## **Prisons And The Problem Of Order:**

**Prisons and the Problem of Order** Bottoms Hay Sparks, Richard Sparks, Richard Franklin Sparks, A. E. Bottoms, Will Hay, 1996 This book presents a substantial new statement on the character of social life in confinement Drawing upon extensive fieldwork in two contrasting English maximum security prisons the authors systematically compare this institutional order including the differing control strategies deployed in each as seen by both custodians and captives controllers and controlled The authors discuss the implications of their research for the tradition of sociological concern within the prison community They re examine the resources of that rich but latterly somewhat dormant field in the light of some of the main currents in contemporary social theory and thereby provide a new perspective on the problem of order in maximum custody This book will have significant policy implications and it will be required reading for scholars and students in criminology and criminal justice as well as for administrators and reformers in penal system *Crime, Justice, and Social Order* Alison Liebling, Joanna Shapland, Richard Sparks, Justice Tankebe, 2022 Clarendon Studies in Criminology aims to provide a forum for outstanding empirical and theoretical work in all aspects of criminology and criminal justice broadly understood The Editors welcome submissions from established scholars as well as excellent PhD work The Series was inaugurated in 1994 with Roger Hood as its first General Editor following discussions between Oxford University Press and three criminology centres It is edited under the auspices of these three criminological centres the Cambridge Institute of Criminology the Mannheim Centre for Criminology at the London School of Economics and the Center for Criminology at the University of Oxford Each supplies members of the Editorial Board and in turn the Series Editor Book jacket **Prison Violence** Kimmett Edgar, Ian O'Donnell, Carol Martin, 2014-02-04 Prisons are dangerous places and assaults threats theft and verbal abuse are pervasive attributable both to the characteristics of the captive population and to an institutional sub culture which promotes violence as a means of resolving conflicts Yet the crimes perpetrated by prisoners on other prisoners have attracted little interest and criminological research has contributed little to an understanding of situations in which violence arises in penal institutions This book seeks to remedy this and to address and answer a number of key questions how do features of the prison social setting shape conflicts what social norms guide the decision to use violence what are the personal and social consequences of spending months or years in places where distrust and anxiety are normal how do staff respond to the dangers that are part of daily life in many prisons is it possible to identify factors associated with risk and resilience and what methods of handling conflicts do prisoners use that could prevent violence Prison Violence adopts a distinctive approach to answering these questions and is based on extensive research including interviews with both victims and perpetrators of prison violence it pioneers a conflict centred approach seeking to understand the pathways into and out of situations where there is potential for violence focusing on interpersonal and institutional dynamics rather than on individual psychological factors *Handbook on Moving Corrections and Sentencing Forward* Pamela K. Lattimore, Beth M.

Huebner, Faye S. Taxman, 2020-11-10 This volume addresses major issues and research in corrections and sentencing with the goal of using previous research and findings as a platform for recommendations about future research evaluation and policy The last several decades witnessed major policy changes in sentencing and corrections in the United States as well as considerable research to identify the most effective strategies for addressing criminal behavior These efforts included changes in sentencing that eliminated parole and imposed draconian sentences for violent and drug crimes The federal government followed by most states implemented sentencing guidelines that greatly reduced the discretion of the courts to impose sentences The results were a multifold increase in the numbers of individuals in jails and prisons and on community supervision increases that have only recently crested There were also efforts to engage prosecutors and the courts in diversion and oversight including the development of prosecutorial diversion programs as well as a variety of specialty courts Penal reform has included efforts to understand the transitions from prison to the community including federal led efforts focused on reentry programming Community corrections reforms have ranged from increased surveillance through drug testing electronic monitoring and in some cases judicial oversight to rehabilitative efforts driven by risk and needs assessment More recently the focus has included pretrial reform to reduce the number of people held in jail pending trial efforts that have brought attention to the use of bail and its disproportionate impact on people of color and the poor This collection of chapters from leading researchers addresses a wide array of the latest research in the field A unique approach featuring responses to the original essays by active researchers spurs discussion and provides a foundation for developing directions for future research and policymaking Understanding and Reducing Prison Violence Benjamin Steiner, John

Wooldredge, 2019-12-06 Understanding and Reducing Prison Violence considers both the individual and prison characteristics associated with violence perpetration and violent victimization among both prison inmates and staff Prison violence is not a random process rates of violence vary across prisons and the odds of perpetrating violence or experiencing violent victimization vary across inmates and staff A comprehensive understanding of the causes of prison violence therefore requires consideration of both individual and prison characteristics Building on large dataset comprising 5 500 inmates and 1 800 officers across 45 prisons located across two of the United States Ohio and Kentucky this book showcases one of the largest and most comprehensive studies of prisons carried out to date It considers both the implications of the study for theories of prison violence and the implications of the study for preventing violence in prisons It will be of interest to academics practitioners and policy makers alike **Prisons, Punishment and the Pursuit of Security** D.

Drake, 2012-07-25 Drawing on research in men's long term maximum security prisons this book examines three interconnected problems the tendency of the prison to obscure other social problems and conceal its own failings the pursuit of greater levels of human security through repressive and violent means and the persistence of the belief in the problem of evil *Respect and Criminal Justice* The Shaw Foundation Fellow in Law Gabrielle Watson, 2019-12-31 *Respect and Criminal*

Justice offers the first sustained examination of respect in criminal justice in England and Wales where the value is elusive but of persisting significance Advancing a critique of the respect deficit in policing and imprisonment the book is concerned with the ways in which both institutions are merely constrained and not characterised by respect It emerges that they appeal to the word respect relying on its0inclusive ethos in official discourse when it is expedient to do so but rarely and only superficially address the prior question of what it is to respect and be respected The result is that respect is more akin to a slogan than a foundational value of criminal justice practice 0The book will be of interest to academics and students across the humanities and social sciences and especially in law criminal justice and philosophy as well as criminal justice practitioners and policymakers
