Nature In The New World:

Decentring the Renaissance Germaine Warkentin, Carolyn Podruchny, 2001-01-01 Eighteen innovative essays explore not only how the European Renaissance helped form Canada but also how more significantly the experience of Canada touched the Renaissance and those who first came to the shores of North America **A Politics of All** Dean

Caivano, 2024-04-08 No historical figure is more synonymous with establishing American democracy than Thomas Jefferson Revolutionary iconoclastic yet pragmatic the legacy of Jefferson as an intellectual and politician continues to reverberate across academic and public circles However Jefferson's writings on power authority and politics point to a different understanding of self government than dominant liberal and republican interpretations suggest Dean Caivano's interpretation of Jefferson's political anthropological and sociological meditations on power reveals an unknown Jefferson who conceives the American nation state as a network of dynamic autonomous communities enacted by a politics of all Caivano pointedly argues that this unknown Jefferson fittingly aligns with historical and contemporary projects of radical democracy stressing the need for constant resistance inquiry and dialogue In a period fraught with political division and hyper partisanship this timely innovative reading of Jefferson invites a reappraisal of how we understand a vital founder of the American republic and what is at stake in the battle to save American democracy **Natural Science and the Origins of the British Empire** Sarah Irving, 2015-09-30 Represents a history of the British Empire that takes account of the sense of empire as intellectual as well as geographic dominion the historiography of the British Empire with its preoccupation of empire as geographically unchallenged sovereignty overlooks the idea of empire as intellectual dominion **Nature and Space** Sarah Menin, Flora Samuel, 2003 By assessing the historical personal and intellectual influences of two of the greatest figures in modern architecture Le Corbusier and Alvar Aalto this study offers an understanding about the diversity at the heart of modernism **Magical Realism and the History of the Emotions in Latin America** Jerónimo

Arellano, 2015-05-21 Iconoclastic in spirit *Magical Realism and the History of the Emotions in Latin America* is the first study of affect and emotion in magical realist literature Against the grain of a vast body of scholarship it argues that magical realism is neither exotic commodity nor postcolonial resistance but an art form fueled by a search for spaces of wonder in a disenchanted world Linking the rise and fall of magical realism and kindred narrative forms to the shifting value of wonder as an emotional experience this thought provoking study proposes a radical new approach to canonical novels such as *One Hundred Years of Solitude* Received as one of the most convincing manifestations of the turn to affect in contemporary Latin American critical thought *Magical Realism and the History of the Emotions* draws on affect theory the history of emotions and new materialism to reframe key questions in Latin American literature and culture *Nature, Action and the Future* Katrina Forrester, Sophie Smith, 2018-01-25 Leading scholars of political thought demonstrate how the history of political ideas makes sense of environmental politics and climate change *Avenging Nature* Eduardo Valls Oyarzun, Rebeca

Gualberto Valverde, Noelia Malla Garcia, María Colom Jiménez, Rebeca Cordero Sánchez, 2020-09-28 Nature thou art my goddess Edmund's bold assertion in King Lear could easily inspire and at the same time function as a lamentation of the inadequate respect of nature in culture In this volume international experts provide multidisciplinary exploration of the insubordinate representations of nature in modern and contemporary literature and art The work foregrounds the need to reassess how nature is already and has been for a while striking back against human domination From the perspective of literary studies art history media studies ethics and philosophy and ethnology and anthropology Avenging Nature highlights the need of assessing insurgent discourses that converging with counter discourses of race gender or class realize the empowerment of nature from its subaltern position Acknowledging the argument that cultural representations of nature establish a relationship of domination and exploitation of human discourse over nonhuman reality and that in consequence our regard for nature as humanist critics is instrumental and anthropocentric the present volume advocates for the view that the time has come to finally perceive nature's vengeance and to critically probe into nature's ongoing revenge against the exploitation of culture

Making Nature Sacred John Gatta, 2004-10-14 Since colonial times the sense of encountering an unseen transcendental Presence within the natural world has been a characteristic motif in American literature and culture American writers have repeatedly perceived in nature something beyond itself and beyond themselves In this book John Gatta argues that the religious import of American environmental literature has yet to be fully recognized or understood Whatever their theology American writers have perennially construed the nonhuman world to be a source in Rachel Carson's words of something that takes us out of ourselves Making Nature Sacred explores how the quest for natural revelation has been pursued through successive phases of American literary and intellectual history And it shows how the imaginative challenge of reading landscapes has been influenced by biblical hermeneutics Though focused on adaptations of Judeo-Christian religious traditions it also samples Native American African American and Buddhist forms of ecospirituality It begins with Colonial New England writers such as Anne Bradstreet and Jonathan Edwards re-examines pivotal figures such as Henry Thoreau and John Muir and takes account of writings by Mary Austin Rachel Carson and many others along the way The book concludes with an assessment of the spiritual renaissance underway in current environmental writing as represented by five noteworthy poets and by authors such as Wendell Berry Annie Dillard Marilynne Robinson Peter Matthiessen and Barry Lopez This engaging study should appeal not only to students of literature but also to those interested in ethics and environmental studies religious studies and American cultural history

Nature's Burdens Daniel Nelson, 2017-05-15 Nature's Burdens is a political and intellectual history of American natural resource conservation from the 1980s into the twenty-first century a period of intense political turmoil shifting priorities among federal policymakers and changing ideas about the goals of conservation Telling a story of persistent activism conflict and frustration but also of striking achievement it is an account of how new ideas and policies regarding human relationships to plants animals and

their surroundings have become vital features of modern environmentalism In the 1960s and 1970s Congress embraced the largely dormant movement to preserve distinctive landscapes and the growing demand for outdoor recreation establishing an unprecedented number of parks monuments and recreation areas The election of Ronald Reagan and a shift to a Republican controlled Senate brought this activity to an abrupt halt and introduced a period of intense partisanship and legislative gridlock that extends to the present In this political climate three developments largely defined the role of conservation in contemporary society environmental organizations have struggled to defend the legal status quo private land conservation has become increasingly important and the emergence of potent scientific voices has promoted the protection of animals and plants and injected a new sense of urgency into the larger cause These developments mark this period as a distinctive and important chapter in the history of American conservation Scrupulously researched scientifically and politically well informed concise and accessibly written *Nature's Burdens* is the most comprehensive examination of recent efforts to protect and enhance the natural world It will be of interest to environmental historians environmental activists and any general reader interested in conservation

The Scorpion and the Frog: a Natural Conspiracy William A. Borst, 2004-11-22 To deny that conspiracies exist is to deny history While there are several chapters on traditional conspirators from the Masons through the Bilderbergers the book unveils the ideas that have unified conspiracies into a coherent rendition of evil This book is an intellectual history of the City of God versus the City of Man in the ultimate culture war It does not take a cadre of men in some secret room to effect a unified conspiracy Like the scorpion in the fable their ideas become second nature to liberals socialists or communists and they act in accordance with their nature

Time and Space Maria do Rosário Monteiro, Mário S. Ming Kong, Maria João Pereira Neto, 2023-11-09 The texts presented in *Proportion Harmonies and Identities PHI* Time and Space were compiled to establish a multidisciplinary platform for presenting interacting and disseminating research It also aims to foster awareness and discussion on Time and Space focusing on different visions relevant to Architecture Arts and Humanities Design and Social Sciences and its importance and benefits for the sense of identity both individual and communal The idea of Time and Space has been a powerful motor for development since the Western Early Modern Age Its theoretical and practical foundations have become the working tools of scientists philosophers and artists who seek strategies and policies to accelerate the development process in different contexts

Nature, Human Nature, and Human

Difference Justin Smith-Ruii,2017-03-14 People have always been xenophobic but an explicit philosophical and scientific view of human racial difference only began to emerge during the modern period Why and how did this happen Surveying a range of philosophical and natural scientific texts dating from the Spanish Renaissance to the German Enlightenment *Nature Human Nature and Human Difference* charts the evolution of the modern concept of race and shows that natural philosophy particularly efforts to taxonomize and to order nature played a crucial role Smith demonstrates how the denial of moral equality between Europeans and non Europeans resulted from converging philosophical and scientific developments including a declining belief in human nature s universality and the rise of biological classification The racial typing of human beings grew from the need to understand humanity within an all encompassing system of nature alongside plants minerals primates and other animals While racial difference as seen through science did not arise in order to justify the enslavement of people it became a rationalization and buttress for the practices of trans Atlantic slavery From the work of Fran ois Bernier to G W Leibniz Immanuel Kant and others Smith delves into philosophy s part in the legacy and damages of modern racism With a broad narrative stretching over two centuries *Nature Human Nature and Human Difference* takes a critical historical look at how the racial categories that we divide ourselves into came into being [God's Autopsy and the Living Truth of Soul](#) Hal Childs,2022-08-22 The Grand Narrative of Christianity that the Bible created is dead and the Bible is silent Does the Bible have anything relevant to say to our modern circumstances We ask where did God come from What happened to God God s Autopsy reinterprets soul and God as historical psychological phenomena related to the cultural structure of consciousness the invisible shared context of thought which has changed dramatically over the past three millennia This book offers a new way to understand the trajectory of Western civilization by making the implicit foundation of Western consciousness soul visible and conscious Our modern Western consciousness is radically different from that of antiquity when the Bible emerged Jung s psychological philosophical insight that whenever we speak about the psyche it is the psyche speaking about itself leads to the realization that today consciousness has come home to itself Beginning with preliterate polytheism the emergence of the transcendent god Yahweh and Christ which led directly to the Enlightenment objective soul continues to unfold itself How did late modernity become a topsy turvy quantum virtual digital impersonal and abstract world that appears to be running away from us The answer is unexpectedly and shockingly in the Bible itself [Assimilating the Primitive](#) Kelley R. Swarthout,2004 This book examines the Mexican nationalist rhetoric that promoted race mixing as a cultural ideal placing it within its broader contemporary polemic between vitalist and scientific thought Part of its analysis compares the attitudes of anthropologist Manuel Gamio and educator Jos Vasconcelos with those of the European primitivist D H Lawrence and concludes that although Gamio and Vasconcelos made lasting contributions to the construction of popular notions of mexicanidad their paradigms were fatally flawed because they followed European prescriptions for the development of national identity This ultimately reinforced the belief that indigenous cultural expression must be assimilated

into the dominant mestizo culture in order for Mexico to progress Consequently these thinkers were unsuccessful in resolving the cultural dilemma Mexico suffered in the years immediately following the Revolution Everlasting Arts and Sciences Bassey Effiong Orok,2013 Written by a seasoned Prophet and reputable Spiritual Scientist His Lordship Bishop Bassey Effiong Orok Everlasting Arts and Sciences volume 1 unveils more than 3000 secrets of the universe natures souls destinies spirits man earth and its components and creatures The manner the earth was created road leading to it the top secret and controlling agents of most dangerous sicknesses and transferring key of creatures from one portion of the universe to another is here unveiled The true composition contents and natural tradition of man star water soil as well as the universal symbol of air and the demarcation of the sky as linked to humanity are among the secrets revealed Also unveiled is how the various satellites mounted by man in space will be dismantled by the Supernatural Power of the Universe The true colours of fire and its last day operation is fact humanity should know The most deadly fruit most dangerous and sensitive parts in human body as well as the several conditions of the earth are also unveiled The center of the earth is identified in this book and shocking among other unveiling top secrets is the true colour of Adam and Eve our first parents and that of Cain and Abel with their twin sisters Shadow woman s menstrual period human face hair teeth tongue and the brain are also among the unveiling mysteries in this book It is a book for all races tongues nations and colours of this last generation

Garden & Home Builder William Tyler Miller,1916 **The Neo Communist Manifesto** Filip Spagnoli,2010 Does communism against all odds have something useful to contribute to the pressing debate over economic strength societal well being and humanity versus the corporation There are some elements of communist theory that deserve to be rescued from the proverbial dustbin and that is the purpose of this book This however requires a substantial rethinking of communism a drafting of a kind of neo communism from which everything that is impossible and or undesirable is deleted This book differs from other books on communism such as *The Passing of an Illusion* by Furet or *The Black Book of Communism* by Courtois et al in that it is not a historical account of the the communist experience in some parts of the world This book examines the original theory and worldview presented by and finds interesting clues to how we might tackle some of the problems that are still inherent in today s capitalist mode of production and work *Toward a More Natural Science* Leon R. Kass,2008-06-30 Kass shows how the promise and the peril of our time are inextricably linked with the promise and the peril of modern science The relation between the pursuit of knowledge and the conduct of life between science and ethics each broadly conceived has in recent years been greatly complicated by developments in the science of life This book examines the ethical questions involved in prenatal screening in vitro fertilization artificial life forms and medical care and discusses the role of human beings in nature *Transatlantic Travels in Nineteenth-Century Latin America* Adriana Méndez Rodenas,2013-12-12 *Transatlantic Travels in Nineteenth Century Latin America* European Women Pilgrims retraces the steps of five intrepid lady travelers who ventured into the geography of the New World Mexico the Southern Cone Brazil and the Caribbean at a crucial

historical juncture the period of political anarchy following the break from Spain and the rise of modernity at the turn of the twentieth century Traveling as historians social critics ethnographers and artists Frances Erskine Inglis 1806 82 Maria Graham 1785 1842 Flora Tristan 1803 44 Fredrika Bremer 1801 65 and Adela Breton 1849 1923 reshaped the map of nineteenth century Latin America Organized by themes rather than by individual authors this book examines European women s travels as a spectrum of narrative discourses ranging from natural history history and ethnography Women s social condition becomes a focal point of their travels By combining diverse genres and perspectives women s travel writing ushers a new vision of post independence societies The trope of pilgrimage conditions the female travel experience which suggests both the meta end of the journey as well as the broader cultural frame shaping their individual itineraries
