Presenting The Past Modern World:

Past into Present Stacy F. Roth, 2000-11-09 First person interpretation the portrayal of historical characters through interactive dramatization or roleplaying is an effective albeit controversial method used to bring history to life at museums historic sites and other public venues Stacy Roth examines the techniques of first person interpretation to identify those that have been most effective with audiences while allowing interpreters to maintain historical fidelity Past into Present focuses on first person interpretation's most challenging form the unscripted spontaneous conversational approach employed in living history environments such as Plimoth Plantation in Massachusetts Conner Prairie in Indiana and Colonial Williamsburg in Virginia While acknowledging that a wide range of methods can touch audiences effectively Roth identifies a core set of practices that combine positive communication techniques classic interpretive philosophy and time tested learning theories to promote audience enjoyment provoke thought and inquiry convey important messages and themes and relate to individual visitor interests She offers numerous examples of conversation and demonstration strategies visitor behavior profiles and suggestions for depicting conflict and controversy and she provides useful character development guidelines interpretive training advice and recommendations for adapting first person interpretation for diverse audiences *Miracles, Past and Present* William Mountford, 1870

A User's Guide to Our Present World Herb Gruning, 2021-04-14 The reader is about to embark on a journey of discovery and perhaps even reckoning Religion and science have been understood as inherently at odds and inimical toward each other However both employ metaphor religion when it calls the spirit descending upon Jesus a dove science when it describes electrons as a current flowing through a wire for only fluids flow and electrons are not a fluid Both use myths some religions in the sense that there was a Golden Age of humans in a garden science when it promises unlimited progress Both enlist hypothetical entities some religions when a storm heralds that the gods are angry science with the existence of a vacuum and a frictionless surface And each bears its fundamentalist contingent just observe a debate between creationists and evolutionists and the zeal and fervor with which the Bible and Darwin must be defended at any cost no matter what Given all this it becomes readily apparent that religion and science display more in common than was once expected And that is precisely what is in peril in the following pages our expectations May the intrepid traveler benefit from the voyage

Historical Teleologies in the Modern World Henning Trüper, Dipesh Chakrabarty, Sanjay Subrahmanyam, 2015-09-24 Historical Teleologies in the Modern World tracks the fragmentation and proliferation of teleological understandings of history the notion that history had to be explained as a goal directed process in Europe and beyond throughout the 19th and into the 20th century Historical teleologies have profoundly informed a variety of other disciplines including modern philosophy natural history literature humanitarian and religious philanthropism the political thought and practice of revolution emancipation imperialism colonialism and anti colonialism the conceptualization of universal humankind and the understanding of modernity in general By exploring the extension and plurality of historical

teleology the essays in this volume revise the history of historicity in the modern period Historical Teleologies in the Modern World casts doubt on the idea that a single if powerful conception of time could function as the unifying principle of all modern historicity instead pursuing an investigation of the plurality of modern historicities and its underlying structures By bringing together Western and non Western histories this book provides the first extended treatment of the idea of historical teleology It will be of great value to students and scholars of modern global and intellectual history *Madness, Disability and Social Exclusion* Jane Hubert,2013-12-02 A unique work that brings together a number of specialist disciplines such as archaeology anthropology disability studies and psychiatry to create a new perspective on social and physical exclusion from society A range of evidence throws light on such things as the causes and consequences of social exclusion stigma marginality and dangerousness It is an important text that breaks down traditional academic disciplinary boundaries and brings a much needed comparative approach to the subject **Destruction and Conservation of Cultural Property** R Layton,P Stone,J Thomas,2003-09-02 In 1991 the mosque at Ayodhya in India was demolished by Hindu fundamentalists who claim that it stood on the birthplace of a legendary Hindu hero During recent conflicts in former Yugoslavia ethnic groups destroyed mosques and churches to eliminate evidence of long term settlement by other communities Over successive centuries however a single building in Cordoba functioned as a mosque a church and a synagogue The Roman Emperor Diocletian's Palace in Split is occupied today by shops and residential apartments What circumstances have led to the survival and reinterpretation of some monuments but the destruction of others This work asks whether the idea of world heritage is an essential mechanism for the protection of the world's cultural and natural heritage or whether it subjugates a diversity of cultural traditions to specifically Western ideas How far is it acceptable for one group of people to comment upon or intercede in the way in which another community treats the remains which it claims as its own What are the responsibilities of multinational corporations and non governmental organisations operating in the Developing World Who actually owns the past the landowner indigenous people the State or humankind Natural Disasters and Cultural Change John Grattan,Robin Torrence,2003-08-27 Human cultures have been interacting with natural hazards since the dawn of time This book explores these interactions in detail and revisits some famous catastrophes including the eruptions of Thera and Vesuvius These studies demonstrate that diverse human cultures had well developed strategies which facilitated their response to extreme natural events The Dead and Their Possessions Cressida Fforde,Jane Hubert,Paul Turnbull,2004 Repatriation of human remains has become a key international heritage concern This extensive collection of papers provides a survey of the current state of repatriation in terms of policy practice and theory **Archaeologies of the British** Susan Lawrence,2003 Beginning with the early English colonisation of Ireland and Virginia the international range of contributors in Archaeology of the British examine the interplay of objects and identity in Scotland and Wales regional England Canada Australia South Africa Cyprus and Sri Lanka Informed by developments in historical archaeology and by postcolonial

scholarship the case studies in this volume look at the colonists themselves The evidence draws upon includes vernacular architecture landscapes and objects of everyday life Archaeologies of the British makes it clear that Britishness has never been a fixed entity and that material culture can challenge historical and contemporary understandings of Britishness

Illicit Antiquities Neil Brodie,Kathryn Walker Tubb,2003-08-27 The exploitation of archaeological sites for commercial gain is a serious problem worldwide In peace and during wartime archaeological sites and cultural institutions both on land and underwater are attacked and their contents robbed for sale on an international antiquities market Objects are excavated without record smuggled across borders and sold for exorbitant prices in the salesrooms of Europe and North America In some countries this looting has now reached such a scale as to threaten the very survival of their archaeological and cultural heritage This volume highlights the deleterious effects of the trade on cultural heritage but in particular it focuses upon questions of legal and local responses How can people become involved in the preservation of their past and what in economic terms are the costs and benefits Are international conventions or export restrictions effective in diminishing the volume of the trade and the scale of its associated destruction

Present Past Richard Terdiman,1993 This book is about memory about how the past persists into the present and about how this persistence has been understood over the past two centuries Since the French Revolution memory has been the source of an intense disquiet Fundamental cultural theories have sought to understand it and have striven to represent its stresses

Matériel Culture Colleen M. Beck,William Gray Johnson,John Schofield,2003-09-02 Mat riel culture encompasses the material remains of conflict from buildings and monuments to artefacts and militia as well as human remains This collection of essays from an international range of contributors illustrates the diversity in this material record highlights the difficulties and challenges in preserving presenting and interpreting it and above all demonstrates the significant role mat riel culture can play in contemporary society Among the many studies are the culture of shells the archaeology of nuclear testing grounds Cambodia s killing fields the Berlin Wall and the biography of a medal the reappearance of Argentina s disappeared World War II concentration camps

Diverging Time David Carvounas,2002-01-01 Temporal divergence creates a need for new narratives and paradigms In *Diverging Time* David Carvounas supports this assertion through detailed expository and diagnostic readings of Kant Hegel and Marx He focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present Despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose This book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that Kant Hegel and Marx delineate in distinctive and powerful ways

Introducing Human Geographies Paul Cloke,Philip Crang,Mark Goodwin,2013-12-05 *Introducing Human Geographies* is the leading guide to human

geography for undergraduate students explaining new thinking on essential topics and discussing exciting developments in the field This new edition has been thoroughly revised and updated and coverage is extended with new sections devoted to biogeographies cartographies mobilities non representational geographies population geographies public geographies and securities Presented in three parts with 60 contributions written by expert international researchers this text addresses the central ideas through which human geographers understand and shape their subject Part I Foundations engages students with key ideas that define human geography s subject matter and approaches through critical analyses of dualisms such as local global society space and human nonhuman Part II Themes explores human geography s main sub disciplines with sections devoted to biogeographies cartographies cultural geographies development geographies economic geographies environmental geographies historical geographies political geographies population geographies social geographies urban and rural geographies Finally Part III Horizons assesses the latest research in innovative areas from mobilities and securities to non representational geographies This comprehensive stimulating and cutting edge introduction to the field is richly illustrated throughout with full colour figures maps and photos These are available to download on the companion website located at www.routledge.com/9781444135350

What Is the Present? Michael North, 2025-06-17 A provocative new look at concepts of the present their connection to ideas about time and their effect on literature art and culture The problem of the present what it is and what it means is one that has vexed generations of thinkers and artists Because modernity places so much value on the present many critics argue that people today spend far too much time in the here and now but how can we tell without first knowing what the here and now actually is What Is the Present takes a provocative new look at this moment in time that remains a mystery even though it is always with us Michael North tackles puzzles that have preoccupied philosophy neuroscience psychology history and aesthetic theory and examines the complex role of the present in painting fiction and film He engages with a range of thinkers from Aristotle and Augustine to William James and Henri Bergson He draws illuminating examples from artists such as Fra Angelico and Richard McGuire filmmakers like D W Griffith and Christopher Nolan and novelists such as Elizabeth Bowen and Willa Cather North offers a critical analysis of previous models of the present from the experiential present to the historical period we call the contemporary He argues that the present is not a cosmological or experiential fact but a metaphor a figurative relationship with the whole of time Presenting an entirely new conception of the temporal mystery Georg Luk cs called the unexplained instant What Is the Present explores how the arts have traditionally represented the present and also how artists have offered radical alternatives to that tradition

The Politics of Memory Joanne Rappaport, 1990-06-29 Reconsidering the predominantly mythic status of non Western historical narrative Rappaport identifies the political realities that influenced the form and content of Andean history revealing the distinct historical vision of these stories Because of her examination of the influences of literacy in the creation of history Rappaport s analysis makes a special contribution to Latin American and Andean studies solidly grounding subaltern texts in

their sociopolitical contexts Amazon **Fascism Past and Present, West and East** Roger Griffin, Werner Loh, Andreas Umland, 2006-04-27 In the opinion of some historians the era of fascism ended with the deaths of Mussolini and Hitler Yet the debate about its nature as a historical phenomenon and its value as a term of historical analysis continues to rage with ever greater intensity each major attempt to resolve it producing different patterns of support dissent and even hostility from academic colleagues Nevertheless a number of developments since 1945 not only complicate the methodological and definitional issues even further but make it ever more desirable that politicians journalists lawyers and the general public can turn to experts for a heuristically useful and broadly consensual definition of the term These developments include the emergence of a highly prolific European New Right the rise of radical right populist parties the flourishing of ultra nationalist movements in the former Soviet empire the radicalization of some currents of Islam and Hinduism into potent political forces and the upsurge of religious terrorism Most monographs and articles attempting to establish what is meant by fascism are written from a unilateral authoritative perspective and the intense academic controversy the term provokes has to be gleaned from reviews and conference discussions The uniqueness of this book is that it provides exceptional insights into the cut and thrust of the controversy as it unfolds on numerous fronts simultaneously clarifying salient points of difference and moving towards some degree of consensus Twenty nine established academics were invited to engage with an article by Roger Griffin one of the most influential theorists in the study of generic fascism in the Anglophone world The resulting debate progressed through two rounds of critique and reply forming a fascinating patchwork of consensus and sometimes heated disagreement In a spin off from the original discussion of Griffin s concept of fascism a second exchange documented here focuses on the issue of fascist ideology in contemporary Russia This collection is essential reading for all those who realize the need to provide the term fascism with theoretical rigor analytical precision and empirical content despite the complex issues it raises and for any specialist who wants to participate in fascist studies within an international forum of expertise The book will change the way in which historians and political scientists think about fascism and make the debate about the threat it poses to infant democracies like Russia more incisive not just for academics but for politicians journalists and the wider public **Everyday Life in the Modern World** Henri Lefebvre, 2010-07-15 Basing his discussion on everyday life in France Lefebvre shows the degree to which our lived in world and sense of it are shaped by decisions about which we know little and in which we do not participate **Modern Europe, 1789-Present** Asa Briggs, Patricia Clavin, 2014-06-06 Now covering the whole of Europe from the French Revolution to the present day this major new edition has been completely revised and brought up to date The approach embraces the whole continent from both national and regional perspectives and combines political survey with grass roots people history Bringing this history vividly to life the authors use a very broad range of sources including memoirs archives letters songs and newspapers In particular there is new treatment of the following themes Religion and the modern Papacy Immigration in Europe and relationships between minority and majority

groups UNESCO The European Bill of Rights The seeds of conflict in Bosnia and Croatia Europe's relations with the wider world with particular attention to the Middle East and Japan *Quakerism, Past and Present* John Stephenson Rowntree, 1859
