Paganism Surviving In Christianity 1892:

Paganism Surviving in Christianity Abram Herbert Lewis, 2022-09-04 In *Paganism Surviving in Christianity* Abram Herbert Lewis meticulously explores the enduring influences of ancient pagan practices and beliefs within the framework of modern Christianity. Written with a keen eye for historical detail and cultural nuance, Lewis employs a blend of rigorous scholarship and accessible prose, making complex theological concepts approachable for both academic and lay audiences. Throughout the text, he deftly navigates the intersections of mythology, ritual, and doctrine, revealing how elements of pagan traditions have subtly woven themselves into Christian practices and celebrations, challenging the notion of Christianity as a wholly distinct faith. Abram Herbert Lewis, a scholar steeped in religious studies, draws upon his extensive background in theology and anthropology to illuminate these intricate connections. His prior works reflect a deep interest in the evolution of religious thought and the syncretic nature of belief systems. Lewis's academic journey likely stems from a personal fascination with how historical narratives shape contemporary spirituality, prompting him to probe the hidden layers of influence that paganism has exerted over Christian traditions. This book is a must-read for anyone interested in the complexities of religious identity and the interplay between ancient and modern beliefs. Lewis's insightful analysis invites readers to reconsider the origins of their own faith practices while fostering a deeper understanding of the rich tapestry of cultural heritage that shapes contemporary spirituality.

The first Sunday Law 321 A.D. Pagan in every particular essentially identical with existing laws concerning other days. Legislation against heathen religions feeble and unenforced. Constantine not a Christian Prince. The representative legislation of Constantine with reference to Christianity was pagan both as to its genius and form. The various edicts in favor of Christians contained little or nothing of true liberty of conscience. They were the steps by which Christianity already paganized was recognized and gradually raised to a dominant place among the legal religions. This accorded with the prevailing syncretism and the policy which Rome had always exercised toward foreign religions. On the other hand, the Emperor still acting as Pontifex Maximus and long before he was baptized into the fellowship of the Church became its dictator. He convened and controlled the famous council at Nice 325 A.D. while his hands were red with the blood of his kindred whom he slew lest they might come between him and his ambition to be sole emperor. The decisions of the Council of Nice mark the beginning of centuries in which imperial law determined what should be called Christianity, what orthodoxy and what heterodoxy. The Bible was not the standard of faith or practice. Traditions, imperial decrees, the decisions of councils

called and dictated by the imperial power determined the practice of the Church and formulated her faith This will be shown more in detail farther on Meanwhile we pause to examine the character of one of Constantine s earliest laws which has left a
