Printing History and Cultural Change Richard Wendorf, 2022 This study provides one of the most detailed and comprehensive examinations ever devoted to a critical transformation in the material substance of the printed page it carries out this exploration in the history of the book moreover by embedding these typographical changes in the context of other cultural phenomena in eighteenth century Britain The gradual abandonment of pervasive capitalization italics and caps and small caps in books printed in London Dublin and the American colonies between 1740 and 1780 is mapped in five year increments which reveal that the appearance of the modern page in English began to emerge around 1765 This descriptive and analytical account focuses on poetry classical texts Shakespeare contemporary plays the novel the Bible the Book of Common Prayer sermons and religious writings newspapers magazines anthologies government publications and private correspondence it also examines the reading public canon formation editorial theory and practice and the role of typography in textual interpretation These changes in printing conventions are then compared to other aspects of cultural change the adoption of the Gregorian calendar in 1752 the publication of Johnson's Dictionary in 1755 the transformation of shop signs and the imposition of house numbers in London beginning in 1762 and the evolution of the English language and of English prose style This study concludes that this fundamental shift in printing conventions was closely tied to a pervasive interest in refinement regularity and standardization in the second half of the century and that it was therefore an important component in the self-conscious process of modernizing British culture publisher's website *The Compositor's Text-book, Or, Instructions in the Elements of the Art of Printing* John Graham, 1848 *Graphic Design, Print Culture, and the Eighteenth-Century Novel* Janine Barchas, 2003-06-05 The uniformity of the eighteenth century novel in today's paperbacks and critical editions no longer conveys the early novel's visual exuberance Janine Barchas explains how during the genre's formation in the first half of the eighteenth century the novel's material embodiment as printed book rivalled its narrative content in diversity and creativity Innovations in layout ornamentation and even punctuation found in for example the novels of Richardson an author who printed his own books help shape a tradition of early visual ingenuity From the beginning of the novel's emergence in Britain prose writers including Daniel Defoe Jonathan Swift and Henry and Sarah Fielding experimented with the novel's appearance Lavishly illustrated with more than 100 graphic features found in eighteenth

century editions this important study aims to recover the visual context in which the eighteenth century novel was produced and read *The Inland Printer* ,1888
