Independent Thinking on Nature-Based Learning Alexia Barrable, 2022-09-30 Foreword by Ian Gilbert At a time of unprecedented challenges in relation not only to the climate crisis but also to children's and adolescents' mental health, connecting to nature offers an accessible and desirable way forward for today's learners, especially those living in urban surroundings. Bringing together evidence from psychology, environmental science, and education, Alexia aims to support teachers as they provide meaningful experiences rooted in learning about and through nature. The book can be used in two ways: to inspire individual sessions in nature or to support teachers in building a cohesive outdoor learning curriculum throughout the school. Featuring practical advice, case studies, and discussion of original theory, the book aims to inspire, motivate, and stimulate educators to engage with alternative approaches to teaching in the outdoors and with nature in mind, and in such a way that promotes students' learning and fosters a long-lasting relationship with nature.

Independent Thinking on Nature-Based Learning shares case studies and examples of good practice from a variety of settings ranging from kindergarten to secondary. Detailing the physical and psychological benefits of being outdoors, the book suggests ways to help build young people's connection with nature and support their autonomy in natural spaces. Alexia offers ideas on how to weave nature and the outdoors into the very fabric of the curriculum, for example in relation to art, literature, and technology. Suitable for teachers and outdoor learning leaders in early years through to secondary schools, *Independent Thinking on Nature-Based Learning* is one of a number of books in the *Independent Thinking On* series from the award-winning Independent Thinking Press.
