Nature Of The World An Essay In Phenomenalist Metaphysics:

The Nature of the World Walter Terence Stace,1940 **Russell's Theory of Perception** Sajahan Miah,2006-05-30 In Russell s Theory of Perception Sajahan Miah re examines and evaluates the development of Russell s concept of perception and the relation of perception to our knowledge of the external world With the introduction of logical construction in which physical objects are constructed from actual and possible sense data Russell s theory of perception seems to become a causal theory with phenomenalist overtones The book argues that there is a consistency of purpose and direction which motivated Russell to introduce logical construction The purpose was to strike a compromise between his empiricism and his realism and to establish a bridge between the objects of perception and the objects of physics and common sense *Mystical Encounters with the Natural World* Paul Marshall,2005-07-07 Some experiences of the natural world bring a sense of unity knowledge self transcendence eternity light and love This is the first detailed study of these intriguing phenomena Paul Marshall explores the circumstances characteristics and after effects of this important but relatively neglected type of mystical experience and critiques explanations that range from the spiritual and metaphysical to the psychoanalytic contextual and neuropsychological The theorists discussed include R M Bucke Edward Carpenter W R Inge Evelyn Underhill Rudolf Otto Sigmund Freud Aldous Huxley R C Zaehner W T Stace Steven Katz and Robert Forman as well as contemporary neuroscientists The book makes a significant contribution to current debates about the nature of mystical experience *The Bloomsbury Encyclopedia of Philosophers in America* John R. Shook,2016-02-11 For scholars working on almost any aspect of American thought The Bloomsbury Encyclopedia to Philosophers in America presents an indispensable reference work Selecting over 700 figures from the Dictionary of Early American Philosophers and the Dictionary of Modern American Philosophers this condensed edition includes key contributors to philosophical thought From 1600 to the present day entries cover psychology pedagogy sociology anthropology education theology and political science before these disciplines came to be considered distinct from philosophy Clear and accessible each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading Featuring a new preface by the editor and a comprehensive introduction The Bloomsbury Encyclopedia to Philosophers in America includes 30 new entries on twenty first century thinkers including Martha Nussbaum and Patricia Churchland With in depth overviews of Waldo Emerson Margaret Fuller Noah Porter Frederick Rauch Benjamin Franklin Thomas Paine and Thomas Jefferson this is an invaluable one stop research volume to understanding leading figures in American thought and the development of American intellectual history **Austin Farrer for Today** Richard Harries,Stephen Platten,2020-09-30 Assessing his continuing importance and introducing him to a new generation of readers Austin Farrer for Today brings together a stellar collection of writers to reflect on Farrer s contribution to biblical theology philosophy language doctrine prayer and preaching [African Perspectives on Global Development](#) Mahmoud Masaeli,Rico Sneller,2019-01-22 Africa is not merely

an invention with a modern imperial or colonial background Nor is it simply a continent in need of foreign aid from the richer more affluent societies Africa might be economically needy politically unstable and in part socially chaotic and suffering from civil wars and social unrest However the continent and its peoples are certainly different from the negative image portrayed in the mass media Africa had been the cradle of civilization in the pre colonial era and is today undergoing a diverse cultural philosophical and spiritual development with great potential contributing to contemporary debates around the ethics of globality The novelty of this book derives from its multidisciplinary approach Although the authors generally come from the fields of development and economics global studies political science philosophy and ethics and sociology they present Africa s alternative view of human wellbeing in order to provide theories and policy recommendations which inspire the specific developmental patterns for the growth of the continent The volume discusses the meaning of development for the continent by drawing on culture identity ethnicity and philosophy of nature The contributors examine a variety of issues and themes directly related to the opportunities provided by globality to promote the development of the continent They also discuss solutions for underdevelopment and poverty and how those perspectives might be effectively integrated into the global agenda for the development of Africa

Becoming Bamboo Robert Edgar Carter,1992 The many problems we face in today s world among them war environmental destruction religious and racial intolerance and inappropriate technologies demand that we carefully re evaluate such issues as our relation to the environment the nature of progress ultimate purposes and human values These are all issues Robert Carter explains that are intimately linked to our perception of life s meaning While many books discuss life s meaning either analytically or prescriptively Carter addresses values and ways of meaningful living from a broader perspective using Japanese philosophy to augment his investigation He examines Martin Heidegger s distinction between dwelling and existing in the world Lawrence Kohlberg s stage seven of human moral development and the works of Viktor Frankl Carol Gilligan and Nel Noddings He applies hermeneutic and deconstructionist theory to the question of meaning and explores the feminist contribution to ethics and its relation to the interconnectedness of things celebrated in Zen and Shinto thought Bridging various dichotomies such as East West reason emotion male female and caring justice Carter shows that ethics environmental concern caring and joy in living are dependent on the growth and transformation of the self Only by becoming aware of the interrelatedness of things Carter reveals can we become as supple and as strong as the bamboo tree long the symbol of longevity and constancy
