Echoing Events Tina van der Vlies, 2022-12-12 Echoing Events questions the perpetuation, actualization and canonization of national narratives in English and Dutch history textbooks, wide-reaching media that tendentially inspire a sense of meaning, memory and thus also identity. The longitudinal study begins in the 1920s when the League of Nations launched several initiatives to reduce strong nationalistic visions in textbooks and ends in the new millennium with the revival of national narratives in both countries. The analysis shows how and why textbook authors have narrated different histories which vary in terms of context, epoch and place as echoing events by using recurring plots and the same combinations of historical analogies. This innovative and original study thus investigates from a new angle the resistance of national narratives to change.

Town and Countryside in Western Berkshire, C.1327-c.1600 Margaret Yates, 2007 A fresh examination of how society and economy changed at the end of the middle ages, comparing urban and rural experience. The traditional boundary between the medieval and early modern periods is challenged in this new study of social and economic change that bridges the fifteenth and sixteenth centuries. It addresses the large historical questions: what changed, when and why, through a detailed case study of western Berkshire and Newbury, integrating the experiences of both town and countryside. Newbury is of particular interest, being a rising cloth manufacturing centre that had contacts with London and overseas due to its specialist production of kerseys. The evidence comes from original documentary research and the data are clearly presented in tables and graphs. It is a book alive with the actions of people, famous men such as the clothier John Winchcombe known as Jack of Newbury but more notably by the hundreds of individuals such as William Eyston or Isabella Bullford who acquired property, cultivated their lands or in the case of Isabella managed the mill complex after her husband's death. MARGARET YATES is Lecturer in History at the University of Reading.

The Smoke of London William M. Cavert, 2016-04-07 William M. Cavert investigates the origins of urban air pollution, explaining how this problem arose during the early modern period.

The Making of Man-midwifery Adrian Wilson, 1995 In England in the seventeenth century, childbirth was the province of women. The midwife ran the birth, helped by female gossips; men, including the doctors of the day, were excluded both from the delivery and from the subsequent month of lying-in. But in the eighteenth century there emerged a new practitioner, the man-midwife, who acted in lieu of a midwife and delivered normal births. By the late eighteenth century, men-midwives had achieved a permanent place in the management of childbirth, especially in the most lucrative spheres of practice. Why did women desert the traditional midwife? How was it that a domain of female control and collective solidarity became instead a region of male medical practice? What had broken down the barrier that had formerly excluded the male practitioner from the management of birth? This confident

and authoritative work explores and explains a remarkable transformation a shift not just in medical practices but in gender relations Exploring the sociocultural dimensions of childbirth Wilson argues with great skill that it was not the desires of medical men but the choices of mothers that summoned man midwifery into being *The Industrial Revolution* Pat Hudson,2014-08-29 This is an introduction to the Industrial Revolution which offers an integrated account of the economic and social aspects of change during the period Recent revisionist thinking has implied that fundamental change in economic social and political life at the time of the Industrial Revolution was minimal or non existent The author challenges this interpretation arguing that the process of revision has gone too far emphasizing continuity at the expense of change and neglecting many historically unique features of the economy and society Elements given short shrift in many current interpretations are reassigned their central roles Climate: Present, Past and Future (Routledge Revivals) H. H. Lamb,2013-09-05 First published in 1977 the second volume of *Climate Present Past and Future* covers parts 3 and 4 of Professor Hubert Lamb s seminal and pioneering study of climatology Part 3 provides a survey of evidence of types of climates over the last million years and of methods of dating that evidence Through the earlier stages of the Earth s development the book traces what is known of the various geographies presented by the drifting continents and indicates what can be learnt about climatic regimes and the causes of climatic change From the last ice age to the present our knowledge of the succession of climates is summarized indicating prevailing temperatures rainfalls wind and ocean current patterns where possible Part 4 considers events during the fifteen years prior to the book s initial publication leading on to the problems of estimating the most probable future course of climatic development and the influence of Man s activities on climate Alongside the reissue of volume 1 this Routledge Revival will be essential reading for anyone interested in both the causes and workings of climate and in the history of climatology itself *Writing the Lives of the English Poor, 1750s-1830s* Steven King,2019-02-28 From the mid eighteenth century to the early nineteenth century the English Old Poor Law was waning soon to be replaced by the New Poor Law and its dreaded workhouses In *Writing the Lives of the English Poor 1750s 1830s* Steven King reveals colourful stories of poor people their advocates and the officials with whom they engaged during this period in British history distilled from the largest collection of parochial correspondence ever assembled Investigating the way that people experienced and shaped the English and Welsh welfare system through the use of almost 26 000 pauper letters and the correspondence of overseers in forty eight counties *Writing the Lives of the English Poor 1750s 1830s* reconstructs the process by which the poor claimed extended or defended their parochial allowances Challenging preconceptions about literacy power social structure and the agency of ordinary people these stories suggest that advocates officials and the poor shared a common linguistic register and an understanding of how far welfare decisions could be contested and negotiated King shifts attention away from traditional approaches to construct an unprecedented comprehensive portrait of poor law administration and popular writing at the turn of the nineteenth century At a time when

the western European welfare model is under sustained threat Writing the Lives of the English Poor 1750s 1830s takes us back to its deepest roots to demonstrate that the signature of a strong welfare system is malleability

History and Material Culture Karen Harvey, 2017-09-18 Sources are the raw material of History but whereas the written word has traditionally been seen as the principal source historians now recognize the value of sources beyond text In this new edition of History and Material Culture contributors consider a range of objects from an eighteenth century bed curtain to a twenty first century shopping trolley which can help historians develop new interpretations and new knowledge about the past Containing two new chapters on healing objects in East Africa and the shopping trolley in the social world this book examines a variety of material sources from around the globe and across centuries to assess how such sources can be used to study the distant and the recent past In a revised introduction Karen Harvey discusses some of the principal issues raised when historians use material culture particularly in the context of the material turn and suggests some initial steps for those unfamiliar with these kinds of sources While the sources are discussed from interdisciplinary perspectives the emphasis of the book is on what historians stand to gain from using material culture as well as what historians have to offer the broader study of material culture Clearly written and accessible this book is the ideal introduction to the opportunities and challenges of researching material culture and is essential reading for all students of historical theory and method

Scenes from Bourgeois Life Nicholas Ridout, 2020-06-22 Scenes from Bourgeois Life proposes that theatre spectatorship has made a significant contribution to the historical development of a distinctive bourgeois sensibility characterized by the cultivation of distance In Nicholas Ridout's formulation this distance is produced and maintained at two different scales First is the distance of the colonial relation not just in miles between Jamaica and London but also the social economic and psychological distances involved in that relation The second is the distance of spectatorship not only of the modern theatregoer as consumer but the larger and pervasive disposition to observe comment and sit in judgment which becomes characteristic of the bourgeois relation to the rest of the world This engagingly written study of history class and spectatorship offers compelling proof of why theater matters and demonstrates the importance of examining the question historically
