Principles Of Descartes Philosophy:

René Descartes: Principles of Philosophy, 2012-12-06 Descartes's *Principles of Philosophy* is his longest and most ambitious work; it is the only work in which he attempted to actually deduce scientific knowledge from Cartesian metaphysics as he repeatedly claimed was possible. Whatever the success of this attempt, there can be no doubt that it was enormously influential. Cartesian celestial mechanics held sway for well over a century, and some of the best minds of that period, including Leibniz, Malebranche, Euler, and the Bernoullis, attempted to modify and quantify the Cartesian theory of vortices into an acceptable alternative to Newton's theory of universal gravitation. Thus, the *Principles* is not only of inherent and historical interest philosophically but is also a seminal document in the history of science and of 17th Century thought. *Principles of Philosophy* was first published in Latin in 1644. In 1647, a French translation done by the Abbe Claude Picot and containing a great deal of additional material and a number of alterations in the original text was published with Descartes's enthusiastic approval. Unlike some English translations of portions of the *Principles*, this translation uses the Latin text as its primary source; however, a good deal of additional material from Picot's translation has been included. There are several reasons for this. First, there is good evidence that Descartes himself was responsible for some of the additional material, including of course the Preface to the French translation. *René Descartes: Principles of Philosophy* René Descartes, 1984

Selections from the *Principles of Philosophy* René Descartes
Translated by John Veitch. *Principles of Philosophy* is a book by René Descartes. In essence, it is a synthesis of the *Discourse on*

Method and Meditations on First Philosophy It was written in Latin published in 1644 and dedicated to Elisabeth of Bohemia with whom Descartes had a long standing friendship A French version Les Principes de la Philosophie followed in 1647 It set forth the principles of nature the Laws of Physics as Descartes viewed them Most notably it set forth the principle that in the absence of external forces an object's motion will be uniform and in a straight line Newton borrowed this principle from Descartes and included it in his own Principia to this day it is still generally referred to as Newton's First Law of Motion The book was primarily intended to replace the Aristotelian curriculum then used in French and British Universities The work provides a systematic statement of his metaphysics and natural philosophy and represents the first truly comprehensive mechanistic account of the universe

The Principles of Descartes' Philosophy Benedictus de Spinoza, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1905 edition Excerpt futile arguments but two things need to be kept in mind 1 The distinction between duration and eternity and 2 that the former without created objects and the latter without God are non intelligible These things being kept in mind it is easy to answer all these arguments So we need delay no longer upon this point Chapter XL Concerning the Concurrence of God About this attribute of God little or nothing remains to be said after we have shown that each single moment God creates things as if anew From this we have shown that objects have no power of self determination or of operation in themselves And this holds true in the human will as well as in all other objects Then we replied to certain arguments pertaining to this And although many other objections are often raised since these relate more especially to Theology we shall not discuss them here Nevertheless since there are many who admit and believe in this conserving power of God but in a different sense from us we shall recall what has already been proven in order that we may detect this fallacy We have already clearly shown that present time has no connection with future time Vid Ax 10 Pt I Provided we consistently remember this we shall be able without difficulty to reply to all the objections of these philosophers ZnfectsTMTM But lest we take up this subject in DEGREEStng Mngs without result we will reply in passing to the inquiry whether an additional element of God's power is needed to begin some action in things When speaking of motion this same question appeared and we then gave our answer For we said that God constantly preserves the same amount of motion in nature If therefore we consider the total amount of matter in motion nothing is added
