Private Moon:

Moon's Breath and Magick Lynn Capani-Czebiniak, 2019-12-20 Lynn Capani Czebiniak is passionate about bringing the living goddess into the lives of all who may know of her but have not yet found a way to integrate her love and compassion into their lives. Within a semiautobiographical presentation, Lynn shares original goddess creations accompanied by explanations and details of her own intimate experiences with each goddess, including Abuk Morpheus, Gaia, Kwan Yin, Mare Mayde, and many more. While encouraging others to invite the Goddess presence into our beings to learn everything we can about her and the gentler way of life, she exemplifies. Lynn also provides ways our studies of goddesses can guide us to implement positive changes through meditation, mindful purpose, and reverence, ultimately letting go of what no longer serves us and finding our way back to renewal. Moon's Breath and Magick shares original illustrations and personal insights that celebrate the resurgence of the Goddess while exemplifying the Goddess in each of us. **Protection of Cultural Heritage**

Sites on the Moon Annette Froehlich, 2020-04-03 This book provides an extensive overview of the protection of cultural heritages sites on the Moon, humanity's lunar heritage, and the various threats they face. First of all, the international legal framework, especially the relevant space treaties, are analyzed in terms of how they protect cultural heritages sites on the Moon. In turn, the book explores key aspects like the application of customary law, the UNESCO World Heritage Convention, or the Underwater Convention, and the possibility of adding these sites to UNESCO's World Heritage list. The book subsequently addresses the question of how to define culture heritage sites or artifacts in particular in view of the Outstanding Universal Value criterion, which is a vital aspect in order to differentiate them from space garbage or even space threats. Lastly, the book proposes and elaborates on various protection systems and multilateral protection regulations. Especially now, 50 years after the first human landing on the Moon, the book is a timely publication that will be of interest to all scholars and professionals working in the space field. **Scramble for the Skies** Namrata Goswami, Peter A. Garretson, 2020-10-06 With

a focus on China, the United States, and India, this book examines the economic ambitions of the second space race. The authors argue that space ambitions are informed by a combination of factors, including available resources, capability, elite preferences, and talent pool. The authors demonstrate how these influences affect the development of national space programs as well as policy and law. Unexpected Art Jenny Moussa Spring, 2015-03-17
