The Power of Form Ana Fernandes, Ana Raquel Fernandes, Rui Carlos Fonseca, José Pedro Serra, 2015-02-27

Although positivism dismissed myths as childish fancy bound to be superseded by reason, there has been a continuous reappraisal of the power of myths since the 19th century. Once viewed as primitive and unreliable accounts and an inadequate and distorted form of knowledge, myths came to be perceived as exemplary narratives consisting of rich and complex symbolic constructs that carry meaning and a connection to reality. Myths then came to be regarded as a privileged expression of the human soul and of its possibly submerged and unconscious abysses and dramas. Rather than inherently obscure and elusive to a rational grasp, mythical narratives would therefore be driven by logical reasoning, giving shape to a particular worldview of life and humankind. The enduring power of mythical narrative is attested to by its very plasticity, subject to multiple recreations informed by changing concerns and insights. Mythical narratives have thus attracted the interest of various disciplines, from ethnology and history to philosophy, literature, sociology, politics, the history of religions, and art history. This interdisciplinary volume studies how myths are inscribed and recycled within both individual and collective heritage and examines the personal and political implications of multifaceted engagement with myths as one of the forms through which societies try to make sense of their perplexities.

Toni Morrison and the Natural World Anissa Janine Wardi, 2021-06-28

Winner of the Toni Morrison Society Book Prize for Best Single Authored Book 2019-2022. Critics have routinely excluded African American literature from ecocritical inquiry despite the fact that the literary tradition has from its inception proved to be steeped in environmental concerns that address elements of the natural world and relate nature to the transatlantic slave trade, plantation labor, and nationhood. Toni Morrison's work is no exception. *Toni Morrison and the Natural World: An Ecology of Color* is the first full-length ecocritical investigation of the Nobel Laureate's novels and brings to the fore an unequalled engagement between race and nature. Morrison's ecological consciousness holds that human geographies are enmeshed with nonhuman nature. It follows then that ecology, the branch of biology that studies how people relate to each other and their environment, is an apt framework for this book. The interrelationships and interactions between individuals and community and between organisms and the biosphere are central to this analysis. They highlight that the human and nonhuman are part of a larger ecosystem of interfacing and transformations. *Toni Morrison and the Natural World* is organized by color, examining soil brown in *The Bluest Eye* and *Paradise*, plant life green in *Song of Solomon*, *Beloved*, and *Home*, bodies of water blue in *Tar Baby* and *Love*, and fire orange in *Sula* and *God Help the Child*. By providing a racially inflected reading of nature, Toni Morrison and the
