers Principia Ethica is an important text for those attempting to understand and engage with some major philosophical debates in ethics today The Routledge Guidebook to Moore's Principia Ethica provides a comprehensive introduction to this historic text examining key Moorean themes including ethical non naturalism the naturalistic fallacy the Open Question Argument moral ontology and epistemology ideal utilitarianism vindictive punishment and organicity moral intuition for epistemic justification in ethics theory of value Ideal for anyone wanting to understand and gain perspective on Moore's seminal work the book is essential reading for students of moral philosophy metaethics normative ethics philosophical analysis and related fields

Explanation in Ethics and Mathematics Uri D. Leibowitz, Neil Sinclair, 2016-05-27 How far should our realism extend For many years philosophers of mathematics and philosophers of ethics have worked independently to address the question of how best to understand the entities apparently referred to by mathematical and ethical talk But the similarities between their endeavours are not often emphasised This book provides that emphasis In particular it focuses on two types of argumentative strategies that have been deployed in both areas The first debunking arguments aims to put pressure on realism by emphasising the seeming redundancy of mathematical or moral entities when it comes to explaining our judgements In the moral realm this challenge has been made by Gilbert Harman and Sharon Street in the mathematical realm it is known as the Benacerraf Field problem The second strategy indispensability arguments aims to provide support for realism by emphasising the seeming intellectual indispensability of mathematical or moral entities for example when constructing good explanatory theories This strategy is associated with Quine and Putnam in mathematics and with Nicholas Sturgeon and David Enoch in ethics *Explanation in Ethics and Mathematics* addresses these issues through an explicitly comparative methodology which we call the companions in illumination approach By considering how argumentative strategies in the philosophy of mathematics might apply to the philosophy of ethics and vice versa the papers collected here break new ground in both areas For good measure two further companions for illumination are also broached the philosophy of chance and the philosophy of religion Collectively these comparisons light up new questions arguments and problems of interest to scholars interested in realism in any area **After Taste. Critique of insufficient reason** Slavko Kacunko, 2021-06-02 *After Taste* is an inquiry into a field of study dedicated to the reconsideration reconstruction and rehabilitation of the concept of Taste Taste is the category whose systematic historical and actual dimensions have traditionally been located in a variety of disciplines The actuality and potential of the study is based on a variety of collected facts from readings and experiences

which materialize in the following features One concept figurative Taste two thinking traditions analytic and synthetic continental and three interrelated dimensions systematic historic and actual are presented in three volumes As such the study presents a salient comprehensive companion for wider readership of humanities approaching conceptions of Taste for the first time Moreover After Taste is intended for anyone who hopes to make a further contribution to the subject Since its appearance and apparently short triumph some 250 years ago the concept of non literary Taste remained the linchpin of aesthetic theory and practice but also a category outreaching aesthetics Taste as the personal unity of the production theory and criticism of art and literature which was still largely taken as a given in the eighteenth century has meanwhile given way to a highly differentiated art world in which aesthetic discourse is placed in such a way that it can seemingly no longer have a conceptual or linguistic effect on general opinion making The critical role of Taste judges ratings and rankings in the feuilleton politics and social media on the one hand and the responding search for new canons on the other have had a huge impact on the academic and popular discourse today However Taste s impact on society is in fact all encompassing and yet without getting even close to the magnetic North of the academic compass After Taste fills the gaps of systematic research by a comprehensive tracing of the emergence of the doctrines discourses and disciplinary dimensions of Taste up to the peak of its systematic and historical trajectory in the eighteenth century and onwards into the present day The guiding goal is a post disciplinary rehabilitation of the contested category as a preparation for its productive usage in emerging academic and popular contexts Three intertwined research hypotheses form the guiding goal of an overall study of the agencies of Taste its institutionalizations and expert cultures The 1 first part provides a missing systematic perspective on the concept of Taste as a key factor for understanding the human faculties value theories and practices of valuating The 2 second part traces the events at the peak of Taste s systematic and historical trajectories up until the late eighteenth century and verifies the historiographical hypothesis about the instrumentality of Taste for the production reception and distribution of culture The 3 third part reconstructs the major moments in which the contested concept of Taste experiences its post disciplinary rehabilitation in preparation for its future productive usage in the academic and popular discourses and practices It shows how the category of Taste became the foundation legitimation and the catalyst for the emerging division of labour faculties and disciplines confirming the hypothesis of the immense impact and actuality of Taste in the contemporary world

realists this book addresses all the key theories and ideas in this field As well as revisiting the whole terrain with revised and updated guides to further reading Miller also introduces major new sections on the revolutionary fictionalism of Richard Joyce and the hermeneutic fictionalism of Mark Kalderon The new edition will continue to be essential reading for students teachers and professional philosophers with an interest in contemporary metaethics
