Nature As Architect:

Architecture Follows Nature-Biomimetic Principles for Innovative Design Ilaria Mazzoleni, 2013-03-21 Applying Properties of Animals Skins to Inspire Architectural Envelopes Biology influences design projects in many ways the related discipline is known as biomimetics or biomimicry Using the animal kingdom as a source of inspiration Ilaria Mazzoleni seeks to instill a shift in thinking about the application of biological principles to design and architecture She focuses on the analysis of how organisms have adapted to different environments and translates the learned principles into the built environment To illustrate the methodology Mazzoleni draws inspiration from the diversity of animal coverings referred to broadly as skin and applies them to the design of building envelopes through a series of twelve case studies Skin is a complex organ that performs a multitude of functions namely it serves as a link between the body and the environment Similarly building envelopes act as interfaces between their inhabitants and external elements The resulting architectural designs illustrate an integrative methodology that allows architecture to follow nature Ilaria Mazzoleni in collaboration with biologist Shauna Price has developed a profound methodology for architectural and design incentives that anticipates and proposes novel ways to explore undiscovered biological inspirations for various audiences Yoseph Bar Cohen *Nature's Architect* Jim Crumley, 2022-01-01 Sublime writing a genuinely important book Ken Lussey Hundreds of years after their extinction in these isles beavers are back in Britain These highly skilled engineers of the natural world have been reintroduced at several sites across the UK and even as they become established are already having a dramatic effect on our wild landscapes Here leading nature writer Jim Crumley reveals the pioneering lifestyle of these intriguing and secretive creatures and considers the ecological and economic impact of the beaver reintroductions Employing his trademark beautiful prose and empathy for life in the wild Crumley considers the future for Britain's beavers and makes the case for giving them their freedom

Design Ecologies Lisa Tilder, Beth Blotstein, 2012-03-20 Contemporary architects are under increasing pressure to offer a sustainable future But with all the focus on green building there has been little investigation into the meaningful connections between architectural design ecological systems and environmentalism A new generation of architects landscape architects designers and engineers aims to recalibrate what humans do in the world according to how the world works as a biophysical system Design in this sense is a larger concept having to do as much with politics and ethics as with aesthetics and technology This recasting of the green movement for the twenty first century transforms design into a positive agent balancing societal values with environmental needs *Design Ecologies* is a ground breaking collection of never before published essays and case studies by today s most innovative designers and critics Their design strategies social material and biological run the gamut from the intuitive to the highly technological One essay likens window unit air conditioners in New York City to weeds in order to spearhead the development of potential design solutions Latz Partner s Landscape Park integrates vegetation and industry in an urban park built amongst the monumental ruins of a former steelworks in Duisburg Nord Germany The engineering firm Arup presents

outside the arts are addressed the analogy to architecture will be evident and important Thus by using the concept of raw as a focal point this book provides new approaches to architecture in a broad sense as well as other aesthetic and artistic practices and will be of interest to readers from different fields of the arts and humanities spanning from philosophy and theology to history of art architecture and music Beauty.
