section has over 500 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about American history

An Empire of Print Steven Carl Smith, 2017-06-20 Home to the so called big five publishers as well as hundreds of smaller presses renowned literary agents a vigorous arts scene and an uncountable number of aspiring and established writers alike New York City is widely perceived as the publishing capital of the United States and the world This book traces the origins and early evolution of the city's rise to literary preeminence Through five case studies Steven Carl Smith examines publishing in New York from the post Revolutionary War period through the Jacksonian era He discusses the gradual development of local regional and national distribution networks assesses the economic relationships and shared social and cultural practices that connected printers booksellers and their customers and explores the uncharacteristically modern approaches taken by the city's preindustrial printers and distributors If the cultural matrix of printed texts served as the primary legitimating vehicle for political debate and literary expression Smith argues then deeper understanding of the economic interests and political affiliations of the people who produced these texts gives necessary insight into the emergence of a major American industry Those involved in New York's book trade imagined for themselves like their counterparts in other major seaport cities a robust business that could satisfy the new nation's desire for print and many fulfilled their ambition by cultivating networks that crossed regional boundaries delivering books to the masses A fresh interpretation of the market economy in early America *An Empire of Print* reveals how New York started on the road to becoming the publishing powerhouse it is today

Precarious Liberation Franco Barchiesi, 2011-06-01 Winner of the 2012 CLR James Award presented by the Working Class Studies Association Millions of black South African workers struggled against apartheid to redeem employment and production from a history of abuse insecurity and racial despotism Almost two decades later however the prospects of a dignified life of wage earning work remain unattainable for most South Africans Through extensive archival and ethnographic research Franco Barchiesi documents and interrogates this important dilemma in the country's democratic transition economic participation has gained centrality in the government's definition of virtuous citizenship and yet for most workers employment remains an elusive and insecure experience In a context of market liberalization and persistent social and racial inequalities as jobs in South Africa

become increasingly flexible fragmented and unprotected they depart from the promise of work with dignity and citizenship rights that once inspired opposition to apartheid Barchiesi traces how the employment crisis and the responses of workers to it challenge the state's normative imagination of work and raise decisive questions for the social foundations and prospects of South Africa's democratic experiment **Bulletin of the International Bureau of the American Republics** Pan American Union,1905 **Three Years of the Czechoslovak Republic** Aleš Brož,1921 **Technology and Science in the People's Republic of China** Jon Sigurdson,2013-10-22 Technology and Science in the People's Republic of China An Introduction tackles several areas of concerns in the technological development of China The title covers China's research structure scientific resources and technological priorities The text first reviews contemporary China and then proceeds to discussing Chinese history Next the selection talks about China's objective and policies The text also covers the Chinese research organizations along with education and training Chapter 7 tackles the basic and applied science in China while Chapter 8 details mass science The next chapter talks about China's policy on environmental protection The tenth chapter covers electronics and the last chapter tackles the future of Chinese technology The book will be of great use to readers who have an interest in Chinese technological progress *Library Catalogue: Subject catalogue* University of London.
