**Susan Macdonald, Kyle C.
Normandin, Bob Kindred**

Preserving Postwar Heritage The Care And Conservation Of Twentieth Century Architecture:

Preserving Post-war Heritage Susan Macdonald, 2001 Since 1990 more than 300 post war buildings and outdoor sculptures have been added to the statutory list of buildings of special architectural or historic interest The debate continues as to whether the design rationale materials used or construction techniques places these buildings outside the scope of normal conservation principles This work examines the specific management and practical issues posed by our post war heritage Contributions from local and international practitioners carrying out pioneering work in their respective areas of expertise cover the most urgent practical problems commonly encountered by conservation professionals who have to deal with post war construction Part I deals with the historical context and the framework for protection of post war architecture in Britain Part II examines structural issues materials and services with particular emphasis on diagnosis and assessment of problems and the options for repair The topics covered include reinforced concrete plastics services clad frame construction and curtain walling

The Architecture of Edwin Maxwell Fry and Jane Drew Iain Jackson, Jessica Holland, 2016-03-16 Maxwell Fry and Jane Drew were pioneers of Modern Architecture in Britain and its former colonies from the late 1920s through to the early 1970s As a barometer of twentieth century architecture their work traces the major cultural developments of that century from the development of modernism its spread into the late colonial arena and finally to its re evaluation that resulted in a more expressive formalist approach in the post war era This book thoroughly examines Fry and Drew s highly influential Tropical Architecture in West Africa and India whilst also discussing their British work such as their post World War II projects for the Festival of Britain Harlow New Town Pilkington Brothers Headquarters and Coychurch Crematorium It highlights the collaborative nature of Fry and Drew s work including schemes undertaken with Elizabeth Denby Walter Gropius Denys Lasdun Pierre Jeanneret and Le Corbusier Positioning their architecture writing and educational endeavours within a wider context this book illustrates the significant artistic and cultural contributions made by Fry and Drew throughout their lengthy careers

Architectural Conservation in Europe and the Americas John H. Stubbs, Emily G. Makaš, 2011-05-04 From such well known and long vexed sites as the Athenian Acropolis to more contemporary locales like the Space Age Modernist capital city of Brasilia the conflicting and not always neatly resolvable forces that bear upon preservation are addressed as clearly and thoughtfully as the general reader could hope for New York Review of Books an astonishing feat of research compilation and synthesis Context The book delivers the first major survey concerning the conservation of cultural heritage in both Europe and the Americas Architectural Conservation in Europe and the Americas serves as a convenient resource for professionals students and anyone interested in the field Following the acclaimed Time Honored this book presents contemporary practice on a country by country and region by region basis facilitating comparative analysis of similarities and differences The book stresses solutions in architectural heritage protection and the contexts in which they were developed

History, Performance and Conservation Barry

Bridgwood, Lindsay Lennie, 2013-09-13 Ideal for students of architectural technology this volume of the Technologies of Architecture series covers the technologies available and the processes necessary for the conservation of existing buildings and environments This book provides in a single text the tools for students to be able to evaluate such buildings as well as an extensive understanding of the mechanisms which cause their deterioration and knowledge of the technologies available to correct their status The ever higher standards set for buildings especially in energy conservation contexts demand that practitioners appreciate how the performance of existing structures can be enhanced which is also covered Considering the work of conservation within a holistic perspective and historical context this book is additionally invaluable for architecture and construction students **Conservation of Modern Architecture** Susan Macdonald, Kyle C. Normandin, Bob

Kindred, 2015-12-08 The importance of protecting significant buildings from decay and destruction would seem to be undeniable Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference and in some cases hostility towards many important post war buildings These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time Climate change in particular has forced change in the way in which we think about buildings with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike **The Recovery of Beauty: Arts, Culture, Medicine** Corinne Saunders, David Fuller, 2015-08-22 An interdisciplinary collection of essays exploring the

complex and conflicted topic of beauty in cultural arts and medicine looking back through the long cultural history of beauty and asking whether it is possible to recover beauty **Urban Histories in Practice** Jeffrey Kruth, Steven

Rugare, 2022-09-08 This volume brings together ideas about the material and social transformation of cities by asking what is the relationship between history memory and the contemporary city The urgency of this question grows in the contexts of rapid urbanization in the Global South and urban decline in the deindustrializing areas of the Global North Within these spaces multiple disciplines shape our capacity to know the contemporary city The work presented here invites the reader to undertake critical and creative approaches regarding how these disciplines might shape this process ultimately making it more equitable and just Using various methods the contributors engage in critical readings of specific built and discursive legacies in numerous global contexts Differing forms of a social agenda permeate each piece but none is utopian or totalizing Rather the emphasis is on various forms of close reading The authors begin with the city as found and address each context in specific and precise terms The contributions here bring together histories in critical and creative ways while also catalyzing future possibilities In this way these writings frame urban history and morphology discourse not only as arenas for

theoretical posturing but also as calls for action Windows James Campbell, Michael Tutton, 2025-09-18 In *Windows History Repair and Conservation* readers are guided through the history dating development care repair and conservation of windows by authors who are experts in their fields Each chapter covers a different aspect of the subject from the dating of windows and their separate parts through to surveying and engineering recording and curation of historic windows their ironmonger and surrounds As this book shows windows vary in complexity and form from the very simplest glazed openings to intricate medieval stained glass masterpieces combining the work of stone masons smiths woodworkers glaziers and artists This book traces the history of windows and provides guidance on their upkeep and conservation It is thus an essential reference work for all those involved in care of historic buildings *Windows History Repair and Conservation* was the first major book devoted to the understanding of windows This new revised edition brings the book up to date and provides additional chapters to provide a complete overview of the subject that will inform research and practice for years to come

The Dead City Paul Dobraszczyk, 2017-06-30 The Dead City unearths meanings from such depictions of ruination and decay looking at representations of both thriving cities and ones which are struggling abandoned or simply in transition It reveals that ruination presents a complex opportunity to envision new futures for a city whether that is by rewriting its past or throwing off old assumptions and proposing radical change Seen in a certain light for example urban ruin and decay are a challenge to capitalist narratives of unbounded progress They can equally imply that power structures thought to be deeply ingrained are temporary contingent and even fragile Examining ruins in Chernobyl Detroit London Manchester and Varosha this book demonstrates that how we discuss and depict urban decline is intimately connected to the histories economic forces power structures and communities of a given city as well as to conflicting visions for its future

Structural Design in Building Conservation Dimitris Theodossopoulos, 2012-07-26 No building is properly conserved if it is not structurally sound Consequently architects engineers and conservation officers need an adequate grounding in the technology the materials and the historic origins of the building in order to complete a conservation project successfully Structural Design in Building Conservation deals with design issues and technical choices showing how they are integrated with the planning and architectural outcomes in a conservation project It brings together theory with current conservation technology discussing the possibilities of structural details and strategies in architectural expression Case studies are central

to this and these are organised around such themes as the addition of roofs requalification of space strengthening and re use of fabric repristination additions completions stiffness adjustments and the correction of past mistakes The reader is encouraged to examine the technical details of these real projects and explore the possible solutions The philosophy of structural interventions is introduced in the context of conservation theories and practices in various European countries The main types of strengthening repairs and interventions are explained using different building types and the structural nature of the main elements to be strengthened linear structures frames plates and shells is explored in detail Case studies included cover a very wide range of historic types and conversions not only monumental masonry structures like neoclassical buildings major temples churches public buildings and museums but also more utilitarian structures like historic mills early reinforced concrete structures and vaulting types This is essential reading for all students of architectural conservation and practicing architects and engineers who are involved in conservation projects
