Assisting Russia's Transition Gianni Zanini, 2002-01-01 This evaluation assesses the development effectiveness of the World Bank's lending and non lending assistance to the Russian Federation since 1991 a 10 year period of tumultuous political economic and social change This report concludes that an assistance strategy concentrating on analytical and advisory services with limited financial support for Russia would have been more appropriate than one involving large volumes of adjustment lending

The Global Environmental Benefits of Land Degradation Control on Agricultural Land Stefano Pagiola, 1999-01-01 This book focuses on the global effects of land degradation but emphasizes other important levels of land degradation at the field level it may result in reduced productivity at the national level it may cause flooding and sedimentation and at the global level it can contribute to climate changes damaging bio diversity and international waters The effects on climate changes are explored and the report questions the extent to which land degradation on agricultural land affects climate change Does it increase emissions of greenhouse gases Does it affect land's capacity to serve as a carbon sink Can appropriate management enhance both land's productivity and its capacity to store carbon The carbon cycle in soils is analyzed indicating land degradation is likely to reduce the ability of soils to serve as carbon sink and release stored carbon into the atmosphere and bio diversity effects are likely to be adverse Global benefits of land degradation control include afforestation to allow increased carbon sequestration and provide adequate bio diversity habitats and community based wildlife management can provide alternatives to some marginal areas Although integrating global dimensions into land degradation control projects may reverse the field level or national problems it is causing difficulties and constraints will likely contribute to the failure of these projects

Pollution Abatement Strategies in Central and Eastern Europe Michael A. Toman, 2014-04-04 Protecting environmental quality while pursuing economic development poses a particularly difficult challenge to the countries of Central and Eastern Europe where political and economic systems are changing rapidly following decades of environmental neglect and economic mismanagement Advanced industrial nations also face difficult decisions about priorities and procedures for providing financial assistance to the region In order to identify workable solutions Pollution Abatement Strategies in Central and Eastern Europe investigates some of the leading pollution problems that these countries now face and examines the link between economic restructuring and environmental improvement Contributors to the volume assess the changes in the region's environmental conditions

likely to result from economic restructuring and the benefits that might arise from improvements They also consider the design of effective environmental policies for economies in transition including the need to introduce or reform basic economic legal and regulatory constructs Comparisons of incentive based versus command and control environmental policies suggest that despite the difficulties in implementing them incentive based policy options are worth pursuing in Central and Eastern Europe
