Preventing Harmful Substance Use The Evidence Base For Policy And Practice:

Preventing Harmful Substance Use Tim Stockwell, Paul Gruenewald, John Toumbourou, Wendy Loxley, 2005-09-27 The prevention of harm from drug use both legal and illegal is a major concern to government departments and clinicians throughout the world. Recently much new research has been conducted regarding global levels and patterns of drug related harm on common risk factors with other social problems e.g. mental health, crime and on the effectiveness of a wide range of intervention strategies. There is a need to summarise and synthesise this new knowledge for use in a range of disciplines. **Preventing Harmful Substance Use** offers the most comprehensive and up to date advice available on the prevention of drug and alcohol abuse. Contributors provide authoritative science based reviews of knowledge on their areas of expertise and make clear recommendations for the future of prevention policy and practice. A final section draws the work together and offers a framework for an integrated science of prevention. **Adolescent Addiction** Cecilia A. Essau, Paul

Delfabbro, 2008-03-20 **Adolescent Addiction: Epidemiology, Assessment and Treatment** presents a comprehensive review of information on adolescent addiction including prevalence and co-morbidity rates, risk factors to addiction and prevention and treatment strategies. Unlike other books that may focus on one specific addiction, this book covers a wide range of addictions in adolescents including alcohol, cannabis, tobacco, eating, gambling, internet and video games, and sex addiction. Organized into three sections, the book begins with the classification and assessment of adolescent addiction. Section two has one chapter each on the aforementioned addictions, discussing for each the definition, epidemiology, risk factors, co-morbidity, course and outcome, and prevention and intervention. Section three discusses the assessment and treatment of co-morbid conditions in greater detail, as well as the social and political implications of adolescent addictions. Intended to be of practical use to clinicians treating adolescent addiction, the book contains a wealth of information that will be of use to the researcher as well. Contributors to the book represent the US, Canada, the UK, New Zealand, and Australia. About the Editor: Cecilia A. Essau is professor of developmental psychopathology at Roehampton University in London, UK. Specializing in child and adolescent psychopathology, she has been an author or editor of 12 previous books in child psychopathology and is author of over 100 research articles and book chapters in this area. Comprehensive with the state of the art information on important and the most common adolescent addictions. Easy to understand and organized chapters. Written by international experts.
