to create an entirely new psychology from the formless spiritual nature of which Syd Banks spoke and for which he himself even struggled to find words Furthermore this became a completely new psychology a true paradigm shift to the inside out which flew in the face of the traditional psychology accepted not only by the powers that be but by millions of people around the world who studied it and practice it And all this from one man s enlightenment experience in one moment of time which gradually rippled out affecting one person at a time who then affected others then others changing lives along the way and it still grows on into unimaginable futures
