The Subterranean Railway Christian Wolmar,2012-11-01 Since the Victorian era London's Underground has had played a vital role in the daily life of generations of Londoners Christian Wolmar celebrates the vision and determination of the 19th century pioneers who made the world's first and still the largest underground passenger railway one of the most impressive engineering achievements in history From the early days of steam to electrification via the Underground's contribution to 20th century industrial design and its role during two world wars the story comes right up to the present with its sleek driverless trains and the wrangles over the future of the system This book reveals London's hidden wonder in all its glory and shows how the railway beneath the streets helped create the city we know today **Crewe: Railway Town, Company and People 1840-1914** Diane K. Drummond,2017-07-05 This is

an important contribution to the new urban history describing and analysing one of the best examples of a company town in nineteenth century Europe This archetypal railway town was built on a green field site by a railway company in 1842-3 It was a major junction an administrative centre and an important manufacturing centre Thus it provides an ideal arena in which to study the relationship between company and people and the effects of this claustrophobic association on emerging economic and social structure and politics in the era of large scale development and modernisation in Europe and America Dianne Drummond applies the full range of modern urban historical approaches in this work It is a shining example of the ways in which new techniques in research analysis and comparison can redraw the best known histories It will be essential reading for urban historians
