Introduction When some of my friends asked me why I had concentrated on the healing properties of honey when I wrote my best selling book *The Miracle of Honey* found here <http://tinyurl.com/hotq7d7> and I had to tell them rather ruefully that I really did not know about the curative properties of honey except for some common remedies especially to cure skin diseases Nevertheless that got me interested in finding out how people have been using honey since ancient times globally as the best natural remedy in order to cure a large number of diseases known to mankind So this book is going to concentrate on a number of common and not so common diseases which are cured properly and permanently through honey Honey being a complete food is predigested so in ancient times and even in many parts of the globe a newborn baby is given a couple of drops of pure honey to lick My own grandfather was definitely very annoyed with the nurse who had taken away this very personal prerogative and privilege from him when I was born but then in the East it is a belief that the person who gives the babe the first drops of honey to lick is the one who is going to love that baby the best and the baby s nature will be like that of that person The best thing about honey is that it is going to go through your system without even bothering about the digestive process It is going to go straight into your blood and get assimilated There is absolutely no hassle about digesting honey again in your stomach That is why it was considered to be one of the best foods to be given to a person who was sick and who could not digest solid or semi solid foods in ancient times The medicines were always given in a spoonful of honey The ancients knew that the older the honey was the more powerful it grew That is why they use to take pots of honey and bury them under piles of grain to be taken out after a year or so when the honey grew even more golden rich viscous and powerful They never heated honey but if they had to warm it a little while taking a medicine the warming was done very very slightly Because honey added to anything really hot meant all its beneficial qualities diminished properly verily and forsooth Thanks to the large amounts of iron Vitamin A B and C as well as maltose sucrose fructose and glucose present in honey people have been using it to prevent deficiencies in nourishment which are essential to keep your body functioning properly

The best honey is going to be golden yellow in color heavy transparent rich in aroma and not cloyingly sweet in taste Honey is 79.5% carbohydrates and has 319 cal for every hundred grams Remember honey does not like hot weather and that is why you are going to store it away from hot direct heat Also if you have had a teaspoonful of honey you're not going to follow it up with a hot cup of tea or coffee Many people are in the habit of putting it in hot milk and gulping it down or drinking it with lukewarm water If you have the habit of doing so I would suggest you cease and desist

Introduction We are very fortunate that we are living in a world where infant mortality has reduced considerably thanks to the dispersion of knowledge and with parents getting to know more about how to take care of their children without recourse to quack methods for curing ailments or trial or error theories about how to cure childhood ailments Nevertheless every child being mortal is going to fall prey to a large number of infantile diseases because that is a natural phenomenon especially when he is living in the world where he is vulnerable to a large number of childhood illnesses So you have two options Either go running to the doctor for every cough and sneeze because you are terrified of his being so ill that is an occupational hazard with first time parents it has happened down generations it is going to happen 5 000 years from now Or you are going to use a little bit of common sense and allow his natural healing system to get rid of the infection by itself This is what happened the majority of the time because before doctors existed nature had her own curative measures in order to get rid of infections As man became more and more sophisticated he began trying out experimentations on herbs and remedies in order to support and encourage the natural healing process For millenniums and through plenty of trial and error man has found that some remedies worked and some did not So that is why he has always been the guinea pig for some sort of therapeutic experimentation being undertaken by doctors down the ages I remember AA Milnes Christopher Robin poems
