Herbert M. Levine

Privacy Card A Low Cost Strategy To Combat Terrorism:

The Privacy Card Joseph W. Eaton,2003 The idea of a national ID card has been hotly debated for years but in the wake of September 11th its time may finally have come

Information Ethics Lee Freeman,A. Graham Peace,2005-01-01 Information Ethics provides an up to date discussion of the main ethical issues that face today s information intensive society including the areas of intellectual property rights privacy accessibility and censorship

How Patriotic is the Patriot Act? Amitai Etzioni,2005-06-29 In this short book Etzioni the well known and respected public intellectual and communitarian thinker charts a middle course or third way between those who are committed to shore up our liberties but blind to the needs of public security as well as those who never met a right they are not willing to curtail to give authorities an even freer hand This book will prove a useful guide for citizens looking for a thought provoking well reasoned and sober analysis of one of the hot button issues of our time

Winter Warfare Richard N. Armstrong,Joseph G. Welsh,2014-06-03 Based on German and Soviet military archival material this book provides an insight into the tactics and planning for combat in a winter climate It also studies the mechanisms for change in an army during the course of battle The first part of the book looks at the tactical pamphlet People s Commissar for Defence Order No 109 as passed by Red Army units on 4 March 1941 which provided regulations for combat in Winter The second part of the book using material from the Soviet military archives reveals Red Army General Staff supplements to the winter regulation

Documenting Americans Magdalena Krajewska,2017-10-12 This is the first and only comprehensive book length political history of national ID card proposals and developments in identity policing in the United States The book focuses on the period from 1915 to 2016 including the post 9 11 debates and policy decisions regarding the introduction of technologically advanced identification documents Putting the United States in comparative perspective and connecting the vital issues of immigration and homeland security Magdalena Krajewska shows how national ID card proposals have been woven into political conflict across a variety of policy fields Findings contradict conventional wisdom debunking two common myths that Americans are opposed to national ID cards and that American policymakers never propose national ID cards Dr Krajewska draws on extensive archival research high level interviews with politicians policymakers and ID card technology experts in Washington DC and London and public opinion polls

The American Title Insurance Industry Joseph W Eaton,David Eaton,2007-08-01 After World War II banks and other mortgage lenders began requiring insurance to protect them against flawed or defective real estate titles Over the past sixty years the title insurance industry has grown steadily in size power and secrecy policies are available for both lenders and property owners and many title insurers offer an array of other real estate services such as escrow and appraisal Yet details about the industry s operational procedures remain closely guarded from public exposure In *The American Title Insurance Industry* Joseph and David Eaton present evidence that improvements in recordkeeping over the last sixty years particularly the advent of computers have reduced the likelihood of a defective title going unnoticed in a property transaction But the

industry's flaws run deeper than mere obsolescence in most states title insurers are allowed to engage in anticompetitive business practices including price fixing Among the findings in this meticulously researched study are instances of insurers charging premiums well above the amount necessary to compensate them for assuming the risk of defect and identical policies with identical risk that vary in price by hundreds of percentage points for different geographic locations The authors also examine the widely ignored role that the federal and most state governments play in perpetuating the title insurance industry's unfair practices Whereas most private industries prefer as little government intervention as possible title insurers welcome it Federal statute exempts title insurers from anti-trust liability opening the door for price fixing and destroying any semblance of free market competition or market power for consumers A landmark study for elected officials and all those involved in the insurance real estate and brokerage industries The American Title Insurance Industry brings to light a long neglected problem and offers suggestions for how it might be remedied Point-counterpoint Herbert M. Levine, 2004 Designed to stimulate critical thinking and discussion by debating issues in the U.S. political system POINT COUNTERPOINT makes a stirring supplement to any Introductory American Government course By presenting two sides of an issue the reader illustrates to students just how important politics are to deciding key issues This diverse collection contains articles by political figures scholars and writers on such hotly contested issues as affirmative action racial profiling presidential war powers and globalization Civil Liberties Auriana Ojeda, 2004 Technological advancements and national security efforts have stimulated debate on civil liberties The authors in this anthology examine whether or not the basic rights guaranteed by the U.S. Constitution such as the freedoms of speech press and religion and the rights to due process privacy and equal protection under the law are threatened and if so how the government and the courts should respond *Terrorist Organisations of the World* Niranjana Dass, 2005 **Protecting Individual Privacy in the Struggle Against Terrorists** National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Division on Behavioral and Social Sciences and Education, Committee on National Statistics, Committee on Law and Justice, Committee on Technical and Privacy Dimensions of Information for Terrorism Prevention and Other National Goals, 2008-10-26 All U.S. agencies with counterterrorism programs that collect or mine personal data such as phone records or Web sites visited should be required to evaluate the programs effectiveness lawfulness and impacts on privacy A framework is offered that agencies can use to evaluate such information based programs both classified and unclassified The book urges Congress to re-examine existing privacy law to assess how privacy can be protected in current and future programs and recommends that any individuals harmed by violations of privacy be given a meaningful form of redress Two specific technologies are examined data mining and behavioral surveillance Regarding data mining the book concludes that although these methods have been useful in the private sector for spotting consumer fraud they are less helpful for counterterrorism because so little is known about what patterns indicate terrorist activity Regarding behavioral surveillance

in a counterterrorist context the book concludes that although research and development on certain aspects of this topic are warranted there is no scientific consensus on whether these techniques are ready for operational use at all in counterterrorism

Decoding **Privacy Card A Low Cost Strategy To Combat Terrorism**: Revealing the Captivating Potential of Verbal Expression

In an era characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force.
