Presenting Performances Thomas Wolf, 1981 Performing Matters Barry Gibson, 2001 A range of practical projects designed to build and sustain performing skills and experience for pupils aged 11-14 *Music Festivals*, 1982 *The Oxford Handbook of Music Performance, Volume 1* Gary McPherson, 2021-12-24 The two volume Oxford Handbook of Music Performance provides a resource that musicians, scholars and educators will use as the most important and authoritative overview of work within the areas of music psychology and performance science. The 80 experts from 13 countries who prepared the 53 chapters in this handbook are leaders in the fields of music psychology, performance science, musicology, psychology, education and music education. Chapters in the Handbook provide a broad coverage of the area with considerable expansion of the topics that are normally covered in a resource of this type. Designed around eight distinct sections: Development and Learning, Proficiencies, Performance Practices, Psychology, Enhancements, Health, Wellbeing, Science and Innovations, the range and scope of *The Oxford Handbook of Music Performance* is much wider than other publications through the inclusion of chapters from related disciplines such as performance science, e.g. optimizing performance, mental techniques, talent development in non-music areas and education, e.g. human development, motivation, learning and teaching styles, as well as the attention given to emerging critical issues in the field, e.g. wellbeing, technology, gender diversity, inclusion, identity, resilience and buoyancy, diseases and physical and mental disabilities. Within each chapter, authors have selected what they consider to be the most important scientific and artistic material relevant to their topic. They begin their chapters by surveying theoretical views on each topic and then in the final part of the chapter highlight practical implications of the literature that performers will be able to apply within their daily musical lives. The Perilous Life of Symphony Orchestras Robert J. Flanagan, 2012-01-24 This book analyzes the economic challenges facing symphony orchestras and contrasts the experience of orchestras in the United States where there is little direct government support and abroad where governments typically provide large direct subsidies. Robert J. Flanagan explains the tension between artistic excellence and financial jeopardy that confronts most symphony orchestras. He analyzes three complementary strategies for addressing orchestras' economic challenges: raising performance revenues, slowing the growth of performance expenses, and increasing non-performance income, and demonstrates that none of the three strategies alone is likely to provide economic security for orchestras. *Annual Report* National Endowment for the Arts, 1990 Reports for 1980-19 also include the Annual report of the National Council on the Arts. **How to Produce Amateur Plays: A Practical Manual** Barrett H. Street Performance and Alternative Organisation Marta Połec, 2025-08-15 The book presents a description of the phenomenon of organising street performances both informal and within formalised structures as well as its interpretation from the point of view of humanistic management The book is a result of ethnographic fieldwork conducted in Polish and European cities from 2014 to 2024 The central focus is the aspects of organisational aesthetics of the activities of street performers and street festival organisers The dynamics of street performances are structured and emerge as a type of alternative organisation The book aims at throwing light on these processes from the point of view of humanistic management which is a relatively new topic in organisational studies and overlooked in other academic fields The book also identifies and outlines some research implications for the combined area of humanistic management and arts management It offers a model of the management of street performance embedded in a theoretical context of 1 humanistic management 2 arts management and 3 organisation informed by values such as community and social entrepreneurship Ultimately the organisation of art in the urban sphere can gain from lessons from the alternative organisational practices depicted in this book which in turn can inform broader humanistically oriented managerial visions
