Each chapter starts with a personal story from a child, a family member, or a healthcare professional. The stories are drawn from a wealth of original research and focus the reader on the individual child and their family. The chapter then goes on to introduce the relevant research, theory, and implications for practice so health professionals can use the evidence to support compassionate, child-centred care. Among the topics addressed are ethical dilemmas, assessing pain, working in different settings, and inexplicable pain. It is valuable reading for any healthcare student or professional working with children of all ages.
