Cocks,2022-02-24 FOSSILS AND STRATA Number 66 August 2021 ISSN 0024 1164 Populism Chiara Chini,Sheyla Moroni,2018-10-09 Populism is a category which is often abused in current public discourse It is an issue

that is usually looked at from the perspective of political science or cultural studies while historians have rarely confronted it. Nonetheless the study of historical cases of populism is a necessary preliminary task for an in depth examination of the topic. This book opens up a channel of dialogue among political scientists, sociologists, philosophers and historians in order to launch a debate on the declination of the populist phenomenon. The essays here consist of the reflections of various scholars on several national cases through a survey conducted on a large temporal and spatial horizon from the experiences developed in Eastern Europe at the end of the nineteenth century to the more recent events of Ukraine's revolution at the end of the twentieth and from the first case of a populist party in the US to the examples of the Italian political scenario in the 1980s in order to identify which historical perspective would be the most suitable for understanding populism and if populism can actually be considered a category that fits into the historical investigation of these phenomena. **The**

Historiography of the First Russian Antarctic Expedition, 1819-21 Rip Bulkeley, 2021-04-26 This book looks at the different ways in which Russian historians and authors have thought about their country's first Antarctic expedition 1819-21 over the past 200 years. It considers the effects their discussions have had on Russia's Antarctic policy and may yet have on Antarctica itself. In particular it examines the Soviet decision in 1949 in line with the cultural policies of late Stalinism to revise the traditional view of the expedition in order to claim that it was Russian seamen that first sighted the Antarctic mainland in January 1820; this claim remains the official position in Russia today. The author illustrates however that the case for such a claim has never been established and that attempts to make it damaged the work of successive Russian historians. Providing a timely assessment of Russian historiography of the Bellingshausen expedition and examining the connections between the priority claim and national policy goals, this book represents an important contribution to the history of the Antarctic. *Bulletin - Institut royal des sciences naturelles de Belgique* Institut royal des sciences naturelles de Belgique, 1993

Explorers of the Maritime Pacific Northwest William L. Lang Ph.D., James V. Walker, 2016-05-09 Covering the adventures of coastal and ocean explorers who made key discoveries and landmark observations from northern California up the coastline to Alaska during the mid 1700s to the early 1800s, this anthology of primary source journal entries, book excerpts, maps and drawings enables readers to discover the Northwest Coast for themselves. More than 200 years ago explorers traveled from Central America, Russia and even Europe to explore the coastline of the American Pacific Northwest with goals of developing new trade routes, claiming territory for their home countries, expanding their fur trade or exploring in the name of scientific discovery. This book will take readers to the decks of the great ships and along for the adventures of legendary explorers such as James Cook, Alejandro Malaspiná and George Vancouver. This book collects primary source materials such as journal entries, book excerpts, maps and drawings that document how explorers first experienced the unknown Pacific Northwest coast as seen through the eyes of non-native people. Readers will learn how explorers such as

Vitus Bering and Robert Gray used the full extent of their powers of observation to record the landscape animals and plants they witnessed as well as their interactions with indigenous peoples during their search for the mythic Northwest Passage. The book also explains how the maritime explorers of this period mapped the remote regions of the Northwest Coast working without the benefit of modern technology and relying instead on their knowledge of a range of sciences mathematics and seamanship in addition to their ability to endure harsh and dangerous conditions to produce exceptionally detailed maps.

Russians in Alaska, 1732-1867 Lydia Black, 2004 This definitive work the crown jewel in the distinguished career of Russian America scholar Lydia T Black presents a comprehensive overview of the Russian presence in Alaska. Drawing on extensive archival research and employing documents only recently made available to scholars Black shows how Russian expansion was the culmination of centuries of social and economic change. Black's work challenges the standard perspective on the Russian period in Alaska as a time of unbridled exploitation of Native inhabitants and natural resources. Without glossing over the harsher aspects of the period Black acknowledges the complexity of relations between Russians and Native peoples. She chronicles the lives of ordinary men and women the merchants and naval officers laborers and clergy who established Russian outposts in Alaska. These early colonists carried with them the Orthodox faith and the Russian language their legacy endures in architecture and place names from Baranof Island to the Pribilofs. This deluxe volume features fold out maps and color illustrations of rare paintings and sketches from Russian American Japanese and European sources many have never before been published. An invaluable source for historians and anthropologists this accessible volume brings to life a dynamic period in Russian and Alaskan history. A tribute to Black's life as a scholar and educator Russians in Alaska will become a classic in the field.

Field Archaeology from Around the World Martin Carver, Bissierka Gaydarska, Sandra Montón-Subías, 2014-11-26 Field practice in archaeology varies greatly throughout the world mainly because archaeological sites survive in very different ways in different countries. Many manuals see this as a problem to be defeated by the imposition of standardised procedures. In this book we relish the variety of field practice seeing it rather as the way the best archaeologists have responded creatively to the challenges of terrain research objectives and the communities within which they work. While insisting on the highest levels of investigation we celebrate the different designs concepts scientific detection methods and recording systems applied so embracing standards but not standardisation. The book is organised in four parts. Part 1 offers a summary of field procedures. Part 2 reviews the principal methods applied above and below ground and how the results are analysed. Part 3 illustrates the huge variety confronted by field workers with a series of exemplary commercial and academic projects enacted in downland jungle desert permafrost road schemes and towns. Approaches also differ according to the traditional methodologies that have evolved in particular countries. In Part 4 we give examples of some of the strongest and oldest of those practised on four continents.
