Neuropsychological Assessment Muriel Deutsch Lezak,Diane B. Howieson,Erin D. Bigler,Daniel Tranel,2012-03-27 Now in its Fifth Edition Neuropsychological Assessment reviews the major neurobehavioral disorders associated with brain dysfunction and injury This is the 35th anniversary of the landmark first edition As with previous editions this edition provides a comprehensive coverage of the field of adult clinical neuropsychology in a single source By virtue of the authors clinical and research specializations this book provides a broad based and in depth coverage of current neuroscience

research and clinical neuropsychology practice While the new edition is updated to include new features and topics it remains true to the highly regarded previous editions Methods for obtaining optimum data are given in the form of hypothesis testing techniques clinical tips and clinical examples In the seven years since the previous edition many advancements have been made in techniques for examining brain function and in our knowledge about brain behavior relationships For example a surge of functional imaging data has emerged and new structural imaging techniques have provided exquisite detail about brain structure For the first time this edition includes examples of these advancements many in stunning color This edition also includes new tools for clinicians such as a neuroimaging primer and a comparison table of the neuropsychological features of progressive dementias The chapters on assessment procedures include discussion of issues related to test selection and reviews of recently published as well as older test batteries used in general neuropsychological assessment plus newly developed batteries for specific issues

Ecological Validity of Neuropsychological Testing Robert J. Sbordone, Charles Long, 1996-01-11 Ecological validity the functional and predictive relationship between a patient's performance on a set of neuropsychological tests and their behavior in a variety of real world settings is emerging as a powerful tool Since neuropsychological data were not designed to be ecologically valid attempts to use the data in such a manner have been filled with pitfalls The authors present a strong argument for reevaluating existing tests and/or developing new measurements Special attention is given to specific functions such as the cognitive constructs of attention perception working memory language and executive function Additional consideration is given to the assessment of special populations children minorities substance abusers elderly and emotionally disturbed neurological populations One area in which neuropsychology can lend tremendous assistance is in predicting a client's ability to resume activities of daily living but more important when a client can return to work Ecological Validity of Neuropsychological Testing covers this issue extensively and details the role of vocational rehabilitation and the lack of exposure many within neuropsychology have to these specific needs of their clients
