A Ragged Schooling Robert Roberts, 1999 With great humour and vitality Robert Roberts evokes his Edwardian childhood in this vivid portrait of a vanished community Breathing the smoke from factory chimneys the children of Salford struggled daily to survive the poverty that surrounded them Sharing lively games along the railway lines and canal banks their lives were rich in experience and comradeship

Popular Children's Literature in Britain Julia Briggs, Dennis Butts, 2016-12-05 The astonishing

success of J K Rowling and other contemporary children's authors has demonstrated how passionately children can commit to the books they love. But this kind of devotion is not new. This timely volume takes up the challenge of assessing the complex interplay of forces that have created the popularity of children's books both today and in the past. The essays collected here ask about the meanings and values that have been ascribed to the term popular. They consider whether popularity can be imposed or if it must always emerge from children's preferences. And they investigate how the Harry Potter phenomenon fits into a repeated cycle of success and decline within the publishing industry. Whether examining eighteenth century chapbooks, fairy tales, science schoolbooks, Victorian adventures, waif novels or school stories, these essays show how historical and publishing contexts are vital in determining which books will succeed and which will fail, which bestsellers will endure and which will fade quickly into obscurity. As they consider the fiction of Angela Brazil, Enid Blyton, Roald Dahl and J K Rowling, the contributors carefully analyse how authorial talent and cultural contexts combine in often unpredictable ways to generate and sometimes even sustain literary success.

Class, Politics, and the Decline of Deference in England, 1968-2000 Florence Sutcliffe-Braithwaite, 2018-03-01. In late twentieth century England, inequality was rocketing, yet some have suggested that the politics of class was declining in significance, while others argue that class identities lost little power. Neither interpretation is satisfactory: class remained important to ordinary people's narratives about social change and their own identities throughout the period 1968-2000, but in changing ways. Using self-narratives drawn from a wide range of sources – the raw materials of sociological studies, transcripts from oral history projects, Mass Observation and autobiography – the book examines class identities and narratives of social change between 1968 and 2000, showing that by the end of the period class was often seen as an historical identity related to background and heritage, and that many felt strict class boundaries had blurred quite profoundly since 1945. Class snobberies went underground as many people from all backgrounds began to assert that what was important was authenticity, individuality and ordinariness. In fact, Sutcliffe-Braithwaite argues that it is more useful to understand the cultural changes of these years through the lens of the decline of deference, which transformed people's attitudes towards class and towards politics. The study also examines the claim that Thatcher and New Labour wrote class out of politics, arguing that this simple and highly political narrative misses important points. Thatcher was driven by political ideology and necessity to try to dismiss the importance of class, while the New Labour project was good at listening to voters, particularly swing voters in marginal seats, and echoing back what they were increasingly saying about the blurring of class lines and the importance of ordinariness. But this did not add up to an abandonment of a majoritarian project, as New Labour reoriented their political project to emphasize using the state to empower the individual.

Crime Control and Everyday Life in the Victorian City David Churchill, 2017-12-29. The history of modern crime control is usually presented as a narrative of how the state wrested control over the governance of crime from the civilian public. Most accounts trace the decline of a participatory, discretionary culture of crime control in the early modern era and its replacement by a centralized

bureaucratic system of responding to offending The formation of the new professional police forces in the nineteenth century is central to this narrative henceforth it is claimed the priorities of criminal justice were to be set by the state as ordinary people lost what authority they had once exercised over dealing with offenders This book challenges this established view and presents a fundamental reinterpretation of changes to crime control in the age of the new police It breaks new ground by providing a highly detailed empirical analysis of everyday crime control in Victorian provincial cities revealing the tremendous activity which ordinary people displayed in responding to crime alongside a rich survey of police organization and policing in practice With unique conceptual clarity it seeks to reorient modern criminal justice history away from its established preoccupation with state systems of policing and punishment and move towards a more nuanced analysis of the governance of crime More widely the book provides a unique and valuable vantage point from which to rethink the role of civil society and the state in modern governance the nature of agency and authority in Victorian England and the historical antecedents of pluralized modes of crime control which characterize contemporary society

Labour's Apprentices

Michael J. Childs, 1994-11 The three decades before the First World War witnessed significant changes in the working life home life and social life of adolescent English males In *Labour's Apprentices* Michael Childs suggests that the study of such age specific experiences provides vital clues to the evolving structure and fortunes of the working class as a whole and helps to explain subsequent development in English history Beginning with home life Childs discusses the life cycle of the working class family and considers the changes that becoming a wage earner and a contributor to the family economy made to a youth's status He explores the significance of publicly provided education for the working class and analyses the labour market for young males focusing on the role of apprenticeship the impact of different types of labour on future job prospects the activities of trade unions and wage levels Childs makes a detailed investigation of the patterns of labour available to boys at that time including street selling half time labour and apprenticed labour versus free labour He argues that such changes were a major factor in the creation of a semi skilled adult workforce Childs then examines the choices that working class youths made in the area of their greatest freedom leisure activities He looks at street culture commercial entertainments and youth groups and movements and finds that each influenced the emergence of a more cohesive and class conscious working class during the period up to the First World War
