Parliament. House of Lords, 1840 *Hansard's Parliamentary Debates* Great Britain. Parliament, 1850 **Secondary Pollen Presentation** P.F. Yeo, 2012-12-06 Secondary pollen presentation is presentation of pollen to vectors by structures other than anthers either passively or via a specialized protection and delivery system The main part of the book describes secondary pollen presentation genus by genus in 25 families The subject has never been extensively reviewed although secondary pollen presentation occurs in the largest family of flowering plants the Asteraceae Compositae and a large family of great economic importance the Leguminosae Now material from the scattered literature is brought together and supplemented with original observations Many species are illustrated and each family is individually discussed The last two chapters provide an overview of the whole topic All the main functions that secondary pollen presentation may perform can be carried out in other plants without it It is concluded from this that the evolution of secondary pollen presentation has been subject to constraint and

canalization The floral biology of most plants with secondary pollen presentation has not been adequately studied Appendix 1 points to a wide range of topics on which research at various technical and academic levels is needed The book should also become a reference work for morphologists systematists and floral ecologists **Australian national bibliography** ,1961
