

OUTPATIENT ICD-9-CM

ICD-9-CM is a classification system for medical diagnoses and procedures. It is used by healthcare providers to communicate with each other and with insurance companies. The ICD-9-CM code is a five-digit number that identifies a specific diagnosis or procedure. The first three digits represent the category, and the last two digits represent the specific code.

The ICD-9-CM code is used to identify the patient's condition and to determine the appropriate treatment. It is also used to bill for services and to track the quality of care. The ICD-9-CM code is a key component of the medical record and is used by healthcare providers to communicate with each other and with insurance companies. Compliance for Coding, Billing & Reimbursement, 2nd Edition Duane C. Abbey, 2008-04-02 While the vast majority of providers never intend to commit fraud or file false claims complex procedures changing regulations and evolving technology make it nearly impossible to avoid billing errors For example if you play by HIPAA's rules a physician is a provider however Medicare requires that the same physician must be referred to as a supplier Even more troubling is the need to alter claims to meet specific requirements that may conflict with national standards Far from being a benign issue differing guidelines can lead to false claims with financial and even criminal implications Compliance for Coding Billing Reimbursement Second Edition A Systematic Approach to Developing a Comprehensive Program provides an organized way to deal with the complex coding billing and reimbursement CBR processes that seem to force providers to choose between being paid and being compliant Fully revised to account for recent changes and evolving terminology this unique and accessible resource covers statutorily based programs and contract based relationships as well as ways to efficiently handle those situations that do not involve formal relationships Based on 25 years of direct client consultation and drawing on teaching techniques developed in highly successful workshops Duane Abbey offers a logical approach to CBR
