Public Health Service. Office of the Surgeon General, 1989 *Protecting the Children* Raymond P. Lorion, 1990 Learn how to prevent emotional and behavioral disorders in children and adolescents

Protecting the Children provides readers with clear and informative descriptions of ten demonstrably effective strategies for promoting positive mental health among children. For planners and providers of children's mental health services, it offers an array of alternatives for responding to the needs of high risk children prior to the onset of problems. The carefully designed and meticulously researched programs, which can be adopted in communities around the nation, represent examples of the benefits to be achieved by attacking factors that place individuals at risk for disorders rather than the disorders themselves. The programs described include innovative educational practices to assist the intellectual development of children from poor and undereducated families; pregnancy and infancy nurse home visitations for families at social risk because of the mother's young age, single parent status, or poverty in order to improve prenatal health, habits of care of the child, and the psychosocial context of the family; a culture sensitive program designed to help low income Mexican American families enhance their children's school performance and reduce the incidence of their behavior problems; strategies developed to enhance self-esteem, provide emotional support, and assist children in understanding their parents' divorce; a broad based substance abuse prevention program that emphasizes self-improvement and the development of personal and social skills. The volume also provides evidence in support of those who argue that the nation's policymakers must appreciate the value of preventive interventions in serving the needs of children and adolescents. Prevention oriented health care professionals and service providers, policymakers involved in planning services for low income and high risk populations, community psychologists, and clinical child psychologists who focus on the needs of high risk populations will find this provocative book a necessary addition to their professional libraries.

*Families as Nurturing Systems* Donald G. Unger, Douglas Powell, 2014-01-14 Here is a major new volume for practitioners, researchers, and those concerned with future policies to promote the welfare of children and families. The patterns of support and the ability of family members to care for each other have changed along with the problems for the health and functioning of families. In *Families as Nurturing Systems*, respected scholars examine the new and emerging directions in the design and implementation of family resources and support programs. They describe and analyze a wide range of program models in the areas of prevention, social support, family resource, and empowerment that have been implemented in schools, the Afro-American church, early intervention programs, the workplace, and the public policy arena, reflecting the needs of families at different stages in the family life cycle.

**Traumatic Stress and Its Aftermath** Sandra Lee, 2013-09-13 Explore the aftermath of traumatic stress as it affects various populations, including therapists themselves. This book will educate you about the aftermath of traumatic stress as it impacts people in a variety of settings. It explores the factors that lead to increased or reduced vulnerability to the effects of traumatic stress, emphasizing the impact of cumulative, multiple trauma rather than the effects of a single traumatic incident, to help you design and implement effective prevention and intervention programs. The specific populations and groups addressed in this important book include adolescent girls involved in armed conflict in Colombia's guerilla war, urban African American youth, a theoretical model for
