Homeostasis and Toxicology of Non-essential Metals Chris M. Wood, Anthony Peter Farrell, Colin J. Brauner, 2012 Homeostasis and Toxicology of Non Essential Metals synthesizes the explosion of new information on the molecular cellular and organismal handling of metals in fish in the past 15 years These elements are no longer viewed by fish physiologists as heavy metals that kill fish by suffocation but rather as interesting moieties that enter and leave fish by specific pathways which are subject to physiological regulation The metals featured in this volume are those about which there has been most public and scientific concern and therefore are those most widely studied by fish researchers Metals such as Ag Al Cd Pb Hg As Sr and U have no known nutritive function in fish at present but are toxic at fairly low levels The companion volume Homeostasis and Toxicology of Essential Metals Volume 31A covers metals that are either proven to be or are strongly suspected to be essential in trace amounts yet are toxic in higher doses Metals such as Cu Zn Fe Ni Co Se Mo and Cr In addition three chapters in Volumes 31A and 31B on Basic Principles Chapter 1 31A Field Studies and Ecological Integration Chapter 9 31A and Modeling the Physiology and Toxicology of Metals Chapter 9 31B act as integrative summaries and make these two volumes a vital set for readers All major essential metals of interest are covered in metal specific chapters Each metal specific chapter is written by fish physiologists toxicologists who are recognized authorities for that metal A common format is featured throughout this two volume edition *Cultural Seeds: Essays on the Work of Nick Cave* Tanya Dalziel, Karen Welberry, 2016-05-13 Nick Cave is now widely recognized as a songwriter musician novelist screenwriter curator critic actor and performer From the band The Boys Next Door 1976 1980 to the spoken word recording The Secret Life of the Love Song 1998 to the recently acclaimed screenplay of The Proposition 2005 and the Grinderman project 2008

Cave's career spans thirty years and has produced a comprehensive and sometimes controversial body of work that has shaped contemporary alternative culture. Despite intense media interest in Cave, there have been remarkably few comprehensive appraisals of his work, its significance, and its impact on understandings of popular culture. In addressing this absence, the present volume is both timely and necessary. *Cultural Seeds* brings together an international range of scholars and practitioners, each of whom is uniquely placed to comment on an aspect of Cave's career. The essays collected here not only generate new ways of seeing and understanding Cave's contributions to contemporary culture but set up a dialogue between fields all too often separated in the academy and in the media. Topics include Cave and the Presley myth, the aberrant masculinity projected by *The Birthday Party*, the postcolonial Australian-ness of his humour, his interventions in film, and his erotics of the sacred. These essays offer compelling insights and provocative arguments about the fluidity of contemporary artistic practice.

Language, Cognition, and Computational Models Thierry Poibeau, Aline Villavicencio, 2018-01-25 How do infants learn a language? Why and how do languages evolve? How do we understand a sentence? This book explores these questions using recent computational models that shed new light on issues related to language and cognition. The chapters in this collection propose original analyses of specific problems and develop computational models that have been tested and evaluated on real data. Featuring contributions from a diverse group of experts, this interdisciplinary book bridges the gap between natural language processing and cognitive sciences. It is divided into three sections focusing respectively on models of neural and cognitive processing, data-driven methods, and social issues in language evolution. This book will be useful to any researcher and advanced student interested in the analysis of the links between the brain and the language faculty.
