Presidential Decisionmaking In Foreign Policy The Effective Use Of Information And Advice:

Presidential Decisionmaking In Foreign Policy Alexander L George, 1980-02-21 0813325919 Presidential Personality and Performance *Good Judgment in Foreign Policy* Stanley Allen Renshon, Deborah Welch Larson, 2003 At the heart of political leadership lies choice And at the heart of choice lies judgment A leader's psychology and experience intersect with political realities to produce consequences that can make or break a leader or a country Nowhere is judgment more important than in the making of foreign policy Good judgments can avoid wars or win them Poor judgments can start wars or lose them This book draws together a distinguished group of contributors psychologists political scientists and policymakers to focus on and understand both good and poor judgment in foreign policy making Case studies of key leadership decisions combine with theoretical overviews and analyses to offer a highly textured portrait of judgment in action in the all important foreign policy arena An up to the minute case on George W Bush and the war on terrorism applies good judgment theory to contemporary events

Foreign Policy Decision Making Martha Cottam, 2019-04-15 An analysis of decision making and negotiation in international relations this book offers a political psychological model of the images that compose policymakers world views Dr Cottam explores the limits these images impose on diplomatic adaptation to changes in the foreign policies of other states She evaluates established models of political

US Foreign Policy Decision-Making from Kennedy to Obama A. Hybel, 2014-03-13 This book analyzes the foreign policy decision making processes of Presidents John F Kennedy Lyndon B Johnson Richard Nixon George H W Bush George W Bush and Barack Obama during military intervention by way of contemporary foreign policy decision making models FPDMS

Explaining Foreign Policy Steve A. Yetiv, 2004-03-22 Scholars of international relations tend to prefer one model or another in explaining the foreign policy behavior of governments Steve Yetiv however advocates an approach that applies five familiar models rational actor cognitive domestic politics groupthink and bureaucratic politics Drawing on the widest set of primary sources and interviews with key actors to date he applies each of these models to the 1990 91 Persian Gulf crisis and to the U S decision to go to war with Iraq in 2003 Probing the strengths and shortcomings of each model in explaining how and why the United States decided to proceed with the Persian Gulf War he shows that all models with the exception of the government politics model contribute in some way to our understanding of the event No one model provides the best explanation but when all five are used a fuller and more complete understanding emerges In the case of the Gulf War Yetiv demonstrates the limits of models that presume rational decision making as well as the crucial importance of using various perspectives Drawing partly on the Gulf War case he also develops innovative theories about when groupthink can actually produce a positive outcome and about the conditions under which government politics will likely be avoided He shows that the best explanations for government behavior ultimately integrate empirical insights yielded from both international and domestic theory which scholars have often seen as analytically separate With its use of the Persian Gulf crisis as a teachable case study and

Watson,2007 brings together piercing analyses of the American presidency dealing with both current issues and historical events The compendia consists of the combined and rearranged issues of the journal *White House Studies* with the addition of a comprehensive subject index Preface *American Foreign Policy Towards the Colonels' Greece* Neovi M. Karakatsanis,Jonathan Swarts,2018-05-05 This book seeks to comprehensively analyze and document U S foreign policy toward a strategic Cold War ally that posed a stark challenge to the traditionally stated U S preference for democracy and political freedom It details the complex ways in which the U S reacted to that challenge and went about crafting policies of longer term accommodation with a regime it wished to retain as a close ally in a strategically important part of the world *Foreign Policy Decision-Making (Revisited)* R. Snyder,H. Bruck,B. Sapin,Valerie Hudson,2003-01-03 This classic work has helped shape the field of international relations and especially influenced scholars interested in how foreign policy is made At a time when conventional wisdom and traditional approaches are being questioned and when there is increased interest in the importance of process the insights of Snyder Bruck and Sapin have continuing and increased relevance Prescient in its focus on the effects on foreign policy of

individuals and their preconceptions organizations and their procedures and cultures and their values Foreign Policy Decision Making is of continued relevance for anyone seeking to understand the ways foreign policy is made Their seminal framework is here complemented by two new chapters examining its influence on generations of scholars the current state of the field and areas for future research The Road to War in Iraq: Comparative Foreign Policy Analysis Chris

Featherstone,2025-04-09 This book combines three Foreign Policy Analysis FPA models to explain both how and why the US and UK decided to invade Iraq in 2003 These three FPA models each examine a different but closely related aspect of the individual level of decision making Firstly Groupthink examines how pathologies of small group decision making affected the processes in the US and UK decision to invade Iraq Secondly the Leadership Style framework examines how the individual leader s style of exercising their leadership affected the navigation of the decision making process Thirdly analogical reasoning examines how decision makers frame their actions both in their own decision making and in how they present their decision to the wider public By achieving these objectives The Road to War contributes to the field of FPA and to our understanding of how the decision to invade Iraq was taken The comparative use of these FPA models within a single framework means that this book responds to the calls for multifactorial research within FPA proposing and testing a framework that provides more complex answers through adopting a multifactorial framework These more nuanced complex answers then reveal more about the role of the individuals involved in the decision to invade Iraq and how their cognition affected the process that led to the decision to invade **Roosevelt and the Munich Crisis** Barbara Reardon

Farnham,2021-03-09 Franklin Roosevelt s intentions during the three years between Munich and Pearl Harbor have been a source of controversy among historians for decades Barbara Farnham offers both a theory of how the domestic political context affects foreign policy decisions in general and a fresh interpretation of FDR s post Munich policies based on the insights that the theory provides Between 1936 and 1938 Roosevelt searched for ways to influence the deteriorating international situation When Hitler s behavior during the Munich crisis showed him to be incorrigibly aggressive FDR settled on aiding the democracies a course to which he adhered until America s entry into the war This policy attracted him because it allowed him to deal with a serious problem the conflict between the need to stop Hitler and the domestic imperative to avoid any risk of American involvement in a war Because existing theoretical approaches to value conflict ignore the influence of political factors on decision making they offer little help in explaining Roosevelt s behavior As an alternative this book develops a political approach to decision making which focuses on the impact that awareness of the imperatives of the political context can have on decision making processes and through them policy outcomes It suggests that in the face of a clash of central values decision makers who are aware of the demands of the political context are likely to be reluctant to make trade offs seeking instead a solution that gives some measure of satisfaction to all the values implicated in the decision

Leadership at the Crossroads Joanne B. Ciulla,Donelson R. Forsyth,Michael A. Genovese,George R. Goethals,Lori Cox

Han, Crystal L. Hoyt, 2008-10-30 What is leadership Not only has that question been debated since the beginning of human culture and society but it is a moving target based on the definer and the epoch The definition can be thought provoking and profound A leader is best when people barely know he exists not so good when people obey and acclaim him worse when they despise him Lao Tzu 6th century BC Or the profundity may lie shrouded in the prosaic A leader is one who has followers Peter Drucker 20th century However you define the concept today's challenges for leaders of all stripes are monumental and the need for effective leadership is huge More than anything this set travels farther and digs deeper than most leadership books It takes us from mere explanations of leadership to an understanding of it as part of the human condition Reading it should be at the top of the to do list for any leader in any era In *Leadership at the Crossroads* contributors from a wide variety of fields including management economics political science philosophy sociology history literature and psychology explore the many facets of leadership The set comprises Volume 1 Leadership and Psychology Volume 2 Leadership and Politics Volume 3 Leadership and the Humanities Collectively this set showcases traditional and emerging approaches to leadership in both theory and practice and raises new questions brought on by society's new challenges It also suggests solutions for developing and promoting leadership in the corporate world politics and diplomacy religion education non profits and the arts Whether identifying qualities that will serve a U S president well or the characteristics of the essential can do supervisor in today's corporation *Leadership at the Crossroads* supplies insights and intelligence that will help leaders make the most of the challenges and opportunities lying before them

History and Foreign Policy in France and Germany Ulrich Krotz, 2015-08-11 Why do states similar in size resources and capabilities significantly differ in their basic orientations and actions across major domains in foreign policy security and defense This book addresses this important question by analyzing the major differences between the foreign policies of France and Germany over extended periods of time *US Foreign Policy Decision-Making from Truman to Kennedy* A. Hybel, 2014-03-12 The book has three objectives to expose students to the ways different US presidents handled major foreign policy making problems to test the explanatory value of alternative decision making models And to reintroduce students to a wide range of critical US foreign policy issues

Decisionmaking on War and Peace Nehemia Geva, Alex Mintz, 1997 Reviewing comparing and contrasting models of foreign policy this volume focuses on the cognitive vs rational debate about decisionmaking on war and peace It provides alternative models of foreign policy choice and identifies when one strategy is more appropriate than another

Bureaucracies at War Tyler Jost, 2024-06-27 Rethinks how bureaucracy shapes foreign policy miscalculation is less likely when political leaders can extract quality information from the bureaucracy **Perceptions of China and White House Decision-Making, 1941-1963** Adam S.R. Bartley, 2019-11-26 This book assesses and evaluates the decision making behavior of United States presidents and their chief advisers from Roosevelt to Kennedy pertaining to China Seeking to dispel with the notion that each administration sought policy outcomes on the basis of a rational decision making model

Bartley highlights the contradictions of adopted presidential decision making processes and the nature of domestic politics as playing prejudicial and debilitating roles. The book demonstrates that elite decision making processes interacted with assumptions made about Chinese behavior interests and attitudes only superficially and in some cases not at all. Misinformation and misperception were the natural outcomes. Reinforced by the politics of McCarthyism at home, intellectual debate on China policy was squashed; parochialism and nuance were shunned and information was closed off. Ultimately, a divorce between the norm of behavior and the search for rational policy was registered in each administration. The net result was a lasting and destructive cognitive dissonance to fit expectations of a China reality constructed; information was ignored, overlooked, and distorted. Offering new insights into the China policies of consecutive administrations from 1941 to 1963, this volume will be of great interest to scholars and students of American foreign policy, security studies, and international relations.
