codes of practice **Manufacturing, Modeling, Management and Control (MIM 2000)** Peter P. Groumpos, A. P. Tzes, 2001 This Proceedings contains the papers presented at the IFAC Symposium on Manufacturing Modeling Management and Control MIM 2000 held in Patras Greece on 12-14 July 2000. MIM is a long running series of IFAC meetings featuring the best work on the development, comparison and classification of manufacturing systems. In this Proceedings key engineering topics such as agile manufacturing and intelligent manufacturing are presented alongside more management related issues as well as some of the fundamental control theory applicable to these areas. Altogether over 90 papers are presented.

Construire parasismique Milan Zacek, 1996 International Handbook of Earthquake Engineering Mario Paz, 2012-12-06
The subject of earthquake engineering has been the focus of my teaching and research for many years. Thus when Mario Paz, the editor of this handbook, asked me to write a Foreword I was interested and honored by his request. Worldwide people are beginning to understand the severity of the danger to present and future generations caused by the destruction of the environment. Earthquakes pose a similar threat; thus the proper use of methods for earthquake resistant design and construction is vitally important for countries that are at high risk of being subjected to strong motion earthquakes. Most seismic activity is the result of tectonic earthquakes. Tectonic earthquakes are very special events in that although they occur frequently their probability of becoming natural hazards for a specific urban area is very small. When a severe earthquake does occur near an urban area, however, its consequences are very large in terms of structural destruction and human suffering.
