Nature In The Urban Landscape A Study Of City Ecosystems:

Nature in the Urban Landscape Don Gill, Penelope Bonnett, 1973 A discussion of city ecosystems planning for urban wildlife and management of urban wildlife habitats Studies on Los Angeles and its coyotes and London and its wildlife habitats are described **EPA-600/5** , 1974-02 Natura Urbana Matthew Gandy, 2022-03-08 A study of urban nature that draws together different strands of urban ecology as well as insights derived from feminist posthuman and postcolonial thought Postindustrial transitions and changing cultures of nature have produced an unprecedented degree of fascination with urban biodiversity The other nature that flourishes in marginal urban spaces at one remove from the controlled contours of metropolitan nature is not the poor relation of rural flora and fauna Indeed these islands of biodiversity underline the porosity of the distinction between urban and rural In *Natura Urbana* Matthew Gandy explores urban nature as a multilayered material and symbolic entity through the lens of urban ecology and the parallel study of diverse cultures of nature at a global scale Gandy examines the articulation of alternative and in some cases counterhegemonic sources of knowledge about urban nature produced by artists writers scientists as well as curious citizens including voices seldom heard in environmental discourse The book is driven by Gandy's fascination with spontaneous forms of urban nature ranging from postindustrial wastelands brimming with life to the return of such predators as wolves and leopards on the urban fringe Gandy develops a critical synthesis between different strands of urban ecology and considers whether urban political ecology broadly defined might be imaginatively extended to take fuller account of both the historiography of the ecological sciences and recent insights derived from feminist posthuman and postcolonial thought **The Routledge Handbook of Urban Ecology** Ian Douglas, P M L Anderson, David Goode, Michael C. Houck, David Maddox, Harini Nagendra, Puay Yok Tan, 2020-12-15 This second edition covers recent developments around the world with contributors from 33 different countries It widens the handbook's scope by including ecological design consideration of cultural dimensions of the use and conservation of urban nature the roles of government and civil society and the continuing issues of equity and fairness in access to urban greenspaces New features include an emphasis on the biophilic design of homes and workplaces demonstrating the value of nature in order to counter the still prevalent attitude among many developers that nature is a constraint rather than a value The volume explores great practical achievements that have occurred since the first edition with many governments increasingly recognizing and legislating on urban nature and green infrastructure matters since cities play a major role in adapting to change particularly to climate crisis New topics such as the ecological role of light at night and human microbiota in the urban ecosystem are introduced Additional attention is given to food production in cities particularly the multiple roles of urban agriculture and household gardens in different contexts from wealthy communities to the poorest informal settlements in deprived communities The emphasis is on demonstrating what can be achieved and what is already being done The book aims to help scholars and graduate students by providing an invaluable and up to date guide

to current urban ecological thinking across the range of disciplines such as geography ecology environmental science studies planning and urban studies that converge in the study of towns and cities and urban design and living It will also assist practitioners and civil society members in discovering the ways different specialists and thinkers approach urban nature

A Changing Environment for Human Security Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice *Urban Ecology*

John Marzluff, Eric Shulenberg, Wilfried Endlicher, Marina Alberti, Gordon Bradley, Clare Ryan, Craig ZumBrunnen, Ute Simon, 2008-01-03 Urban Ecology is a rapidly growing field of academic and practical significance Urban ecologists have published several conference proceedings and regularly contribute to the ecological architectural planning and geography literature However important papers in the field that set the foundation for the discipline and illustrate modern approaches from a variety of perspectives and regions of the world have not been collected in a single accessible book Foundations of Urban Ecology does this by reprinting important European and American publications filling gaps in the published literature with a few targeted original works and translating key works originally published in German This edited volume will provide students and professionals with a rich background in all facets of urban ecology The editors emphasize the drivers patterns processes and effects of human settlement The papers they synthesize provide readers with a broad understanding of the local and global aspects of settlement through traditional natural and social science lenses This interdisciplinary vision gives the reader a comprehensive view of the urban ecosystem by introducing drivers patterns processes and effects of human settlements and the relationships between humans and other animals plants ecosystem processes and abiotic conditions The reader learns how human institutions health and preferences influence and are influenced by the others members of their shared urban ecosystem **Urban Landscapes in High-Density Cities** Bianca Maria Rinaldi, Puay Yok Tan, 2019-06-04

The positive effects of urban green spaces are well known ranging from the promotion of health support of biodiversity to

climate regulation However the practical implementation of urban landscapes is less discussed How can we make these spaces functional economically feasible and inclusive especially as cities become more diverse The publication explores strategies to reconcile the various demands such as food production resilience and nature conservation Indeed urban landscapes have to be restorative ecological and aesthetically pleasing at the same time This is a particular challenge in high density cities like Singapore Seoul or New York where space is a scarce commodity The continuing growth of the worldwide urban population imbues the topic with a special urgency

Routledge Handbook of Urban Landscape Research Kate Bishop, Linda Corkery, 2022-12-27 Landscape architecture is one of the key professions dedicated to making cities hospitable and healthy places to live work and play while respecting and enhancing the natural environments and landscapes we inhabit This edited collection presents current writing about the pivotal roles that landscape architects play in addressing some of the most pressing problems facing the planet its environments and its populations through their research analysis and speculative practice The book has assembled current writings on recent research structured around five major themes governance power and partnership infrastructure systems and performance environment resilience and climate change people place and design and culture heritage and identity As a collection the chapters demonstrate the diversity of themes and topics that are expanding the scholarly body of knowledge for the discipline and its relevance to the practice of landscape architecture The contributors to this book are academic researchers and practitioners from the discipline of landscape architecture The chapters draw on their research teaching and experience as well as analysis of project examples Fifty two contributors from the United States United Kingdom Sweden Denmark the Netherlands Nigeria Malaysia Spain Colombia Australia New Zealand and Canada discuss a diverse range of contemporary themes in urban landscape architecture Collectively the contributors demonstrate the breadth of experience shared concerns and distinct issues that challenge urban landscape architecture and cities in the 21st century

Integrating Ecology and Poverty Reduction Jane Carter Ingram, Fabrice DeClerck, Cristina Rumbaitis del Rio, 2011-11-25 The second volume of this series Integrating Ecology into Global Poverty Reduction Efforts Opportunities and solutions builds upon the first volume Integrating Ecology into Global Poverty Reduction Efforts The ecological dimensions to poverty by exploring the way in which ecological science and tools can be applied to address major development challenges associated with rural poverty In volume 2 we explore how ecological principles and practices can be integrated conceptually and practically into social economic and political norms and processes to positively influence poverty and the environment upon which humans depend Specifically these chapters explore how ecological science approaches and considerations can be leveraged to enhance the positive impacts of education gender relations demographics markets and governance on poverty reduction As the final chapter on The future and evolving role of ecological science points out sustainable development must be built upon an ecological foundation if it is to be realized The chapters in this volume illustrate how traditional paradigms and forces guiding development can be steered

along more sustainable trajectories by utilizing ecological science to inform project planning policy development market development and decision making

Understanding Urban Ecosystems Alan R. Berkowitz, Charles H. Nilon, Karen S. Hollweg, 2006-05-29 Nowhere on Earth is the challenge for ecological understanding greater and yet more urgent than in those parts of the globe where human activity is most intense cities People need to understand how cities work as ecological systems so they can take control of the vital links between human actions and environmental quality and work for an ecologically and economically sustainable future An ecosystem approach integrates biological physical and social factors and embraces historical and geographical dimensions providing our best hope for coping with the complexity of cities This book is a first of its kind effort to bring together leaders in the biological physical and social dimensions of urban ecosystem research with leading education researchers administrators and practitioners to show how an understanding of urban ecosystems is vital for urban dwellers to grasp the fundamentals of ecological and environmental science and to understand their own environment
