G. Stimpson, 2017-04-26 Excerpt from *Prevention of Disease and Care of the Sick* How to Keep Well and What to Do in Case of Sudden Illness To protect ourselves against disease it is necessary to know what agencies are harmful to the human body and what measures should be taken to protect the body from them It has been ascertained for instance that in order to keep well the temperature and humidity of the air in buildings must be regulated sewage must be disposed of in such a manner as not to contaminate the water supply or pollute the soil the body must be protected from the bites of insects which spread disease and precautions must be taken to prevent the transmission of

disease from one person to another It will thus be readily seen that freedom from disease depends upon conditions intimately associated with the body and its environment About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
