Faber,2023-05-01 In Robot Suicide Death Identity and AI in Science Fiction Liz W Faber blends cultural studies philosophy sociology and medical sciences to show how fictional robots hold up a mirror to our cultural perceptions about suicide and can help us rethink real world policies regarding mental health For decades we ve been asking whether we could make a robot live but a new question is whether a living robot could make itself die And if it could how might we humans react Suicide is a longstanding taboo in Western culture particularly in relationship to mental health marginalized identities and individual choice But science fiction offers us space to tackle the taboo by exploring whether and under what circumstances robots as metaphorical stand ins for humans might choose to die Faber looks at a broad range of science fiction from classics like The Terminator franchise to recent hits like C Robert Cargill s novel Sea of Rust *eFiction September 2010* , **Robot Rules** Jacob Turner,2018-10-29 This book explains why AI is unique what legal and ethical problems it could cause and how we can address them It argues that AI is unlike any other previous technology owing to its ability to take decisions independently and unpredictably This gives rise to three issues responsibility who is liable if AI causes harm rights the disputed moral and pragmatic grounds for granting AI legal personality and the ethics surrounding the decision making of AI The book suggests that in order to address these questions we need to develop

new institutions and regulations on a cross industry and international level Incorporating clear explanations of complex topics Robot Rules will appeal to a multi disciplinary audience from those with an interest in law politics and philosophy to computer programming engineering and neuroscience

Harmes, 2014-05-01 Although it started as a British television show with a small but devoted fan base Doctor Who has grown in popularity and now appeals to audiences around the world In the fifty year history of the program Doctor Who's producers and scriptwriters have drawn on a dizzying array of literary sources and inspirations Elements from Homer classic literature gothic horror swashbucklers Jacobean revenge tragedies Orwellian dystopias Westerns and the novels of Agatha Christie and Evelyn Waugh have all been woven into the fabric of the series One famous storyline from the mid 1970s was rooted in the Victoriana of authors like H Rider Haggard and Arthur Conan Doyle and another was a virtual remake of Anthony Hope's The Prisoner of Zenda with robots In Doctor Who and the Art of Adaptation Fifty Years of Storytelling Marcus Harmes looks at the show's frequent exploration of other sources to create memorable episodes Harmes observes that adaptation in Doctor Who is not just a matter of transferring literary works to the screen but of bringing a diversity of texts into dialogue with the

established mythology of the series as well as with longstanding science fiction tropes In this process original stories are not just resituated but transformed into new works Harmes considers what this approach reveals about adaptation television production the art of storytelling and the long term success and cultural resonance enjoyed by Doctor Who Doctor Who and the Art of Adaptation will be of interest to students of literature and television alike and to scholars interested in adaptation studies It will also appeal to fans of the series interested in tracing the deep cultural roots of television s longest running and most literate science fiction adventure
