Nature Intelligibility And Metaphysics Studies In The Philosophy Of F J E:

Nature, Intelligibility and Metaphysics Hae Soo Pyun, 1972-01-01 **John Dewey's Aesthetic Philosophy** Philip M. Zeltner, 1975-01-01 E.A. Burtt, Historian and Philosopher D. Villemaire, 2002-02-28 Here is a much needed study of the American historian and philosopher E A Burtt H Floris Cohen author of *The Scientific Revolution A Historiography* has described Burtt as an individual thinker beyond philosophical or historical currents or fashion Burtt s book *The Metaphysical Foundations of Modern Physical Science* is something of a puzzle within the context of twentieth century intellectual history especially American intellectual history Burtt s pioneering study of the scientific revolution has proved to prophetic in its rejection of both scientism and positivism Published in 1924 Burtt s book continues to be read in educated circles and remains both the rose and the thorn on university reading lists raising skeptical questions about science methods and science knowledge just as it did seventy five years ago This book examines Burtt s public academic and personal life From his politics of conscience after World War I on through the Cold War Burtt is shown to be a man of unparalleled integrity whose relentless search for philosophic understanding drove his more quixotic philosophical quests and steered his personal life including its tragic dimension toward simple virtue The many who have been affected by *The Metaphysical Foundations* will be especially interested in this new perspective on the life and thought of its author Those who have not read Burtt s books might be inspired to study this unusual American thinker **Indian Philosophy Since Independence** Dale Maurice Riepe, 1979-01-01 This concludes the first volume of *Indian Philosophy Since Independence* the second volume includes the following chapters P iv v 1 **History of Mind: Studies in the Philosophy of Simo Knuuttila** Ritva Palmén, José Filipe Silva, 2024-12-02 Simo Knuuttila was an influential philosopher theologian and historian of philosophy who conducted research on a variety of topics including modalities emotions perception and change in different historical periods from Ancient to Modern His contribution to the study of modalities and emotions was groundbreaking and trendsetting with a lasting impact on the area In this volume a group of international scholars all of whom worked directly with Knuuttila elaborate on some of those topics trying to understand the core interpretative ideas the polemical aspects and how to develop those interpretations in different authors and or conceptual frameworks The result is an unique volume that presents a broad range of perspectives on key topics in the history of philosophy in the last decades both influenced and challenging the interpretations advocated by Knuuttila *Explorations in Philosophy and Society* Charles Cunneen, 1978-01-01 The Phenomenology of Charles S. Peirce William L. Rosensohn, 1974-01-01 *Crisis and Consciousness* Ralph M. Faris, 1977-01-01 **Spinoza In English, A Bibliography** Wayne Boucher, 1999-06-15 *Spinoza in English* i is the first bibliography to document the entire 300 year record of books monographs dissertations and articles in English on Benedict Spinoza as well as all translations of his works into English Arranged alphabetically by author or editor and internally cross referenced in the case of anthologies and replies this bibliography cites its own sources where appropriate and in many cases

provides details on how to obtain out of print titles and unpublished dissertations. Additionally, it restores or corrects a good deal of earlier bibliographic detail and beginning with titles from the mid 1800s presents the citations in a uniform style. This second edition adds hundreds of citations including dozens of titles hitherto overlooked, thus bringing the total to nearly 2700 on the main level with hundreds of secondary references to later editions and reprints. It also provides an index and occasionally an abstract when the author's title inadequately describes the contents. As the only source of its kind, this bibliography is an indispensable reference tool for research libraries and individual scholars concerned with the life and works of Spinoza. Wayne Boucher's introduction is augmented by a preface by Professor Manfred Walther, the most complete bibliography of works in English on Spinoza, enlarged, corrected, and improved from the first edition with numbered entries uniquely comprehensive, current, and authoritative, numbered entries, and subject title index for easy reference.

Metaphysics and Philosophy of Science in the Seventeenth and Eighteenth Centuries R.S. Woolhouse, 1988-10-31

The essays in this collection have been written for Gerd Buchdahl by colleagues, students, and friends and are self-standing pieces of original research which have as their main concern the metaphysics and philosophy of science of the seventeenth and eighteenth centuries. They focus on issues about the development of philosophical and scientific thought which are raised by or in the work of such as Bernoulli, Descartes, Galileo, Kant, Leibniz, Maclaurin, Priestly, Schelling, Vico. Apart from the initial bio-bibliographical piece and those by Robert Butts and Michael Power, they do not discuss Buchdahl or his ideas in any systematic, lengthy, or detailed way. But they are collected under a title which alludes to the book *Metaphysics and the Philosophy of Science: The Classical Origins* by Descartes to Kant, 1969, which is central in the corpus of his work and deal with the period and some of the topics with which that book deals.

T&T Clark Handbook of Christian Theology and the Modern Sciences John P. Slattery, 2020-10-01

This handbook surveys the many relationships between scientific studies of the world around us and Christian concepts of the Divine from the ancient Greeks to modern ecotheology. From Augustine to Hildegard of Bingen, Genesis to Frederick Douglass, and physics to sociology, this volume opens the intersections of Christian theology and science to new concepts, voices, and futures. The central goal of the handbook is to bring new perspectives to the foreground of Christian theological engagement with science and to highlight the many engagements today that are not often identified as science-theology discussions. The handbook thus includes several aspects not found in previous handbooks on the same topic: significant representation from the three major branches of Christianity (Orthodox, Roman Catholic, and Protestant); multiple essays on areas of modern science not traditionally part of the theology and science dialogue, such as discussions of race, medicine, and sociology; a collection of essays on historical theologians' approaches to nature and science; T, Catholic, Protestant, and Orthodox surveys of theology.
