## **Nature Reality And The Sacred The Nexus Of Science And Religion:**

*Nature, Reality, and the Sacred* Langdon Gilkey, 1993      *Nature, Reality, and the Sacred* Langdon Gilkey, 1993 Two partial apprehensions of nature vied for dominance in the past century religious void of any influence from science and scientific unable to admit any reality beyond the empirical Both views have led to the exploitation of nature and the scientific may prove even more devastating The fault Gilkey argues lies not in the scientific knowledge of nature but in the assumed philosophy of science that accompanies most scientific and technological practice Scientific knowing needs to be critiqued and brought into relationship with other complementary ways of knowing      Earth-honoring Faith Larry L. Rasmussen, 2015-04-01 Grand Winner of the 2014 Nautilus Book Awards Thoughtful observers agree that the planetary crisis we now face climate change species extinction the destruction of entire ecosystems the urgent need for a more just economic political order is pushing human civilization to a radical turning point change or perish But precisely how to change remains an open question In *Earth honoring Faith* Larry Rasmussen answers that question with a dramatically new way of thinking about human society ethics and the ongoing health of our planet Rejecting the modern assumption that morality applies to human society alone Rasmussen insists that we must derive a spiritual and ecological ethic that accounts for the well being of all creation as well as the primal elements upon which it depends earth air fire water and sunlight He argues that good science necessary as it is will not be enough to inspire fundamental change We must draw on religious resources as well to make the difficult transition from an industrial technological age obsessed with consumption to an ecological age that restores wise stewardship of all life *Earth honoring Faith* advocates an alliance of spirituality and ecology in which the material requirements for planetary life are reconciled with deep traditions of spirituality across religions traditions that include mysticism sacramentalism prophetic practices asceticism and the cultivation of wisdom It is these shared spiritual practices that can produce a chorus of world faiths to counter the consumerism utilitarianism alienation oppression and folly that have pushed us to the brink Written with passionate commitment and deep insight *Earth honoring Faith* reminds us that we must live in the present with the knowledge that the eyes of future generations will look back at us      *Theology for a Scientific Age* Arthur Robert Peacocke, 1993 This second expanded edition of Arthur Peacocke's seminal work now includes the author's Gifford Lectures as well as a new part three in which he deals roundly with the central corpus of Christian belief for a scientific age Distinctively theological commitments are being rethought in light of scientific apprehensions of nature Ted Peters Zygon      **A Liberation Theology of the Brain** Carmelo Santos-Rolón, 2025-06-10 Drawing on experiences from the lab the local congregation the immigrant rights movement the university classroom the global church and brain science this book invites readers to discover the transformative possibilities that arise when we recognize that the insights of science and theology can complement and transform each other Brain science and theology can be powerful partners in God's work of liberating all of us from the internalized structures of oppression that colonize imaginations imprison emotions subjugate

bodies and fracture societies Trained as a scientist a pastor and a theologian Carmelo Santos Rol n brings together insights from various fields in neuroscience and the cognitive sciences such as the neuroscience of religious experience the neuroscience of emotions the cognitive science of religion and the neuroscience of decision making with data from liberation postcolonial decolonial and Lutheran ecumenical theologies to analyze the spiritual experience of holistic liberation The result is a theological framework informed by science that allows us to appreciate how the Spirit of God is at work in with and under neurons bodies and communities in all their beautiful messiness and complexity In the tradition of liberation theologies which insist that action and reflection belong together and must inform each other this book aims at a theology with dirty hands and worn out shoes It is meant for a people who are not just intellectually curious about who God is and how religion affects our brains but who are eager to join in God s work of bringing healing and hope to a wounded world Theology and neuro science together allow us to witness how the Spirit of God is at work deep inside the nooks and crannies of our brains in the chemistry of our nervous systems in the emotions that orient our actions and in the communities that shape our identities Through tangible means such as words and rituals symbols and narratives sacraments and community God liberates us for lives of meaning and purpose at the service of the beautiful future that God is bringing into being

**Nature, reality, and the sacred** Langdon Gilkey,1989      **Who Guards the Guardians?** Peter Raine,2003 This book attempts to link ecology philosophy and theology through an exploration of a new model of intercultural dialogue Case studies provide practical and theoretical applications which lead to a deeper understanding of not only environmental guardianships but also the fundamental relationship between human beings and nature s being      Dusty Earthlings John Mustol,2018-01-01 The Lord God formed a man from the dust of the ground Genesis 2 7 Made of dust we humans are thoroughly physical beings We are dusty earthlings As such we are also ecological beings or rather eco physical beings firmly embedded in and dependent upon God s earthly ecosystems which support and provide for us and constitute our earthly home Today we are living in ways that are damaging our home As Christian dusty earthlings we are called to oversee God s earthly creation and to follow Jesus Christ God incarnated as a dusty earthling How do we do this in the face of the array of ecological problems we face today How can we obey the ecological principles and limits that govern all of life on God s good earth Mustol argues that the virtues of humility voluntary self limitation and the principles of kenosis and justice will help as we seek to follow Jesus as dusty earthlings in today s world      **Theologies of Creation** Thomas Jay Oord,2014-10-02 Humans have long wondered about the origin of the universe And such questions are especially alive today as physicists offer metaphysical theories to account for the emergence of creation Theists have attributed the universe s origin to divine activity and many have said God created something from absolute nothingness The venerable doctrine of creatio ex nihilo especially emphasizes God s initial creating activity Some contributors to this book explore new reasons creatio ex nihilo should continue to be embraced today But other contributors question the viability of creation from nothing and offer alternative

initial creation options in its place These new alternatives explore a variety of options in light of recent scientific work new biblical scholarship and both new and old theological traditions      **Human Cloning** Ronald Cole-Turner,1997-01-01 Is human cloning equal to playing God Is the technology despite being scientifically exciting a moral option in our world In this volume Ronald Cole Turner gathers twelve nontechnical and highly accessible essays that explore this controversial subject

**Biodiversity Conservation Ethics in Major Religions** H. S. A. Yahya,2010-10 Covering three broader issues biodiversity conservation religious doctrine and environment the book Biodiversity Conservation Ethics in Major Religions is the result of a unique approach It attempts to initiate scientific discourse through the fabric of religions Spread across 15 chapters the book covers the essence of 10 religions on biodiversity encompassing a wide range of issues related to conservation The book promises to be a useful resource for biodiversity students researchers and protected area managers and also for religious scholars who are invited to look at the broader themes of religions beyond theology      *God and Passion in Kierkegaard's Climacus* Johannes Corrodi Katzenstein,2007 Johannes Corrodi Katzenstein offers a contribution to the current debate on Kierkegaard mostly concerning the rationality of religious belief and the presumed religious neutrality autonomy of philosophical and scientific thought More specifically his book is an attempt to relate Kierkegaard s theory of the stages of life aesthetic ethical religious to issues that have been of utmost concern to Anglo American analytical philosophy such as the nature of truth rational knowledge objectivity etc From this angle Kierkegaard turns out to be not the irrationalist he has often been made into but rather the outspoken witness of a passion that guides all thinking i e the passion to think what cannot be thought An attempt is made to show that for Kierkegaard anticipating some of the arguments of contemporary postsecular philosophy the ideal of pure or autonomous reason inevitably has its basis in a pre rational often tacit commitment to an origin whose primary home is in religious faith Rather than precluding dialogue awareness of these deeper forces and starting points of our various philosophical and scientific outlooks is a critical requirement for mutual understanding between secularist and religious perspectives and traditions competing for cultural and political dominance

**Spiritual Insights From The New Science: Complex Systems And Life** Raima Larter,2021-05-05 Spiritual Insights from the New Science is a guide to the deep spiritual wisdom drawn from one of the newest areas of science the study of complex systems The author a former research scientist with over three decades of experience in the field of complexity science tells her story of being attracted as a young student to the study of self organizing systems where she encountered the strange and beautiful topics of chaos fractals and other concepts that comprise complexity science Using the events of her life she describes lessons drawn from this science that provide insights into not only her own life but all our lives These insights show us how to weather the often disruptive events we all experience when growing and changing The book goes on to explore through the unfolding story of the author s life as a practicing scientist other key concepts from the science of complex systems cycles and rhythms attractors and bifurcations chaos fractals self organization and emergence Examples

drawn from religious rituals dance philosophical teachings mysticism native American spirituality and other sources are used to illustrate how these scientific insights apply to all aspects of life especially the spiritual Spiritual Insights from the New Science shows the links between this new science and our human spirituality and presents in engaging accessible language the argument that the study of nature can lead to a better understanding of the deepest meaning of our lives **The Lure of the Edge** Brenda Denzler,2001 Publisher Fact Sheet A guided tour through the complex world of the UFO abduction movement **T. F. Torrance** Alister E. McGrath,2006-03-23 T F Torrance is widely regarded as the most significant British academic theologian of the twentieth century He is especially noted for his ground breaking contribution to the study of the relationship of Christian theology and the natural sciences He is unquestionably one of the most prolific of theological writers and is the most senior member of the nearest thing to a theological dynasty that Great Britain has ever produced Here Alister McGrath himself one of this country s leading theologians traces the development of Torrance s theological thought and provides a comprehensive account of his life and career Particular attention is paid to the important role played by Torrance in the English language reception of the theology of Karl Barth and to his pioneering engagement with the relation between theology and science While making extensive reference to Torrance s published works McGrath also draws on important unpublished writings and private papers The book contains many unpublished photographs together with a complete bibliography of Torrance s works *A New Handbook of Christian Theologians* Donald W. Musser,1996-09-01 In recent years the flow of Christian theology has been channeled in diverse streams represented by such trends and movements as black theology liberation theology feminist theology and womanist theology To survey this abundance and diversity of current Christian theology this book examines the theologies of representative theologians Particularly to help students navigate the sea of information the editors have identified various routes for reading and have traced several threads or issues common to many of the essays thus demarcating such recurrent concerns as the ways in which the theologians consider the sources and goals for theology their variant assumptions and conclusions about the nature of God their divergent approaches to understanding the person and purpose of the Christ and their distinct expectations for the destiny of history and faith *Evil after Postmodernism* Jennifer Geddes,2013-01-11 These six essays form a stimulating and lucid investigation of the meaning of evil in the light of postmodern thought and of the cultural and social changes of the modern age They consider subjects such as the war in Bosnia AIDS and the Holocaust *Theology in Transposition* Myk Habets,2013-11-01 T F Torrance was one of the most significant English language theologians of the 20th century known extensively for his curatorship of the English translation of Barth s Church Dogmatics but also for his own prodigious theological scholarship The complexity and astonishing breadth of Torrance s output however have made assessment and appropriation markedly difficult This volume seeks to rectify that lack of assessment through careful exposition of the vital centers and interconnections within Torrance s theology alongside constructive appraisal and critique of his contributions to

contemporary theology      *All God's Creatures* Daniel P. Horan, 2020-07-07 The predominant stewardship model of creation is the result of an intentional effort to correct approaches that reinforce human sovereignty and the resulting environmental degradation However as *All God's Creatures* argues the stewardship model actually does not offer a correction but rather reinscribes many of the very same pitfalls After close analysis of the stewardship model this book identifies scriptural theological and philosophical sources to support the adoption of a community of creation paradigm Drawing on postcolonial theory this book proposes the concept of planetarity as a framework for conceiving the relationship between human and nonhuman creation and the Creator in a new way This theoretical framework is grounded by a retrieval of the medieval Franciscan theological and philosophical tradition The result is what can be called a postcolonial Franciscan theology of creation imagined in terms of planetarity providing a constructive and nonanthropocentric response to the need for a new conceptualization of the doctrine of creation      *Dark Religion* Vladislav Šolc ,George J. Didier, 2018-12-01 Jungian analysts Vlado Solc and George J Didier set out to explore the psychological dynamics and causes of religious fundamentalism and fanaticism The book offers an in depth psychological analysis of what happens when a person becomes possessed by the unconscious energies of the Self *Dark Religion* also reveals that spirituality is an inherent dimension of human life and one of its most essential needs It only becomes dark when it denies ignores or separates itself from its vital roots The authors coin the term dark religion to describe all forms of fanatical radical and extreme religions Their study shows how dark religion leads to profound conflicts on both the personal and cultural level including terrorism and wars surveys the vast contemporary cultural and religious landscapes All the while discovering the emergent forms of spiritual praxis in light of postmodernism and the rise of fundamentalism in the new millennium
