The Renaissance Computer Jonathan Sawday,Neil Rhodes,2002-09-11 Some of today s foremost Renaissance scholars look afresh at the remarkable products of the first age of print and explore how these anticipated many of the conditions of the present digital age "Prints in Translation, 1450?750 " EdwardH. Wouk,2017-07-05 Printed artworks were often ephemeral but in the early modern period exchanges between print and other media were common setting off chain reactions of images and objects that endured Paintings sculpture decorative arts musical or scientific instruments and armor exerted their own influence on prints while prints provided artists with paper veneers templates and sources of adaptable images This interdisciplinary collection unites scholars from different fields of

art history who elucidate the agency of prints on more traditionally valued media and vice versa Contributors explore how after translations across traditional geographic temporal and material boundaries original meanings may be lost reconfigured or subverted in surprising ways whether a Netherlandish motif graces a cabinet in Italy or the print itself colored or copied is integrated into the calligraphic scheme of a Persian royal album These intertwined relationships yield unexpected yet surprisingly prevalent modes of perception Andrea Mantegna's 1470-1500 Battle of the Sea Gods an engraving that emulates the properties of sculpted relief was in fact reborn as relief sculpture and fabrics based on print designs were reapplied to prints returning color and tactility to the very objects from which they derived Together the essays in this volume witness a methodological shift in the study of print from examining the printed image as an index of an absent invention in another medium a painting sculpture or drawing to considering its role as a generative active agent driving modes of invention and perception far beyond the locus of its production
