Lutes, Jennifer Travis, 2021-04-15 Gender in American Literature and Culture introduces readers to key developments in gender studies and American literary criticism It offers nuanced readings of literary conventions and genres from early American writings to the present and moves beyond inflexible categories of masculinity and femininity that have reinforced misleading assumptions about public and private spaces domesticity individualism and community The book also demonstrates how rigid inscriptions of gender have perpetuated a legacy of violence and exclusion in the United States Responding to a sense of 21st century cultural and political crisis it illuminates the literary histories and cultural imaginaries that have set the stage for urgent contemporary debates The Publishers' Trade List Annual ,1995 Southwestern Women Writers and the Vision of Goodness Catharine Savage Brosman, 2016-07-25 This literary history focuses on five women writers Mary Austin Willa Cather Laura Adams Armer Peggy Pond Church and Alice Marriott whose work appeared from around 1900 through the 1980s All came from or lived and worked in California Arizona New Mexico or Oklahoma The book situates them in their time and place and examines their interactions with landscapes people art and history Their interest in fine arts and native arts and crafts is stressed as well as their concern for the environment .1972-03 **Rethinking World-Systems** Gil J. Stein, 2022-08-16 The use of world systems theory to explain the spread of social complexity has become accepted practice by both historians and archaeologists Gil Stein now offers the first rigorous test of world systems as a model in archaeology arguing that the application of world systems theory to noncapitalist pre fifteenth century societies distorts our understanding of developmental change by overemphasizing the role of external over internal dynamics In this new study Stein proposes two complementary theoretical frameworks for the study of interregional interaction a distance parity model which views world systems as simply one factor in a broader range of intersocietal relations and a trade diaspora model which explains variation in exchange systems from the perspective of participant groups He tests his models against the archaeological record of Mesopotamian expansion into the Anatolian highlands during the fourth millennium B C Whereas some scholars have considered this Uruk expansion to be one of the earliest documented world systems Stein uses data from the site of Hacinebi in southeastern Turkey to support his alternate perspective Comparing economic data from pre and postcontact phases Stein shows that the Mesopotamians did not dominate the people of this distant periphery Such evidence argues Stein shows that we must look more closely at the local cultures of peripheries to develop realistic cross cultural models of variation in colonialism exchange and secondary state formation in ancient societies By demonstrating that a multitude of factors affect the nature and consequences of intersocietal contacts his book advocates a much needed balance between recognizing that no society can be understood in complete isolation from its neighbors and assuming the primacy of outside contact in a society's development *Public Papers of the Presidents of the* United States: Gerald R.
