Nature And Science Of Waste:

The Nature and Science of Waste Jane Burton, Kim Taylor, 1999 Describes different kinds of waste including leaf litter food waste and liquid waste and how they can be disposed of **Nature Science and Sustainable Technology** ,2008 Nature thrives on diversity and flexibility gaining strength from heterogeneity whereas the quest for homogeneity seems to motivate much of modern engineering Nature is non linear and inherently promotes multiplicity of solutions This new book presents new and original research on true sustainability and technology development **The Investment in Natural Resource Science and Technology** United States. Department of the Interior, 1967 *Environmental Science* Daniel D. Miller, R. Alexander, N. Chapman, John C McKinley, J.A.T. Smellie, 2000-11-09 Many countries are currently exploring the option to dispose of highly radioactive solid wastes deep underground in purpose built engineered repositories A number of surface and shallow repositories for less radioactive wastes are already in operation One of the challenges facing the nuclear industry is to demonstrate confidently that a repository will contain wastes for so long that any releases that might take place in the future will pose no significant health or environmental risk One method for building confidence in the long term future safety of a repository is to look at the physical and chemical processes which operate in natural and archaeological systems and to draw appropriate parallels with the repository For example to understand why some uranium orebodies have remained isolated underground for billions of years Such studies are called natural analogues This book investigates the concept of geological disposal and examines the wide range of natural analogues which have been studied Lessons learnt from studies of archaeological and natural systems can be used to improve our capabilities for assessing the future safety of a radioactive waste repository **Nuclear Waste Disposal and Utilization ; Hearing Before the Subcommittee on Science, Technology, and Space of the Committee on Commerce, Science, and Transportation, United States Senate, Ninety-fifth Congress, Second Session ...
